|------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Oral       | DO NOT induce vomiting. Get immediate medical attention.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Eye        | Flush with water for at least 15 minutes or until irritation subsides. Get medical attention if eye irritation develops or persists.                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Skin       | Wash with soap and water. Immediately remove contaminated clothing. Get medical attention if irritation develops. Launder contaminated clothing before reuse. If product is injected into or under the skin, or into any part of the body, regardless of the appearance of the wound or its size, the individual should be evaluated immediately by a physician as a surgical emergency. Even though initial symptoms from high pressure injection may be minimal or absent, early surgical treatment within the first few hours may significantly reduce the ultimate extent of injury. |
| Inhalation | Vapor pressure is very low. Vapor inhalation under ambient conditions is normally not a problem. If adverse effects are observed, remove exposed person to fresh air. If breathing is labored, administer oxygen. If breathing has stopped, apply artificial respiration. If overexposed to oil mist, remove from further exposure until excessive oil mist, subsides.                                                                                                                                                                                                                   |

| SECTION 5                           | FIRE FIGHTING MEASURES                                                                                                                                                                                                                                                                                                                                                                                            |  |  |
|-------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|--|
| Flash Point                         | 490 °F COC Typical                                                                                                                                                                                                                                                                                                                                                                                                |  |  |
| Upper Flammable Limit               | Not Determined                                                                                                                                                                                                                                                                                                                                                                                                    |  |  |
| Lower Flammable Limit               | Not Determined                                                                                                                                                                                                                                                                                                                                                                                                    |  |  |
| Extinguishing Media                 | Carbon Dioxide, dry chemical, water spray (fog) and foam. Note: water, fog and foam may cause frothing and spattering.                                                                                                                                                                                                                                                                                            |  |  |
| Special Firefighting Procedures     | Wear self-contained breathing apparatus. Avoid breathing fumes and vapors. Use water spray (fog) to cool containers exposed to high heat or open flame.                                                                                                                                                                                                                                                           |  |  |
| Unusual Fire &<br>Explosion Hazards | Empty containers contain residue and/or vapors. DO NOT WELD, CUT, PRESSURIZE, BRAZE, SOLDER, DRILL, GRIND OR EXPOSE SUCH CONTAINERS TO HEAT, SPARKS, FLAME, STATIC ELECTRICITY OR OTHER SUCH SOURCES OF IGNITION. Keep empty containers closed and dispose of in an environmentally safe manner and in accordance with all governmental regulations.                                                              |  |  |
| Autoignition Temperature            | Not Determined                                                                                                                                                                                                                                                                                                                                                                                                    |  |  |
| SECTION 6                           | ACCIDENTAL RELEASE MEASURES                                                                                                                                                                                                                                                                                                                                                                                       |  |  |
| Spill Procedures                    | Evacuate all non-essential personnel. Personal Protective Equipment must be worn, see Personal Protection Section for PPE recommendations. Remove sources of ignition. Ventilate spill area. Prevent entry into sewers and waterways. Pick up free liquid for recycle and/or disposal. Residual liquid can be absorbed on inert material. Assure conformity with applicable Federal, state and local regulations. |  |  |
| SECTION 7                           | HANDLING AND STORAGE                                                                                                                                                                                                                                                                                                                                                                                              |  |  |
| Handling Procedures                 | Keep away from potential sources of ignition. Avoid breathing vapors if present. Keep containers closed when not in use. Wash thoroughly after handling. Make sure that proper warning labels are affixed in accordance with 29 CFR 1910.1200. Use good personal hygiene around product.                                                                                                                          |  |  |
| Storage Procedures                  | Do not store near potential sources of ignition. Store in a well ventilated area. Store in a dry area. Do not store around food or eating areas.                                                                                                                                                                                                                                                                  |  |  |
| SECTION 8                           | EXPOSURE CONTROLS: PERSONAL PROTECTION                                                                                                                                                                                                                                                                                                                                                                            |  |  |
| Ventilation Procedures              | Use material in well ventilated areas only. Additional ventilation or exhaust may be required to maintain air concentrations below recommended exposure limits.                                                                                                                                                                                                                                                   |  |  |
| Gloves Protection                   | Use chemical-resistant gloves, if needed, to avoid prolonged or repeated skin contact.                                                                                                                                                                                                                                                                                                                            |  |  |
| Eye Protection                      | Safety glasses. Use splash goggles or face shield when eye contact may occur.                                                                                                                                                                                                                                                                                                                                     |  |  |
| Respiratory Protection              | Under normal conditions, respirator is not usually required. Use NIOSH/MSHA approved disposable dust/mist mask if the recommended exposure limit is exceeded.                                                                                                                                                                                                                                                     |  |  |
| Clothing Recommendation             | Use a chemical -resistant apron or other impervious clothing, if needed, to                                                                                                                                                                                                                                                                                                                                       |  |  |

avoid contaminating regular clothing, which could result in prolonged or

repeated skin contact.

Petroleum resins

64742-16-1

Proprietary additives

Mixture Less than 6% This product, as manufactured by Exxon, does not contain polychlorinated

biphenyls (PCB's).

All components of this product are listed on the U.S. TSCA inventory.

See Section E for Health and Hazard Information.

See Section H for additional Environmental Information.

HAZARDOUS MATERIALS IDENTIFICATION SYSTEM (HMIS)

Health Flammability Reactivity

1 EXPOSURE LIMIT FOR TOTAL PRODUCT

5 mg/m3 for oil mist (aerosol) for

an 8-hour workday

Recommended by Exxon

BASIS

**OSHA** Regulation 29 CFR 1910.1000 and recommended by the American Conference of Governmental Industrial Hygienists (ACGIH). ACGIH states that the air is to be sampled by a method that does not collect vapor; in addition, it lists a 10 mg/m3 STEL.

# C. PRIMARY ROUTES OF ENTRY AND EMERGENCY AND FIRST AID PROCEDURES

#### EYE CONTACT

If splashed into the eyes, flush with clear water for 15 minutes or until irritation subsides. If irritation persists, call a physician.

#### SKIN

In case of skin contact, remove any contaminated clothing and wash skin with soap and water. Launder or dry-clean clothing before reuse. If product is injected into or under the skin, or into any part of the body, regardless of the appearance of the wound or its size, the individual should be evaluated immediately by a physician as a surgical emergency. Even though initial symptoms from high pressure injection may be minimal or absent, early surgical treatment within the first few hours may significantly reduce the ultimate extent of injury.

#### INHALATION

Vapor pressure is very low. Vapor inhalation under ambient conditions is normally not a problem. If overcome by vapor from hot product, immediately remove from exposure and call a physician. If breathing is irregular or has stopped, start resuscitation; administer oxygen, if available. If overexposed to oil mist, remove from further exposure until excessive oil mist condition subsides.

#### INGESTION

If ingested, DO NOT induce vomiting; call a physician immediately.

# D. FIRE AND EXPLOSION HAZARD INFORMATION

FLASH POINT (MINIMUM) 249°C (48D°F)

AUTOIGNITION TEMPERATURE Greater than 260°C'(500°F) NATIONAL FIRE PROTECTION ASSOCIATION (NFPA) - HAZARD IDENTIFICATION
Health Flammability Reactivity BASIS

1 0 Recommended by Exxon

#### HANDLING PRECAUTIONS

Use product with caution around heat, sparks, pilot lights, static electricity, and open flame.

FLANMABLE OR EXPLOSIVE LIMITS (APPROXIMATE PERCENT BY VOLUME IN AIR)
Estimated values: Lower Flanmable Limit 0.9% Upper Flanmable Limit 7%

#### EXTINGUISHING MEDIA AND FIRE FIGHTING PROCEDURES

Foam, water spray (fog), dry chemical, carbon dioxida and vaporizing liquid type extinguishing agents may all be suitable for extinguishing fires involving this type of product, depending on size or potential size of fire and circumstances related to the situation. Plan fire protection and response strategy through consultation with local fire protection authorities or appropriate specialists.

The following procedures for this type of product are based on the recommendations in the National Fire Protection Association's "Fire Protection Guide on Hazardous Materials", Tenth Edition (1991):
Use water spray, dry chemical, foam or carbon dioxide to extinguish the fire.
Use water to keep fire-exposed containers cool. If a leak or spill has not ignited, use water spray to disperse the vapors and to provide protection for persons attempting to stop a leak. Water spray may be used to flush spills away from exposures. Minimize breathing of gases, vapor, fumes or decomposition products. Use supplied-air breathing equipment for enclosed or confined spaces or as otherwise needed.

#### DECOMPOSITION PRODUCTS UNDER FIRE CONDITIONS

Fumes, smoke, carbon monoxide, sulfur oxides, aldehydes and other decomposition products, in the case of incomplete combustion.

#### "EMPTY" CONTAINER WARNING

"Empty" containers retain residue (liquid and/or vapor) and cas be dangerous. DO NOT PRESSURIZE, CUT, WELD, BRAZE, SOLDER, DRILL, GRIND OR EXPOSE SUCH CONTAINERS TO HEAT, FLAME, SPARKS, STATIC ELECTRICITY, OR OTHER SOURCES OF IGNITION; THEY MAY EXPLODE AND CAUSE INJURY OR DEATH.

Do not attempt to refill or clean containers since residue is difficult to remove. "Empty" drums should be completely drained, properly bunged and promptly returned to a drum reconditioner. All other containers should be disposed of in an environmentally safe manner and in accordance with governmental regulations.

For work on tanks refer to Occupational Safety and Health Administration regulations, ANSI 249.1, and other governmental and industrial references pertaining to cleaning, repairing, welding, or other contemplated operations.

# E. HEALTH AND HAZARD INFORMATION

#### VARIABILITY AMONG INDIVIDUALS

Health studies have shown that many petroleum hydrocarbons and synthetic lubricants pose potential human health risks which may vary from person to person. As a precaution, exposure to liquids, vapors, mists or fumes should be minimized.

EFFECTS OF OVEREXPOSURE (Signs and symptoms of exposure):

HUG-17-1999 09:29 FRUM FAMOUS LUBRICANTS INC. and increased incidence of

infection.

In accordance with the current OSHA Hazard Communication Standard criteria. this product does not require a cancer hazard warning. This is because the product is formulated from base stocks which are severely hydrotreated, severely solvent extracted, and/or processed by mild hydrotreatment and extraction. Alternatively, it may consist of components not otherwise affected by IARC criteria, such as atmospheric distillates or synthetically derived materials, and as such is not characterized by current IARC classification criteria.

Prolonged or repeated skin contact with this product tends to remove skin oils, possibly leading to irritation and dermatitis; however, based on human experience and available toxicological data, this product is judged to be neither a "corrosive" nor an "irritant" by OSHA criteria.

Product contacting the eyes may cause eye irritation.

Product has a low order of acute oral and dermal toxicity, but minute amounts aspirated into the lungs during ingestion or vomiting may cause mild to severe pulmonary injury and possibly death.

This product is judged to have an acute oral LD50 (rat) greater than 5 g/kg of body waight, and an acute darmal LD50 (rabbit) greater than 3.16 g/kg of body

PRE-EXISTING MEDICAL CONDITIONS WHICH MAY BE AGGRAVATED BY EXPOSURE None recognized

# F. PHYSICAL DATA

The following data are approximate or typical values and should not be used for precise design purposes.

BOILING RANGE IBP Approximately 321°C (610°F) by ASTM D 2887

SPECIFIC GRAVITY (15.6-C/15.6-C) 0.92

**MOLECULAR WEIGHT** Not determined

Essentially neutral

POUR, CONGEALING OR HELTING POINT -7"C (20"F) Pour Point by ASTM D 97

VISCOSITY 429 c5t # 46°C VAPOR PRESSURE less than 0.01 mm Hg & 20-C

VAPOR DENSITY (AIR = 1) Greater than 5

PERCENT VOLATILE BY VOLUME Nagligible from open container in 4 hours @ 38°C (100°F)

EVAPORATION RATE @ 1 ATM. AND 25°C (77~F) (n-BUTYL ACETATE = 1) Less than 0.01

SOLUBILITY IN WATER # 1 ATM. AND 25-C (77-F) Negligible; Tess than 0.1%!

# G. REACTIVITY

P. 96

# H. ENVIRONMENTAL INFORMATION

#### CLEAN WATER ACT / OIL POLLUTION ACT

This product may be classified as an oil under Section 311 of the Clean Water Act, and under the Oil Pollution Act. Discharges or spills into or leading to surface vaters that cause a sheen must be reported to the National Response Center (1-800-424-8802).

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED
Recover free product. Add sand, earth or other suitable absorbent to spill area. Minimize breathing vapors. Minimize skin contact. Open all windows and doors. Keep product out of severs and watercourses by diking or impounding. Advise authorities if product has entered or may enter severs, watercourses, or extensive land areas.

Assure conformity with applicable governmental regulations.

THE FOLLOWING INFORMATION MAY BE USEFUL IN COMPLYING WITH VARIOUS STATE AND FEDERAL LAWS AND REGULATIONS UNDER VARIOUS ENVIRONMENTAL STATUTES:

THRESHOLD PLANNING QUANTITY (TPQ), EPA REGULATION 40 CFR 355 (SARA Sections 301-304)

No TPQ for product or any constituent greater than 1% or 0.1% (carcinogen).

TOXIC CHEMICAL RELEASE REPORTING, EPA REGULATION 40 CFR 372 (SARA Section 313)

No toxic chemical is present greater than 1% or 0.1% (carcinogen).

HAZARDOUS CHEMICAL REPORTING, EPA REGULATION 40 CFR 370 (SARA Sections 311-312)

EPA Hazard Classification Code: Not Applicable

# I. PROTECTION AND PRECAUTIONS

#### VENTILATION

Use local exhaust to capture vapor, mists or fumes, if necessary. Provide ventilation sufficient to prevent exceeding recommended exposure limit or buildup of explosive concentrations of vapor in air. No smoking, or use of flame or other ignition sources.

#### RESPIRATORY PROTECTION

Use supplied-air respiratory protection in confined or enclosed spaces, if needed.

#### PROTECTIVE GLOVES

Use chemical-resistant gloves, if needed, to avoid prolonged or repeated skin contact.

#### EYE PROTECTION

Use splash goggles or face shield when eye contact may occur.

#### OTHER PROTECTIVE EQUIPMENT

Use chemical-resistant apron or other impervious clothing, if needed, to avoid contaminating regular clothing, which could result in prolonged or repeated skin contact.

To prevent fire or explosion risk from static accumulation and discharge, effectively bond and/or ground product transfer system in accordance with (THE) National Fire Protection Association PUBLICATIONS.

Keep containers closed when not in use. Do not store near heat, sparks, flame

or strong oxidante.

In order to prevent fire or explosion hazards, use appropriate equipment. Information on electrical equipment appropriate for use with this product may be found in the latest edition of the National Electrical Code (NFPA-7D). This document is available from the National Fire Protection Association, Batterymarch Fark, Quincy, Massachusetts 02269.

PERSONAL HYGIENE

Minimize breathing vapor, mist or fumes. Avoid prolonged or repeated contact with skin. Remove contaminated clothing; launder or dry-clean before re-use. Remove contaminated shoes and thoroughly clean before re-use; discard if oil-soaked. Cleanse skin thoroughly after contact, before breaks and meals, and at end of work period. Product is readily removed from skin by waterless hand cleaners followed by washing thoroughly with soap and water.

# J. TRANSPORTATION AND OSHA RELATED LABEL INFORMATION

#### TRANSPORTATION INCIDENT INFORMATION

For further information relative to spills resulting from transportation incidents, refer to latest Department of Transportation Emergency Response Guidebook for Hazardous Materials Incidents.

# U.S. DOT HAZARDOUS MATERIALS SHIPPING DESCRIPTION Not regulated

#### OSHA REQUIRED LABEL INFORMATION

In compliance with hazard and right-to-know requirements, where applicable OSHA Hazard Warnings may be found on the label, bill of lading or invoice accompanying this shipment.

Note: Product label may contain non-OSHA related information also.

The health and safety information presented herein must be used in conjunction with the pertinent standards for training, work practices and facilities design established by OSHA, NIOSH, NFPA, API, NEC, NSC, UNDERWRITERS, BUREAU OF MINES, and similar organizations.

The information and recommendations contained herein are, to the best of Exxon's knowledge and belief, accurate and reliable as of the date issued. Exxon does not varrant or guarantee their accuracy or reliability, and Exxon shall not be liable for any loss or damage arising out of the use thereof.

The information and recommendations are offered for the user's consideration and examination, and it is the user's responsibility to satisfy itself that they are suitable and complete for its particular use. If buyer repackages this product, legal counsel should be consulted to insure proper health, safety and other necessary information is included on the container.

to provide additional health and hazard classification information. The ratings recommended are based upon the criteria supplied by the developers of these rating systems, together with Exxon's interpretation of the available data.

# Give your pneumatic equipment a new lease on life...

with NFO's AIR LUBE, a specially formulated lubricant for pneumatic equipment

Keep your pneumatic equipment running longer — up to three times longer — cleaner with less downtime and greater power using NFO's AIR LUBES.

#### THE ISSUE

Virtually every manufacturing or processing plant utilizes pneumatic powered equipment. The life and performance of these air tools are essential to the productivity and operation of the plant. Excessive downtime, slower performing tools and shorter tool life can easily destroy productivity gains made elsewhere. Inadequate lubrication of these pneumatic operated tools is one of the major contributors to poor performance.

#### THE PERFORMANCE

Air contains moisture, dirt, dust, and other contaminates that can interfere with the proper functioning of pneumatic equipment. Moisture exists in virtually all air lines due to the relative humidity in the air and the condensation caused by the expansion and cooling of compressed air. Air line lubricants that are not specially

formulated to operate in the presence of moisture can interact with the moisture to form sludge, rust, and gum. This can be especially true for tools that are left in storage for any length of time. Other contaminates can pass through the filter system and cause varnishes and sticky substances to form in the tools and air lines thus lowering the performance of the tools. Lubricants such as hydraulic oils, motor oils, and penetrating oils, commonly used in air tools are not designed for air systems and are not able to combat the moisture and contaminates.

#### THE SOLUTION

NFO's AIR LUBE family of products is specifically designed for pneumatic equipment and air operated tools.

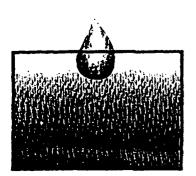

- AIR LUBE's special emulsifiers can absorb up to 10% of its weight in water which prevents the formation of gum and sludge.
- AIR LUBE's base oil, unlike most conventional oils, will not leave hard carbon deposits that can rob equipment of power.

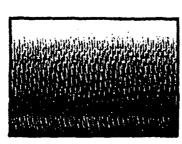

- AIR LUBEs contain anti-wear and extreme pressure additives which will provide additional lubrication for the gears and other moving parts of heavily loaded tools.
- AIR LUBE's corrosion preventative package helps prevent the rust that can occur in tools and airlines due to the moisture carried in the air.
- AIR LUBE's formulation is designed not to affect rubber or plastic valves and seals.

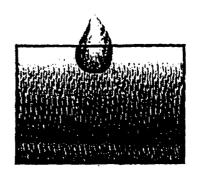

#### THE RESULTS

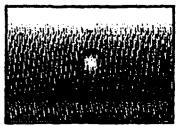

With as few as three drops a minute of NFO's AIR LINE lubricant, you can expect the following added benefits from your pneumatic equipment and tools:

- Increased Life
- More power
- Longer service life
- Storage protection
- Lower lubricant usage
- Decreased total cost of pneumatic system

These high quality AIR LUBES are available in a wide variety of package sizes that allow the end user to choose the application method best suited to their environment. The packages include, 55 gallon drums, 120 lb. kegs, 5 gallon pails, 1 gallon cans, and plastic pint bottles. NFO AIR LUBEs are also available in several other viscosity grades for extreme applications.

NPPA HAZARD RATING

4 - EXTREME

3 - HIGH

2 - MODERATE

1 - SLIGHT

0 - INSIGNIFICANT

DIVISION AND LOCATION - SECTION 1 DIVISION: Pamous Lubricants, Inc.

LOCATION: 124 W. 47TH Street

Chicago, Illinois 60609

EMERGENCY TELEPHONE NUMBER: 312-268-2555 

CHEMICAL AND PHYSICAL PROPERTIES - SECTION II

CHEMICAL NAME: petroleum hydrocarbon plus additives

PORMULA: not applicable

HAZARDOUS DECOMPOSITION PRODUCTS:

oxides of phosphorous from burning

hydrochloric acid on burning or decompostion

oxides of sulfur

sulfur dioxide or hydrogen sulfide, depending upon decomposition conditions

oxides of nitrogen

carbon monoxide and carbon dioxide from burning

chlorinated hydrocarbons

INCOMPATIBILITY (KEEP AWAY FROM):

strong oxidizers such as hydrogen peroxide, bromine, and chromic acid.

TOXIC AND HAZARDOUS INGREDIENTS:

none

ODOR: mineral oil FORM: semi-solid COLOR: dark amber APPEARANCE: grease

SPECIFIC GRAVITY (WATER = 1): @ room temperature .935

BOILING POINT: no data available

MELTING POINT: not applicable

SOLUBILITY IN WATER (BY WEIGHT %): negligible at 25°C VOLATILE (BY WEIGHT%): not applicable

EVAPORATION RATE: not applicable

VAPOR PRESSURE (mm Hg AT 20°C): not applicable VAPOR DENSITY (AIR=1): not applicable

pH (AS IS): not applicable

STABILITY: product is stable under normal conditions

VISCOSITY SUS @ 100°F: 1 100

#### SAFETY DATA MATERIAL

SHEET

ORANGE INDUSTRIAL LUBE. 390 PAGE 2 OF 4 FIRE AND EXPLOSION DATA - SECTION III SPECIAL FIRE FIGHTING PROCEDURES: dense smoke, fire fighters should wear an approved self-contained breathing apparatus. do no use water except as fog. UNUSUAL FIRE AND EXPLOSION HAZARDS: dense smoke FLASHPOINT: (Method Used) Cleveland Open Cup > 170°C (338°F) FLAMMABLE LIMITS &: no data available EXTINGUISHING AGENTS: dry chemical or water fog or CO2 or foam or sand/earth water may cause frothing closed containers exposed to fire may be cooled with water HEALTH HAZARD DATA - SECTION IV PERMISSIBLE CONCENTRATIONS (air): not applicable CHRONIC EFFECTS OF OVEREXPOSURE: none when used with good personal hygiene practices. may otherwise cause skin and eye irritation upon prolonged or

TO

repeated contact. ACUTE TOXICOLOGICAL PROPERTIES:

no data available

EMERGENCY FIRST AID PROCEDURES:

EYES: immediately flush with large quantities of water for at least 15 minutes and call a physician.

SKIN CONTACT: remove excess with cloth or paper. wash thoroughly with soap and water. for high pressure injection under skin see physician immed. INHALATION: remove exposed person to fresh air if discomfort is experienced while handling hot product.

IF SWALLOWED: contact physician immediately.

ADVICE TO PHYSICIANS:

high velocity injection under the skin may result in serious injury. if left untreated the affected area is subject to infection, disfigurement, lack of blood circulation and may require amputation. when dispensed by high pressure equipment this material can easily penetrate the skin and leave a bloodless puncture wound. material injected into a finger be deposited into the palm of the hand. Within 24-48 hours the patient may experience swelling, discoloration, and throbbing pain in the affected area. immediate treatment by a surgical specialist is recommended.

SPECIAL PROTECTION INFORMATION - SECTION V

VENTILATION TYPE REQUIRED (Local, mechanical, special):

RESPIRATORY PROTECTION (Specify type):

none

EYE PROTECTION:

chemical safety goggles and, if handled hot, full face shield

PROTECTIVE GLOVES:

none

OTHER PROTECTIVE EQUIPMENT:

DODA

HANDLING OF SPILLS OR LEAKS - SECTION V1

PROCEDURES FOR CLEAN-UP:

transfer bulk of mixture into another container. absorb residue with an inert material such as earth, sand, or vermiculite. sweep up and dispose as solid waste in accordance with local, state, and federal regulations.

WASTE DISPOSAL:

dispose of in accordance with all applicable federal, state and local reculations.

SPECIAL PRECAUTIONS - SECTION VII

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE:

keep containers closed until ready for use.

TRANSPORTATION DATA - SECTION VII

D.O.T.: not required

REPORTABLE QUANTITY: not applicable

FREIGHT CLASSIFICATION: petroleum lubricating grease.

SPECIAL TRANSPORTATION NOTES:

ENVIRONMENTAL/SAPETY REGULATIONS - SECTION IX

SECTION 313 (TITLE III SUPERFUND AMENDMENT AND REAUTHORIZATION ACT): this product does not contain any chemical in sufficient quantity to be subject to reporting requirements of Section 313 of Title III of the Superfund

Ammendments and Reauthorization Act of 1986 and 40 CFR Part 372.

ROUTES OF ENTRY AND FIRST AID PROCEDURES

If splashed into the eyes, flush with clear water for 15 minutes or until irritation subsides. If irritation persists, call a physician.

#### SKIN

In case of skin contact, remove any contaminated clothing and wash skin thoroughly with soap and water. If product is injected into or under the skin. or into any part of the body, regardless of the appearance of the wound or its size, the individual should be evaluated immediately by a physician as a surgical emergency. Even though initial symptoms from high pressur injection may be minimal or absent, early surgical treatment within the first few hours may significantly reduce the ultimate extent of injury.

#### INHALATION

Vapor pressure is very low. Vapor inhalation under ambient conditions is normally not a problem. If overcome by vapor from hot product, immediately remove from point of exposure and call a physician. If breathing is irregular or has stopped, start resuscitation and administer oxygen. If over exposed to oil mist, remove from further exposure until excessive oil mist subsides.

#### INGESTION

DO NOT induce vomiting if ingested: CALL A PHYSICIAN AT ONCE

#### HANDLING PRECAUTIONS

Use product with caution, around heat, sparks, pilot lights, open flame, and static electricity.

FLANHABLE OR EXPLOSIVE LIMITS - VOLUME & IN AIR - ESTIMATED VALUES Lower Flammable Limit - 0.9% Upper Flammable Limit - 7%

#### EXTINGUISHING MEDIA AND FIRE FIGHTING PROCEDURES

Foam, water spray (fog), dry chemical, carbon dioxide and vaporizing liquid type extinguishing agents may all be suitable for fires involving this type of product, depending on size of fire and circumstances related to the situation. Plan fire protection and response strategy through consultation with local fire protection authorities. The following procedures for this type of product are based on the recommendations in the NFPA'S "FIRE PROTECTION GUIDE on HAZARDOUS HATERIALS", 8th Ed. : Use water spray, dry chemical, foam or carbon dioxide.

FAGE 3 OF 5

14767061404 1.64

# MATERIAL SAFETY DATA SHEET

TION TORROS CONTROPINO 1170.

Use water to keep fire exposed containers cool. If a leak or a spill has not ignited use water spray to disperse the vapor and to provide protection for men attempting to stop a leak. Water spray may be used to flush spills away from exposures. Hinimize breathing gases, vapor, fumes or products of decomposition. Use supplied-air breathing apparatus for enclosed and confined areas.

DECOMPOSITION PRODUCTS UNDER FIRE CONDITIONS

Fumes, smoke, carbon monoxide, sulfur oxides, aldehydes, nitrogen oxides, and other decomposition products, in the case of incomplete combustion.

#### EMPTY CONTAINER WARNING

Empty containers can retain residue, either liquid or vapor and could be dangerous. On not pressurize, cut, weld, braze, solder, drill, grind or expose such containers to heat, flame, sparks, static electricity or other sources of ignition; THEY HAY EXPLODE AND CAUSE INJURY OR DEATH. Do not attempt to clean since residue is difficult to remove. Empty drums should be completely drained, properly bunged and promptly returned to the lubricant supplier or to a drum reconditioner. All other containers should be disposed of in environmentally safe manner and in accordance with governmental regulations.

HEALTH AND HAZARD INFORMATION

#### HEALTH STUDIES

Health studies have shown that many petroleum hydrocarbons pose potential human health risks which may vary from person to person. As a precaution, exposure to liquids, vapors, mists or fumes should be minimized.

SIGNS AND SYMPTOMS OF EXPOSURE OR OVEREXPOSURE
Prolonged or repeated skin contact may cause skin irritation.

#### NATURE OF HAZARD AND TOXICITY

Repeated and prolonged overexposure to oil mists may result in droplet deposition, oil granuloma formation, inflammation and increased incidence of infection.

Current OSHA Hazard Communication Standards do not require this product to have a cancer hazard warning. This is because the product is formulated from base oils which are either severely hydrotreated or severely solvent extracted. Repeated skin contact with this product tends to remove skin oils, possibly leading to irritation or dermatitis. Based on human experience and available toxicological data, this product is judged to be neither a "corrosive" nor an "irritant" by OSHA. Product contacting the eyes may cause eye irritation. The product has a low order of acute oral and dermal toxicity. However, minute amounts aspirated into the lungs during ingestion or vomiting may cause mild to severe pulmonary injury and possible death. This product is judged to have and an acute Oral Lethal Dose 50% (rat) greater than 5 g/Kg of body weight and an acute Dermal Lethal Dose 50% (rabbit) greater than 3.16 g/Kg of body weight. There are no recognized pre-existing medical conditions which may be aggravated by exposure to this product.

PRE-EXISTING HEDICAL CONDITIONS WHICH MAY BE AGGRAVATED BY EXPOSURE None recognized

#### REACTIVITY DATA

This product is stable and will NOT react violently with water. Hazardous polymerization will NOT occur. Avoid contact with strong oxidants such as liquid chlorine, concentrated oxygen, sodium hypochlorite and calcium hypochlorite.

#### ENVIRONHENTAL INFORMATION

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED Recover spilled product. Add sand, earth or other suitable absorbant to spill area. Minimize breathing vapors. Minimize skin contact. Open all windows and doors. Keep product out of sewers and watercourses. Advise authorities if product has entered or may enter sewers, watercourses, or extensive land areas. Conform with all governmental regulations.

REPORTABLE QUANTITY (RQ) EPA REG. 40 CFR 302 CERCLA SECT. 102 No RQ for product or any constituent greater than 1% or 0.1% (carcinogen).

THRESHOLD PLANNING QUANTITY (TPQ) EPA REG. 40 CFR 355 SARA SECT.301-304 No TPQ for product or any constituent greater than 1% or 0.1% (carcinogen).

TOXIC CHEMICAL RELEASE REPORTING EPA REG. 40 CFR 372 SARA SECT.313 No toxic chemical is present greater than 1% or 0.1% (carcinogen).

EPA HAZARD CLASSIFICATION CODE EPA REG. 40 CFR 370 SARA SECT.311-312 No Acute No Chronic No Fire No Pressure No Reactive XX Not applicable

#### CLEAN WATER ACT

Under Section 311 (b) (4) Clean Water Act, discharges of crude oil and petroleum products in any kind or form to surface waters must be immediately reported to the National Response Center 800-424-8802.

TOXIC SUBSTANCE CONTROL ACT

This product does not contain any TSCA 12b reportable chemical substance:

#### SPECIAL PROTECTION INFORMATION

#### VENTILATION

Use local exhaust to capture vapor, mists or fumes. Provide enough ventilation to prevent exceeding recommended exposure limit or build-up of explosive concentrations of vapor in air. Use explosion-proof equipment, No smoking or open flame.

#### RESPIRATORY PROTECTION

Use supplied-air respiratory protection in confined or enclosed areas.

#### PROTECTIVE GLOVES

Use chemical-resistant gloves, if needed, to prevent prolonged contact.

MOR 001094

Use splash goggles or face shield when eye contact may occur.

#### OTHER PROTECTIVE EQUIPMENT

·Use chemical-resistant apron, if needed, to avoid contaminating regular clothing which could result in prolonged skin contact.

PAGE 5 OF 5

#### MATERIAL SAFETY DATA SHEET ORANGE TURBINE DIL 150

WORK PRACTICES AND CONTROLS

Keep containers closed when not in use. DO NOT store near heat. Keep away from sparks, open flace and/or strong oxidants. Store below 150°F.

Minimize breathing vapor, mist or fumes. Avoid prolonged skin contact. Remove contaminated clothing, launder before using again. Thoroughly clean oil soaked shoes, discard if necessary. Cleanse skin thoroughly after contact. Product is readily removed from skin by waterless hand cleaners followed by washing thoroughly with soap and water.

#### V. HEALTH HAZARD / ROUTE(S) OF ENTRY

#### Symptoms of Overexposure

Inhalation (Breathing):

May cause anesthesia, headache, dizziness, nausea and upper respiratory irritation.

Skin Contact:

May cause drying of skin and/or irritation.

Eye Contact:

May cause irritation, tearing and redness.

Ingestion (Swallowed):

May cause irritation, nausea, vomiting and diarrhea.

First Aid Procedures

Ingestion (Swallowed):

Do not induce vomiting. Seek medical attention.

Eye Contact:

Immediately flush eyes with large amounts of water for 15 minutes.

Skin Contact:

Wash with soap and water.

inhalation (Breathing):

Remove to fresh air. Give artificial respiration if necessary. If breathing is difficult, give oxygen.

DANGER!

Aspiration Hazard:

If swallowed, can enter lungs and may cause chemical pneumonitis.

Do not induce vomiting. Call Physician Immediately.

Suspected Cancer Agent

Yes \_\_\_\_ No \_\_x

The components in this mixture have been found to be noncarcinogenic by NTP, IARC

and OSHA.

#### VII. SPILL OR LEAK PROCEDURES

#### Spill Response Procedures

Absorb small quantities with sand, earth, sawdust. Large quantities pump into tank,

#### Waste Disposal Method

Incinerate liquid, bury saturated absorbent in land fill. Dispose of in accordance with local, state and federal regulations.

#### VIII. SPECIAL HANDLING INFORMATION

Ventilation Requirements: Use local exhaust to capture vapor, mists or fumes, if necessary. Provide ventilation

sufficient to prevent exceeding recommended exposure limit or build-up of explosive

concentrations of vapor in air. No smoking, or use of flame or other ignition sources.

Respiratory Protection: Use air respiratory protection in confined or enclosed spaces, if needed.

Protective Gloves: Use chemical-resistant gloves, if needed, to avoid prolonged or repeated skin contact.

Eye Protection: Use splash goggles or face shield when eye contact may occur.

#### IX. SPECIAL PRECAUTIONS

Keep from open flame. Do not take internally, Avoid excessive inhalation of vapors. Keep from children.

#### X. REGULATORY INFORMATION

All ingredients for this product are listed on the TSCA inventory.

SARA Title III chemicals: None

California Prop 65 chemicals: None
CERCLA reportable quantity: None

#### VII. SPILL OR LEAK PROCEDURES

#### Spill Response Procedures

Spill unlikely from aerosol cans. Leaking cans should be placed in plastic bag or open pail until pressure has dissipated. Waste Disposal Method

Empty aerosol cans should not be punctured or incinerated; bury in land fill. Liquid should be incinerated or buried in land fill. Dispose of in accordance with local, state and federal regulations.

#### VIII. SPECIAL HANDLING INFORMATION

Ventilation: - Sufficient to keep solvent vapor less than TLV.

Respiratory Protection: Advised when concentrations exceed TLV. Protective Gloves: Advised to prevent possible skin irritation.

Eye Protection: Approved eye protection to safeguard against potential eye contact,

irritation or injury.

Other Protective Equipment: None required.

testing of similar products and/or the components.

SKIN IRRITATION (RASBITS): Expected to be mon-irritating. ---Based on testing of similar products and/or the components.

---SUSCHROWIC TOXICOLOGY (SUNUMY)---

---SISCHROWIC TORICOLOGY (SUNULRY)--Swerely solvent refined and severely hydrotreated mineral biss oils
have been tested at Mobil Environmental and Mealth Sciences
Laboratory by dermal application to rats 5 days/uses for 90 days at
deses significantly higher than those expected during nermal
industrial exposure. Extensive evaluations including microscopic
essaination of internal organs and clinical chemistry of body
fluids, showed no adverse effects.
----Cyronic Toricology (Survey)--The base site in this architet are severally solvent refined and/or

The base oils in this product are severely solvent refined and/or severely hydracreated. Chronic douse skin painting studies of similar oils showed no evidence of carcinogenic effects.

<sup>\*</sup> This chemical is subject to S.A.R.A. Title III Section 313 and 40 CFR372 reporting.

## **EMERGENCY RESPONSE INFORMATION**

#### First Aid Procedures

INHALATION

Move subject to fresh air. Give artificial respiration if breathing has

stopped. Call a physician.

INGESTION

If swallowed, give 2 glasses of water to drink. Consult a physician. Never

give anything by mouth to an unconscious person. Do not induce

vomiting.

EYE AND SKIN CONTACT

IMMEDIATELY flush eyes with a large amount of water for at least 15 minutes. See a physician. Wash affected skin areas thoroughly with

soap and water. Remove and wash contaminated clothing thoroughly.

NOTE TO PHYSICIAN

Acute massive exposure to toluene can cause transient hematuria and

albumnuria. Cardiac dysrhythmias can occur after massive inhalation.

#### Fire Fighting Information

UNUSUAL HAZARDS

Vapors can travel to a source of ignition and flash back.

**EXTINGUISHING AGENTS** 

Use the following extinguishing media when fighting fires involving this material: (1) polar solvent (alcohol foam), (2) carbon dioxide, (3) water spray, or (4) dry chemical.

PERSONAL PROTECTIVE EQUIPMENT

Wear self-contained breathing apparatus (pressure-demand

MSHA/NIOSH approved or equivalent) and full protective gear.

SPECIAL PROCEDURES

Use water spray to cool containers exposed to fire.

#### Spill or Leak Handling Information

PERSONAL PROTECTION

Appropriate protective equipment must be worn when handling a spill of this material. See the PERSONAL PROTECTION MEASURES section for recommendations. If exposed to material during clean-up operations, see the FIRST AID PROCEDURES section for actions to follow.

**PROCEDURES** 

Eliminate all ignition sources. Evacuate the spill area. Floor may be slippery; use care to avoid falling. Contain spills immediately with inenmaterials (e.g. sand, earth). Transfer liquids and solid diking material to separate suitable containers for recovery or disposal. Keep dust to a minimum. CAUTION: Keep spills and cleaning runoff out of municipal sewers and open bodies of water. NOTE: Spills on porous surfaces can contaminate ground water.

## HAZARD INFORMATION

#### Health Effects From Overexposure

PRIMARY ROUTES OF EXPOSURE

Inhalation, Skin Contact, and Eye Contact

INHALATION

Inhalation of solvent vapor or mist can cause the following: (1) irritations of nose, throat, and lungs, (2) drowsiness, (3) slurred speech, (4) headache, (5) nausea, (6) dizziness, (7) stupor, and/or (8) unconsciousness.

EYE CONTACT

Material can cause the following: (1) substantial irritation and/or (2)

corneal clouding.

SKIN CONTACT

Material can cause the following: (1) moderate skin irritation and/or (2) defatting and drying of the skin which can lead to irritation and dermatitis.

START INTERNATIONAL 3361 Boyington, Suite 120 Carrollton, Texas 75006 (214 960-1986) Product: PC-101 Protective Coating Code: PC-101; Key: PC-101

Synthetic Resin

#### Health Effects From Overexposure - Continued

DELAYED EFFECTS

Prolonged or repeated overexposure to toluene/xylene can cause the following: (1) irritation of the respiratory tract, (2) enlarged liver, (3) kidney effects, (4) cardiac sensitization, and/or (5) severe skin irritation.

#### Fire And Explosive Properties

#### Reactivity Information

INSTABILITY

This material is considered stable.

HAZARDOUS DECOMPOSITION PRODUCTS There are no known hazardous decomposition products for this material.

HAZARDOUS POLYMERIZATION

Product will not undergo polymerization.

INCOMPATIBILITY

Avoid contact with strong oxidizing agents.

## ACCIDENT PREVENTION INFORMATION

#### Component Exposure Information

This product contains the following chemicals. This information must be included in all material safety data sheets that are copied and distributed for this product.

| Component Number | Chemical Name      | % By Weight | CAS REG NO.   |  |
|------------------|--------------------|-------------|---------------|--|
| 1                | Acrylic copolymer  | 35-38       | Not Hazardous |  |

#### **Personal Protection Measures**

RESPIRATORY PROTECTION

A respiratory protection program meeting OSHA 1910.134 and ANSI Z88.2 requirements must be followed whenever workplace conditions warrant a respirator's use. None required if airborne concentrations are maintained below the TWA/TLV's listed in the COMPONENT EXPOSURE INFORMATION section.

Up to 10 times the TWA/TLV: MSHA/NIOSH approved (or equivalent) half-mask, air-purilying respirator.

Up to 100 times the TWA/TLV: MSHA/NIOSH approved (or equivalent) full-face piece, air-purilying respirator.

Above 100 times or Unknown: MSHA/NIOSH approved (or equivalent) self-contained breathing apparatus in the positive pressure mode, OR MSHA/NIOSH approved (or equivalent) full-face piece airline respirator in the positive pressure mode with emergency escape provisions.

Air-purifying respirators should be equipped with organic vapor cartridges.

EYE PROTECTION

Use chemical splash goggles (ANSI Z87.1 or approved equivalent).

HAND PROTECTION

The glove(s) listed below may provide protection against permeation. Gloves of other chemically resistant materials may not provide adequate protection: Nitrile. Gloves should be removed and replaced immediately it there is any indication of degradation or chemical breakthrough.

OTHER PROTECTION

Use chemically resistant apron or other impervious clothing to avoid prolonged or repeated skin contact.

START INTERNATIONAL 3361 Boyington, Suite 120 Carrollton, Texas 75006 (214 960-1986) Product: PC-101 Protective Coating Code: PC-101; Key: PC-101

Synthetic Resin

### **Facility Control Measures**

VENTILATION Use explosion proof local exhaust ventilation with a minimum capture

velocity of 100 ft/min (10 m/min) at the point of vapor evolution. Refer to the current edition of *Industrial Ventilation: A Manual of Recommended Practice* published by the American Conference of Governmental Industrial Hygienists for information on the design, installation, use, and

maintenance of exhaust systems.

OTHER PROTECTIVE EQUIPMENT Facilities storing or utilizing this material should be equipped with an

eyewash facility and a safety shower.

#### Storage And Handling Information

STORAGE CONDITIONS Material can burn; limit indoor storage to approved areas equipped with

automatic sprinklers. Store away from excessive heat (e.g. steam pipes, radiators), from sources of ignition and from reactive materials. Low temperature storage can cause handling problems. Viscosity of material

will increase.

HANDLING PROCEDURES Ground all containers when transferring material.

OTHER CONTAINERS HAZARDOUS WHEN EMPTY. Since emptied containers

retain product residue (vapors and/or liquid) follow all MSDS and label warnings even after container is emptied. Residual vapors in empty containers may explode on ignition. DO NOT cut, drill, grind or weld on

or near container.

#### **Toxicity Information**

**ACUTE DATA** 

The information shown in the HEALTH EFFECTS FROM OVEREXPOSURE section is based on toxicity profiles of similar

materials or on the solvents present in this material.

Oral LD50 (rat):

5000 mg/kg

Dermal LD50 (rabbit): Inhalation LCLo (rat):

12124 mg/kg 4000 ppm for 4 hrs

Skin Irritation (rabbit):

moderate irritation

Eye Irritation (rabbit):

severe irritation

REPRODUCTIVE/TERATOLOGY DATA

Toluene has been demonstrated to be embryofetotoxic and teratogenic

in laboratory animals.

#### **Waste Disposal**

Procedure

Dispose of this material at a facility that complies with local, state, and

federal regulations.

## REGULATORY INFORMATION

#### Workplace Classifications

This product is considered hazardous under the OSHA Hazard Communication Standard (29CFR 1910.1200) and is a controlled product under the Canadian Workplace Hazardous Materials Information System (WHMIS).

#### **Transportation**

**US DOT Hazard Class** 

FLAMMABLE LIQUID

The above information applies to the U.S. DOT classification of this material (49CFR 172.101). Various exemptions and/or restrictions may apply.

#### **Emergency Planning & Community Right-To-Know (SARA Title 3)**

SECTION 311/312 CATEGORIZATIONS (40CFR 370) This product is a hazardous chemical under 29CFR 1910.1200,

and is categorized as an immediate and delayed health, and flammability

physical hazard.

SECTION 313 INFORMATION (40CFR 372) This product contains chemicals which are listed in Section 313 above

de minimis concentrations. The following listed chemicals are present: (Quantity present is found elsewhere on this MSDS) Toluene (108-88-3),

Xylene (1330-20-7).

#### Cercla Information (40CFR 302.4)

This material has a component or components with a reportable quantity under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) and the Superlund Amendments and Re authorization Act (SARA) Title III section 304. The components, CAS numbers, and reportable quantities are listed below. Spills of a component in excess of its reportable quantity must be reported to the National Response Center (1-800-424-8802) and to the appropriate state and local emergency response organizations: Toluene (108-88-3) 1000lbs, Xylene (1330-20-7) 1000lbs.

#### **RCRA** Information

When a decision is made to discard this material as supplied, it is classified as a RCRA hazardous waste with the characteristic of ignitability, hazardous waste number: D0001.

#### **Chemical Control Law Status**

All components of this product are listed or are excluded from listing on the U.S. Toxic Substances Control Act (TSCA) Chemical Substance Inventory.

PC-101® is a trademark of Pan American Research & Development Corp or one of its subsidiaries or affiliates.

## MATERIAL SAFETY DATA SHEET HISSAN TRADING CO., LTD.

Date Prepared: 28, February 1998

Date Revised : Page 1 of 6

#### 1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

Product Name : Panasert Touch Lube

Model Number: N990PANA-021

Manufactured By: HISSAN TRADING CO., LTD

14TH FLOOR, B WING SHUWA SHIBA-PARK BLDG.

4-1, SHIBA-KOEN, 2-CHOME,

MINATOKU, TOKYO, 105-0001 JAPAN

Tel: 81-3-5405-6105

Fax : 81-3-5405-6106

#### 2. COMPOSITION/INFORMATION ON INGREDIENTS

| INGREDIENTS                                             | CAS≠       |             |  |  |
|---------------------------------------------------------|------------|-------------|--|--|
| Distillates, petroleum, solvent-refined beavy paraffunc | 64741-88-4 | <del></del> |  |  |
| Residual oils, petroleum, solvent-refined               | 64742-01-4 |             |  |  |
| 2-Methyl Pentane                                        | 107-83-5   |             |  |  |
| Polytetrafluoroethylene plastics                        | 9002-84-0  |             |  |  |
| Sulfonic acids, petroleum, barium salts                 | 61790-48-5 |             |  |  |

#### 3. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW: Brown Liquid with white powder. Extremely flammable.

#### POTENTIAL HEALTH EFFECTS

Eye Effects: May cause slight eye and mucous membrane irritation.

Skin Effects: May cause slight skin irritation.

Ingestion Effects: No exposure expected under normal conditions. Inhalation Effects: Large amount of mist if inhaled, may cause

Irritation of nose and throat mucous membranes.

#### Page 2 of 6

Chronic Effects/Carcinogenicity: None of the components in this material is listed by IARC, ED or ACGIE as a carcinogen.

#### 4 FIRST AID MEASURES

Eye : Flush with large amount of water, lifting upper and lover lids

occasionaly, get medical attention.

Skin : Thoroughly wash exposed area with soap and water.

Ingestion : Get medical attention immediately.

Inhalation: If affected, remove individual to fresh air, keep person warm,

quiet and get medical attention.

#### 5. FIRE FIGHTING MEASURES

Flash Point : -20 t
Flammable Limits : No data

Autoignition Temperature : 280 T

Unusual Fire and Explosion Hazard : Highly flammable liquid. Can release

vapors that form flammable mixutures

with air.

Extinguishing Media : Powder, Foam, Carbon Dioxide, Sand

Fire Fighting : Fear self-contained breathing

apparatus and protective clothing to prevent contact with skin and eyes.

Reep container(s) exposed to fire cool

by spraying with water.

Hazardous Combustion Products : Carbon Monoxide, Carbon Dioxide.

(Continued on page 3)

Page 3 of 6

#### 6. ACCIDENTAL RELEASE MEASURES

Spill and Leakage Procedures: Eandle as a flammable liquid. Absorb on sand, clay, or other absorbent materials. Eliminate ignition sources. Dispose of in accordance with local, state and federal regulations governing combustible waste.

#### 7. HANDLING AND STORAGE

Eardling: Use only in well ventilated areas. Avoid prolonged inhalation of excessive vapor and contact with eyes.

Prevention of Fire and Explosion: Keep away from heat, spark, flames and other sources of ignition, Protect containers from direct sunlight and do not expose to temperatures exceeding 50C .

Storage: Keep out of reach of children. Keep in a dry, cool, and dark place

#### 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

| INGREDIENTS      | MAK-value        |  |  |  |
|------------------|------------------|--|--|--|
| Wineral Oil      | None established |  |  |  |
| 2-Methyl Pentenc | 200ppm           |  |  |  |
| Teflon           | None established |  |  |  |

Engineering Controls: Not required under normal conditions, Respiratory Protection: Use respirator if it is needed. Skin Protection: Not required under normal conditions. Eye Protection: Not required under normal conditions,

(Continued on page 4)

### Page 4 Of 6

#### 9. PEYSICAL AND CHENICAL PROPERTIES

Appearance: Brown liquid with white Teflon powder Odor: Odor of mixture of mineral oil and solvent

PH : No data

Yapor Pressure : No data Vapor Density: No data Evaporation Rate: No data Boiling Point : No data Specific Gravity: 0.85 Viscosity: 8. 3cst(40t)

Flash Point : -20%

#### 10 STABILITY AND REACTIVITY

Stability: stable

Incompatibility: Oxidizers

Eazardous Decomposition: Carbon monoxide and Carbon dioxide.

#### 11. TOXICOLOGICAL INFORMATION

Acute oral toxicity: 22g/kg(rat)

Eye irritation : No data Skin irritation : No data

(Continued on page 5)

#### Page 5 of 6

Skin sensitizatio : No data
Inhalation : No data
Futagenicity : No data
Carcinogenicity : No data

#### 12. ECOLOGICAL INFORMATION

No data

#### 13. DISPOSAL CONSIDERRATIONS

Dispose in accordance with local, state and federal regulations governing combustible waste.

#### 14. TRANSPORT INFORMATION

UN No. : 1268

#### 15. REGULATORY INFORMATION

Varning symbol : F+

Risk-phrase: Extremely Flammable(R12)

Safety-phrase: Keep out of reach of children(S2)

Reep away from sources of ignition-No Smoking (S16)

Do not breathe gas/fumes/vapour/spray(\$23)
Use only in well ventilated areas(\$51)

Pressurized container. Protect from sunlight and do not expose to temperatures exceeding 50%. Do not pierce or burn, even after use. Do not spray on a naked flame or any incandescent material.

(Continued on page 6)

## Technical Data Sheet PERMABOND ESP308, ESP309, and ESP310

#### PERMABOND ESP-SINGLE PART TOUGHENED EPOXY ADHESIVE

Permabond ESP toughened epoxies form a new class of adhesives. They combine the structural strength of standard epoxies with unparalleled peel, impact and cleavage resistance. Often metal deformation or metal failigue results before the adhesive fails These epoxics also have excellent annesion to a wide range of other illaterials.

Permabond ESP are pre-mixed and thus require less handling than two-component epoxies. They require a heat cure in the range of 300-400°F. Cure inrough large volumes can early be effected, thus making it also suitable for porting applications.

| Physical Properties                      | ESP308                | ESP309       | E6P310      |

#### 3. HAZARDS IDENTIFICATION

Emergency Overview:

Appearance: Clear, colorless liquid

Odor: Mild hydrocarbon

HMIS:

Health: 1

Flammability: 1 Reactivity: 0

**Protective Equipment:** X - See protective equipment, Section 8.

NFPA:

Health: 0

Flammability: 1 Reactivity: 0

Symbol: Not applicable Potential Health Effects:

Eve Contact: Causes mild irritation Skin Contact: Causes mild irritation Skin Absorption: No effects anticipated Target Organs: Not applicable

Ingestion: Very large doses may cause: central nervous system depression kidney damage rapid pulse and

respirations convulsions

Target Organs: None reported Inhalation: No effects anticipated Target Organs: Not applicable

Medical Conditions Aggravated: None reported

Chronic Effects: None reported

Cancer / Reproductive Toxicity Information:

This product does NOT contain any OSHA listed carcinogens.

This product does NOT contain any IARC listed chemicals.

This product does NOT contain any NTP listed chemicals.

Additional Cancer / Reproductive Toxicity Information: None reported Toxicologically Synergistic Products: None reported

#### 4. FIRST AID

Page 3
Date Printed 6/25/96
MSDS No: M00649

Eye Contact: Immediately flush eyes with water for 15 minutes. Call physician.

Skin Contact (First Aid): Wash skin with plenty of water. Call physician if irritation develops.

Ingestion (First Aid): Give large quantities of water. Call physician immediately.

Inhalation: Remove to fresh air.

#### 5. FIRE FIGHTING MEASURES

Flammable Properties: Can burn in fire, releasing toxic vapors.

Flash Point: >100° C (>212° F)

Method: Open cup Flammability Limits:

Lower Explosion Limits: 2.6% Upper Explosion Limits: 12.6%

Autoignition Temperature: 371° C (700° F)

Hazardous Combustion Products: Toxic fumes of: carbon monoxide, carbon dioxide.

Fire / Explosion Hazards: May react violently with: oxidizers

Extinguishing Media: Carbon dioxide Alcohol foam. Dry chemical. Water.

Fire Fighting Instruction: As in any fire, wear self-contained breathing apparatus pressure-demand and full

protective gear.

#### 6. ACCIDENTAL RELEASE MEASURES

#### Spill Response Notice:

Only persons properly qualified to respond to an emergency involving hazardous substances may respond to a spill according to federal regulations (OSHA 29 CFR 1910.120(a)(v)) and per your company's emergency response plan and guidelines/procedures. See Section 13, Special Instructions for disposal assistance.

Containment Technique: Absorb spilled liquid with non-reactive sorbent material. Dike large spills to keep spilled material from entering sewage and drainage systems or bodies of water.

Clean-up Technique: Absorb spilled liquid with non-reactive sorbent material. Sweep up material. Place material in a plastic bag. Mark bag 'Non-hazardous trash', and dispose of as normal refuse. Decontaminate the area of the spill with a soap solution.

Evacuation Procedure: Evacuate as needed to perform spill clean-up. If conditions warrant, increase the size of the evacuation.

Special Instructions (for accidental release): Not applicable

304 EHS RQ (40 CFR 355): Not applicable

D.O.T. Emergency Response Guide Number: None

#### 7. HANDLING / STORAGE

Handling: Avoid contact with eyes Wash thoroughly after handling. Maintain general industrial hygiene practices when using this product.

Storage: Protect from: heat Keep away from: oxidizers

Flammability Class: Class IIIB

#### 8. EXPOSURE CONTROLS / PROTECTIVE EQUIPMENT

Engineering Controls: Have an eyewash station nearby. Maintain general industrial hygiene practices when using this product.

Personal Protective Equipment:

Page 4
Date Printed 6/25/96
MSDS No: M00649

Eye Protection: safety glasses with top and side shields

Skin Protection: disposable latex gloves Inhalation Protection: adequate ventilation

Precautionary Measures: Avoid contact with: eyes Wash thoroughly after handling. Protect from: heat

Keep away from: oxidizers TLV: Not established PEL: Not established

#### 9. PHYSICAL / CHEMICAL PROPERTIES

Appearance: Clear, colorless liquid

Physical State: Liquid

Molecular Weight: Not applicable

Odor: Mild hydrocarbon

pH: 6.1

Vapor Pressure: Not determined

Vapor Density (air = 1): Not determined

Boiling Point: 188° C (370° F)

Melting Point: Not determined

Specific Gravity (water = 1): 1.032

Evaporation Rate (water = 1): 0.01

Volatile Organic Compounds Content: Not determined-Partition Coefficient (n-octanol/water): Not applicable

Solubility:

Water: Soluble
Acid: Soluble

Other: Not determined

Metal Corrosivity:

Steel: Not determined

Aluminum: Not determined

#### 10. STABILITY / REACTIVITY

Chemical Stability: Stable when stored under proper conditions.

Conditions to Avoid: Extreme temperatures

Reactivity / Incompatibility: May react violently in contact with: oxidizers

Hazardous Decomposition: Heating to decomposition releases toxic fumes of carbon monoxide and carbon

dioxide.

Hazardous Polymerization: Will not occur.

#### 11. TOXICOLOGICAL INFORMATION

Product Toxicological Data:

LD50: None reported

LC50: None reported

Dermal Toxicity Data: Propylene Glycol: rabbit LD50 = 20.8 g/kg

Skin and Eye Irritation Data: Propylene Glycol: Skin human 500 mg/7D - MILD; Eye rabbit 500 mg/24H -

MILD

Mutation Data: Propylene Glycol: Cytogenetic analysis, DNA inhibition mouse - subcutaneous - 8000 mg/kg

Page 5
Date Printed 6/25/96
MSDS No: M00649

Reproductive Effects Data: Propylene Glycol: Intraperitoneal mouse TDLo = 100 gm/kg -fetoxicity, post implantation mortality

Ingredient Toxicological Data: Propylene Glycol: Oral rat LD50 = 20 g/kg

#### 12. ECOLOGICAL INFORMATION

Product Ecological Information: --

No ecological data available for this product.

Ingredient Ecological Information: --

No ecological data available for the ingredients of this product.

#### 13. DISPOSAL CONSIDERATIONS

EPA Waste ID Number: None

Special Instructions (Disposal): Not applicable

Empty Containers: Rinse three times with an appropriate solvent. Dispose of empty container as normal trash. NOTICE (Disposal): These disposal guidelines are based on federal regulations and may be superseded by more stringent state or local requirements. Please consult your local environmental regulators for more information.

#### 1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

Product Name: Phenolphthalein Indicator Solution 5 g/l

Catalog Number: 162

Hach Company P.O.Box 389 Loveland, CO USA 80539 (970) 669-3050

(970) 669-3050

MSDS Number: M00223

Chemical Name: Not applicable

CAS No.: Not applicable
Chemical Formula: Not applicable
Chemical Family: Not applicable
Hazard: May cause irritation.
Date of MSDS Preparation:

Day: 05
Month: January
Year: 1994

Emergency Telephone Numbers: (Medical and Transportation) (303) 623-5716 24 Hour Service (515)232-2533 8am - 4pm CST

#### 2. COMPOSITION / INFORMATION ON INGREDIENTS

#### 2-(2-Ethoxyethoxy)ethanol

CAS No.: 111-90-0

ISCA CAS Number: 111-90-0

Percent Range: > 99.0

Percent Range Units: weight / weight LD50: Oral rat LD50 = 5500 mg/kg

LC50: None reported
TLV: Not established
PEL: Not established
Huzard: May cause irritation.

#### Phenolphthalein

CAS No.: 77-09-8

TSCA CAS Number: 77-09-8 Percent Range: 0.1 - 1.0

Percent Range Units: weight / volume

LD50: None reported LC50: None reported TLV: Not established PEL: Not established

Hazard: May cause irritation. May cause allergic reaction.

#### 3. HAZARDS IDENTIFICATION

Emergency Overview:

World Headquarters Hach Company P.O.Box 389 Loveland, CO USA 80539 (970) 669-3050 Page 2
Date Printed 6/25/96
MSDS No: M00223

Appearance: Colorless liquid

Odor: Bland

MAY CAUSE EYE AND RESPIRATORY TRACT IRRITATION

HMIS:

Health: 1

Flammability: 1

Reactivity: 0

Protective Equipment: X - Sec protective equipment, Section 8.

NFPA:

Heulth: 1

Flammability: 1

Reactivity: 0

Symbol: Not applicable

Potential Health Effects:

Eye Contact: Causes moderate irritation

Skin Contact: Causes mild irritation, Skin Absorption: None Reported

Target Organs: None Reported

Ingestion: May cause: drunkenness incoordination dizziness drowsiness headache nausea confusion

Target Organs: Central nervous system

Inhalation: May cause: respiratory tract irritation

Target Organs: None reported

Medical Conditions Aggravated: None reported

Chronic Effects: Nonc reported

Cancer / Reproductive Toxicity Information:

This product does NOT contain any OSHA listed carcinogens.

This product does NOT contain any IARC listed chemicals.

This product does NOT contain any NTP listed chemicals.

Additional Cancer / Reproductive Toxicity Information: None reported Toxicologically Synergistic Products: None reported

#### 4. FIRST AID

Eye Contact: Immediately flush eyes with water for 15 minutes. Call physician.

Skin Contact (First Aid): Wash skin with plenty of water. Call physician if irritation develops.

Ingestion (First Aid): Give large quantities of water. Call physician immediately,

Inhalation: Remove to fresh air.

#### 5. FIRE FIGHTING MEASURES

Flammable Properties: Can burn in fire, releasing toxic vapors.

Flash Point: 99°C; 210°F

Method: Closed cup

Flammability Limits:

Lower Explosion Limits: 1.2% @ 135°C, 275°F Upper Explosion Limits: 23.5% @ 182°C, 360°F World Headquarters Hach Company P.O.Box 389 Loveland, CO USA 80539

(970) 669-3050

Page 3
Date Printed 6/25/96
MSDS No: M00223

Autoignition Temperature: Not available

THE UI. AT PMA STO AND STAU

Hazardous Combustion Products: Toxic fumes of: carbon monoxide, carbon dioxide.

Fire / Explosion Hazards: None reported

Extinguishing Media: Dry chemical, Carbon dioxide Alcohol foam.

Fire Fighting Instruction: As in any fire, wear self-contained breathing apparatus pressure-demand and full

protective gear.

#### 6. ACCIDENTAL RELEASE MEASURES

Spill Response Notice:

Only persons properly qualified to respond to an emergency involving hazardous substances may respond to a spill according to federal regulations (OSHA 29 CFR 1910.120(a)(v)) and per your company's emergency response plan and guidelines/procedures. See Section 13, Special Instructions for disposal assistance. Containment Technique: Releases of this material may contaminate the environment. Remove all combustible material from spill area. Remove all ignition and spark-creating sources from the spill area. Cover spilled liquid with a commercially available flammable liquid sorbent such as vapor barrier blanket or activated carbon to avoid evolution of fumes. Vapors may travel to a source of ignition and flash back. May be ignited by heat, sparks, or flames. Dike the material to create a barrier to combustibles.

Clean-up Technique: Eliminate all sources of ignition. Do not breathe the fumes. Cover with an inert material, such as sand. Use only non-sparking tools. Sweep up material. Incinerate material at an E.P.A. approved hazardous waste facility. Decontaminate the area of the spill with a soap solution.

Evacuation Procedure: Evacuate as needed to perform spill clean-up. If conditions warrant, increase the size of the evacuation.

Special Instructions (for accidental release): Not applicable

304 EHS RQ (40 CFR 355): Not applicable

D.O.T. Emergency Response Guide Number: None

#### 7. HANDLING / STORAGE

Handling: Avoid contact with eyes skin clothing Do not breathe mist or vapors. Wash thoroughly after handling. Maintain general industrial hygiene practices when using this product.

Storage: Protect from: sparks, flames and other ignition sources

Flammability Class: Class IIIB

#### 8. EXPOSURE CONTROLS / PROTECTIVE EQUIPMENT

Engineering Controls: Have an eyewash station nearby. Maintain general industrial hygiene practices when using this product.

Personal Protective Equipment:

Eye Protection: chemical splash goggles

Skin Protection: disposable latex gloves lab coat

Inhalation Protection: adequate ventilation

Precautionary Measures: Avoid contact with: eyes skin clothing Do not breathe: mist/vapor Wash

thoroughly after handling. Protect from: hear

TLV: Not established PEL: Not established

V. SPILL OR LEAK AND DISPOSAL PROCEDURES

Steps to be taken in case of spill or leak:

Maintain good ventilation. The interpretation source soak up remainder in an inelle an order in a closed container until disposal.

Recommended methods of disposal:

Incinerate following EPA and local regulations.

VI. STORAGE AND HANDLING PROCEDURES

Storage:

Store below 120-F in a tightly closed container away from oxidizing materials and sources of ignition.

Hardling:

Keep away from flame. Avoid prolonged of vapors. Avoid skin or eye contact. Avoid prolonged breathin

#### SPILL OR LEAK AND DISPOSAL PROCEDURES

Steps to be taken in case of spill or leak:

Recommended methods rf disposal:

Avoid flame and sparks. Maintain adequate ventilation. Soak up in an inert absorbent and store in a closed container until disposal.

Method:

Incinerate following EPA and local regulations.

IX. EMERGENCY TREATMENT PROCEDURES

Ingestion:

Do not induce vomiting. Keep individual calm. Obtain medical attention. Remove to fresh air. If symptoms persist, obtain

Inhalation:

Skin Contact: Eye Contact:

medical attention.
Wash with soap and water.
Flush with water for at least 15 minutes.

medical attention.

PERSONAL PROTECTION

Eyes: Skin:

Ventilation:

Safety glasses or goggles. Rubber or plastic gloves. Sufficient to maintain vapor concentration

below TLV.

XI. HEALTH HAZARD DATA

Toxicity:

Possible eye and respiratory irritant.
Narcotic at high concentrations.
Prolonged inhalation may cause headaches.
Moderately toxic by ingestion
Liquid may defat skin.

Primary Routes of Entry:
igns and Symptoms
f Exposure: Inhalation, ingestion, contact.

Vapors irritate eyes, nose and throat. Liquid is an eye irritant and may irritate skin.

Existing Conditions Aggravated by Exposure:

None known

SECTION IV FIRST AID MEASURES

Ingestion : Ingestion is not likely. See supplemental page for emergency procedures. Inhalation : Remove to fresh air. If symptoms persist, obtain medical attention. Skin Contact: Soak in warm water. See supplemental page for emergency procedures. Eye Contact : See supplemental page for emergency procedures. Obtain medical attention.

SECTION V - FIRE FIGHTING MEASURES

Flash Point : Approximately 185 deg F Method: Tag Closed Cup

Recommended

Extinguishing Agents : Carbon dioxide, foam, dry chemical

Special Firefighting

Procedures : Not available

Hazardous Products Formed

by Fire or Thermal Decomp: Irritating organic vapors.

Unusual Fire or Explosion

Hazards : None

Explosive Limits

(% by volume in air) Lower : Not available (% by volume in air) Upper : Not available

SECTION VI - ACCIDENTAL RELEASE MEASURES

Steps to be taken in case

of spill or leak : Flood with water to polymerize. Soak up with an

inert absorbent.

SECTION VII - HANDLING AND STORAGE

Safe Storage : Store at or below 75 deg F

(Contact Loctite Customer Service 1-800-243-4874 for shelf Life information) Handling : Avoid contact with skin and eyes. Avoid breathing vapor.

SECTION VIII - EXPOSURE CONTROLS, PERSONAL PROTECTION

Eyes : Safety glasses or goggles.

Skin : Nitrile or polyethylene gloves and aprons. Do not use cotton.

See supplemental page for additional information.

Ventilation: Local ventilation may be desirable when using large amounts

in a confined area.

See Section 2 for Exposure Limits.

SECTION IX - PHYSICAL AND CHEMICAL PROPERTIES

Appearance : Water white to straw colored liquid.

Odor : Negligible

Boiling Point : More than 300 deg F
pH : Does Not Apply
Solubility in Water : Polymerized by water

Specific Gravity : 1.1

Volatile Organic Compound

(EPA Method 24) : 65.0%; 715 grams per liter

Vapor Pressure : Less than 0.02 mm
Vapor Density : Not available
Evaporation Rate (Ether = 1) : Not available

SECTION X - STABILITY AND REACTIVITY

56479/MOREY CORP. /L0C46040 Stability : Stable Hazardous Polymerization: Will not occur. Incompatibility : Polymerized by contact with water, alcohols, amines, alkalies. Hazardous Decomposition Products (non-thermal) : None SECTION XI - TOXICOLOGICAL INFORMATION See Section III SECTION XII - ECOLOGICAL INFORMATION No data available \_ SECTION XIII - DISPOSAL CONSIDERATIONS Recommended methods of : Polymerize as above. SECTION XIII - SUPPLEMENT

INFORMATION FOR FIRST AID AND CASUALTY TREATMENT FOR ADHESION OF HUMAN SKIN TO ITSELF IF CAUSED BY CYANOACRYLATE ADHESIVES

Cyanoacrylate adhesive is a very fast setting and strong adhesive. It bonds human tissue including skin in seconds. Experience has shown that accidents due to cyanoacrylates are handled best by passive, nonsurgical first aid. Treatment of specific types of accidents are given below. SKIN CONTACT

Remove excess adhesive. Soak in warm, soapy water. The adhesive will come loose from the skin in several hours. Cured adhesive does not present health hazard even when bonded to the skin.

Avoid contact with clothes, fabrics, rags or tissue. Contact with these materials may cause polymerization. The polymerization of large amounts of adhesive will generate heat causing smoke, skin burns, and strong, irritating vapors. Wear nitrile or polyethylene gloves and apron when handling large amounts of adhesive.

#### SKIN ADHESION

First immerse the bonded surfaces in warm, soapy water. Peel or roll the surfaces apart with the aid of a blunt edge, e.g., a spatula or a teaspoon handle; then remove adhesive from the skin with sooap and water. Do not try to pull surfaces apart with a direct opposing action. EYELID TO EYELID OR EYEBALL ADHESION

In the event that eyelids are stuck together or bonded to the eyeball, wash thoroughly with warm water and apply a gauze patch. The eye will open without further action, typically in 1-4 days. There will be no residual damage. Do not try to open the eyes by manipulation.

#### ADHESIVE ON THE EYEBALL

Cyanoacrylate introduced into the eyes will attach itself to the eye protein and will disassociate from it over intermittent periods, generally covering several hours. This will cause periods of weeping until clearance is acheived. During the period of contamination, double vision may be experienced together with a lachrymatory effect, and it is important to understand the cause and realize that disassociation will normally occur within a matter of hours, even with gross contamination.

#### MOUTH

If lips are accidentally stuck together, apply lots of warm water to the lips and encourage maximum wetting and pressure from saliva inside the mouth. Peel or roll lips apart. Do not try to pull the lips with direct opposing action.

It is almost impossible to swallow cyanoacrylate. The adhesive solidifies and adheres in the mouth. Saliva will lift the adhesive in one half to two days. In case a lump forms in the mouth, position the patient to prevent ingestion of the lump when it detaches.

#### BURNS

Cyanoacrylates give off heat on solidification. In rare cases a large drop will increase in temperature enough to cause a burn. Burns should be treated normally after the lump of cyanoacrylate is released from the tissue as described above.

#### SURGERY

It should never be necessary to use such a drastic method to separate accidentally bonded skin.

MATERIAL SAFETY DATA SHEET INFORMATION:

PLEASE FIND ENCLOSED MATERIAL SAFETY DATA SHEETS (MSDS) COVERING ITEMS PURCHASED FROM ELECTRICAL INSULATION SUPPLIERS (EIS). OSHA REGULATIONS REQUIRE MSDS INFORMATION BE MADE AVAILABLE TO ALL PERSONNEL WHO MAY BE EXPOSED TO HAZARDOUS MATERIALS IN THE WORK PLACE.

UNDER THE "EMERGENCY PLANNING COMMUNITY RIGHT-TO-KNOW ACT OF 1986" INVENTORY AND LOCATION INFORMATION, CONCERNING HAZARDOUS MATERIALS MFG JOB SITE, MAY NEED TO BE REPORTED TO THE LOCAL FIRE DEPARTMENT, THE LOCAL EMERGENCY PLANNING COMMITTEE AND THE STANDARD RESPONSE COMMISSION. YOU MAY WANT TO REFERENCE 40 CFR PART 372 FOR ADDITIONAL INFORMATION. MANUFACTURERS MUST REPORT ANNUAL RELEASES OF LISTED TOXIC CHEMICALS INTO THE ENVIRONMENT, ACCORDING TO SARA TITLE III.

ACCORDING TO 29 CFR PART 1910.1200 PARAGRAPH (g)(6) OF THE HAZARD COMMUNICATION STANDARD, A MSDS IS TO BE PROVIDED THE FIRST TIME THE CUSTOMER BUYS AN ITEM REQUIRING A MSDS. IF AT ANY TIME THE MSDS IS UPDATED OR CHANGED, THE UPDATED MSDS MUST BE SUPPLIED WITH THE FIRST SHIPMENT AFTER THE MSDS UPDATE HAS OCCURRED.

IF YOU NEED FURTHER INFORMATION CONCERNING YOUR SITUATION, YOU MAY CONTACT THE EPA IN WASHINGTON, D.C. THEIR TOLL FREE NO. IS (800)535-0202; THE RCRA/SUPERFUND HOT LINE IS (800)424-9346 OR (703)920-9810; THE TSCA HOT LINE IS (202)554-1404.

BY PROVIDING THIS DOCUMENTATION, EIS IS COMPLYING WITH FEDERAL LAWS GOVERNING MSDS INFORMATION, AS IS KNOWN TO US. THIS IS A SERVICE AIMED AT HELPING YOUR BUSINESS TO ALSO COMPLY WITH GOVERNMENT REGULATIONS.

HEALTH INFORMATION

EYE CONTACT

PRODUCT IS PRESUNED TO BE NODERATELY IRRITATING TO THE EYES. PRODUCT VAPORS AND/OR WISTS MAY ALSO BE IRRITATING TO THE EYES.

BASED ON THE PRESENCE OF COMPONENTS 3 AND 7 PRODUCT IS PRESUMED TO BE MODERATELY IRRITATING TO THE SKIN. PROLONGED CONTACT MAY CAUSE DAMAGE TO THE SKIN. BASED ON THE PRESENCE OF COMPONENT 9 ABSORPTION THROUGH THE SKIN MAY RESULT IN SYMPTOMS OF EXPOSURE AS THOSE DESCRIBED FOR INHALATION AND INGESTION. PROLONGED OR REPEATED CONTACT MAY RESULT IN DEFATTING AND DRYING OF THE SKIN WHICH MAY RESULT IN DERNATITIS. BASED ON THE PRESENCE OF COMPONENTS 3 AND 7 CONTACT MAY RESULT IN A PRONOUNCED PHOTOSENSITIZATION EFFECT.

#### THEAL ATTOM

EXPOSURE MAY PRODUCE IRRITATION TO THE MOSE. THROAT, RESPIRATORY TRACT, AND OTHER MUCOUS MEMBRANES, EXPOSURE TO HIGH CONCENTRATIONS OF VAPOR MAY PRODUCE CENTRAL NERVOUS SYSTEM DEPRESSION. REPORTS HAVE ASSOCIATED REPEATED AND PROLONGED OCCUPATIONAL OVEREXPOSURE TO SOLVENTS WITH PERMANENT BRAIN AND MERVOUS SYSTEM DAMAGE. INTENTIONAL MISUSE BY DELIBERATELY CONCENTRATING AND INHALING THE CONTENTS MAY BE HARMFUL OR FATAL.

MODERATELY TOXIC. SMALL AMOUNTS OF THE LIQUID ASPIRATED INTO THE LUNGS DURING INGESTION OR FROM VOMITING MAY RESULT IN SEVERE LUNG DAMAGE. INGESTION MAY CAUSE CENTRAL NERVOUS SYSTEM DEPRESSION.

#### SIGNS AND SYMPTOMS

SYMPTOMS OF EYE IRRITATION INCLUDE PAIN. TEARING. REDDENING AND SYELLING. SYMPTOMS OF SKIN IRRITATION INCLUDE REDDENING. SYELLING. RASH AND REDNESS. SYMPTOMS OF RESPIRATORY IRRITATION INCLUDE RUNNY MOSE, SORE THROAT, COUGHING, CHEST DISCOMFORT, SHORTNESS OF BREATH AND REDUCED LUNG FUNCTION. SYMPTOMS OF GASTROINTESTIONAL IRRITATION INCLUDE SORE THROAT, ABDOMINAL PAIN, NAUSEA, VOMITING AND DIARRHEA, CENTRAL NERVOUS SYSTEM DEPRESSION HAY BE EVIDENCED BY HEADACHE, DIZZINESS, NAUSEA AND SYMPTONS OF INTOXICATION: IN EXTREME CASES, UNCONSCIOUSNESS AND DEATH WAY OCCUR. SYMPTOMS OF CHRONIC OVEREXPOSURE INCLUDE LOSS OF MEMORY, LOSS OF INTELLECTUAL ABILITY AND LOSS OF COORDINATION.

#### AGGRAVATED MEDICAL CONDITIONS

PREEXISTING SKIN. EYE AND RESPIRATORY DISORDERS HAY BE AGGRAVATED BY EXPOSURE TO THIS PRODUCT. IMPAIRED CENTRAL NERVOUS SYSTEM FUNCTIONS FROM PREEXISTING DISORDERS MAY BE AGGRAVATED BY EXPOSURE TO THIS PRODUCT.

#### OTHER HEALTH EFFECTS

BASED ON THE PRESENCE OF COMPONENT 9 CHRONIC OVEREXPOSURE MAY CAUSE INJURY TO THE KIDNEYS AND LIVER. BASED ON THE PRESENCE OF COMPONENT 5 CHRONIC OVEREXPOSURE TO TIO2 DUST HAY CAUSE SLIGHT LUNG FIBROSIS. BASED ON THE PRESENCE OF COMPONENT 2 CHRONIC OVEREXPOSURE TO PRODUCT DUST WAY PRODUCE A BENIGN PNEUMOCONIOSIS TERMED 'SIDEROSIS'.

SECTION V

EMERGENCY AND FIRST AID PROCEDURES

EYE CONTACT

INNEDIATELY FLUSH EYES WITH COPIOUS ANOUNTS OF WATER FOR AT LEAST 15 NINUTES HOLDING EYELIDS OPEN, SEEK PROMPT MEDICAL ATTENTION.

#### SKIN CONTACT

REMOVE CONTAMINATED CLOTHING AND SHOES. WIPE EXCESS FROM SKIN AND FLUSH WITH WATER USING SOAP IF AVAILABLE. SEEK MEDICAL ATTENTION IF IRRITATION OCCURS. DO NOT REUSE CLOTHING UNTIL THOROUGHLY DECONTANINATED.

#### INHALATION

REMOVE VICTIM TO FRESH AIR AND TREAT SYMPTOMATICALLY. PROVIDE DRYGEN IF BREATHING IS DIFFICULT. GIVE ARTIFICIAL RESPIRATION IF THE VICTIM IS NOT BREATHING. SEEK PROMPT MEDICAL ATTENTION.

#### INGESTION

DO NOT INDUCE VONITING. IF VONITING SPONTANEOUSLY OCCURS. KEEP THE VICTIM'S HEAD BELOW THE HIPS TO PREVENT ASPIRATION INTO THE LUNGS. SINCE ASPIRATION INTO THE LUNGS CAN CAUSE VERY SERIOUS, PERMANENT DAMAGE. THE DECISION OF WHETHER TO INDUCE VONITING OR NOT SHOULD BE MADE BY A PHYSICIAN. DANGER FROM LUNG ASPIRATION MUST BE WEIGHED AGAINST TOXICITY WHEN CONSIDERING EMPTYING THE STOMACH. CONSULT A PHYSICIAN. HOSPITAL OR POISON CONTROL CENTER AND/OR TRANSPORT TO AN EMERGENCY FACILITY IMMEDIATELY.

>> COMPONENTS 1, 3, 4, 6, 7, 8 AND 9 MAY CAUSE SEVERE, PERMANENT DAMAGE IF ASPIRATED AND VOKITING SHOULD NOT BE INDUCED.

ADDITIONAL PRECAUTIONS

KEEP LIQUID AND VAPOR AWAY FROM HEAT. SPARKS. AND FLAME. EXTINGUISH PILOT LIGHTS. CIGARETTES AND TURN OFF OTHER POSSIBLE SOURCES OF IGNITION PRIOR TO USE AND UNTIL VAPORS ARE GONE. SURFACES THAT ARE SUFFICIENTLY HOT MAY IGNITE PRODUCT IN THE ABSENCE OF SPARKS OR FLAME. VAPORS MAY ACCUMULATE AND TRAVEL TO IGNITION SOURCES DISTANT FROM HANDLING SITE. KEEP CONTAINERS CLOSED WHEN NOT IN USE. USE WITH ADEQUATE VENTILATION, CONTAINERS, EVEN IF EMPTY. CAN CONTAIN EXPLOSIVE VAPORS, DO NOT CUI, DRILL, CRIND, OR WELD NEAR CONTAINERS.

CONTAINERS CAN CONTAIN HAZARDOUS PRODUCT RESIDUES EVEN WHEN EMPTY. WASH WITH SOAP AND WATER BEFORE EATING, DRINKING, SHOKING, OR USING TOILET FACILITIES.

THE INFORMATION CONTAINED HEREIN IS BASED ON THE DATA AVAILABLE TO US AND IS BELIEVED TO BE CORRECT, HOWEVER, VE MAKE NO VARRANTY. EXPRESSED OR IMPLIED. REGARDING THE ACCURACY OF THIS DATA OR THE RESULTS TO BE OBTAINED FROM THE USE THEREOF. WE ASSUME NO RESPONSIBILITY FOR INJURY FROM THE USE OF THE PRODUCT DESCRIBED HEREIN.

FLANNABLE LIQUID - CLASS IB

PAINT

FLASH POINT : 50 degrees F. (Theoretical)

UN1263 PGII

EXTINGUISHING MEDIA

USE WATER FOG. FOAM, DRY CHENICAL OR CARBON DIOXIDE.

SPECIAL FIRE FIGHTING PROCEDURES AND PRECAUTIONS

MARNING, FLAMMABLE, CLEAR FIRE AREA OF UNPROTECTED PERSONNEL. DO NOT ENTER CONFINED FIRE SPACE WITHOUT HELMET, FACE SHIELD, BUNKER COAT. GLOVES, RUBBER BOOTS, AND A POSITIVE PRESSURE NIOSH-APPROVED SELF-CONTAINED BREATHING APPARATUS.

UNUSUAL FIRE AND EXPLOSION HAZARDS

CONTAINERS EXPOSED TO INTENSE HEAT FROM FIRES SHOULD BE COOLED WITH WATER TO PREVENT VAPOR PRESSURE BUILDUP WHICH COULD RESULT IN CONTAINER RUPTURE, CONTAINER AREAS EXPOSED TO DIRECT FLAXE CONTACT SHOULD BE COOLED WITH LARGE QUANTITIES OF WATER AS WEEDED TO PREVENT WEAKENING OF CONTAINER STRUCTURE.

SECTION VII

REACTIVITY

STABILITY : STABLE

HAZARDOUS POLYMERIZATION: WILL NOT OCCUR

CONDITIONS AND MATERIALS TO AVOID

AVOID OXIDIZING MATERIALS. BASED ON THE PRESENCE OF COMPONENT 9 AVOID HIGH TEMPERATURES.

HAZARDOUS DECOMPOSITION PRODUCTS

IRRITATING ALDEHYDES AND KETONES. CARBON DIOXIDE. CARBON HONOXIDE. AND UNIDENTIFIED ORGANIC COMPOUNDS MAY BE FORMED DURING COMBUSTION.

SECTION VIII

EMPLOYEE PROTECTION

RESPIRATORY PROTECTION

USE VENTILATION AS REQUIRED TO CONTROL VAPOR. MIST. AND/OR DUST CONCENTRATIONS - AT LEAST 10 AIR CHANGES PER HOUR ARE RECOMMENDED FOR GOOD GENERAL ROOM VENTILATION. IF EXPOSURE EXCEEDS THE PEL/TLV. USE THE APPROPRIATE NIGSH-APPROVED RESPIRATOR.

PROTECTIVE CLOTHING

WEAR SAFETY GLASSES, GOGGLES, OR A SPLASH SHIELD TO PREVENT EYE CONTACT, CONTACT LENSES SHOULD NOT BE WORN. WEAR APPROPRIATE GLOVES AND PROTECTIVE CLOTHING TO PREVENT CONTACT WITH SKIN AND CLOTHING.

ADDITIONAL PROTECTIVE MEASURES

EYE WASH FOUNTAINS AND SAFETY SHOWERS SHOULD BE AVAILABLE FOR USE IN AN EMERGENCY.

SECTION IX

ENVIRONMENTAL PROTECTION

SPILL OR LEAK PROCEDURES

LARGE SPILLS >> EVACUATE THE HAZARD AREA OF UNPROTECTED PERSONNEL. WEAR APPROPRIATE RESPIRATOR AND PROTECTIVE CLOTHING. SHUT OFF SOURCE OF LEAK ONLY IF SAFE TO DO SO. DIKE AND CONTAIN. IF VAPOR CLOUD FORMS. WATER FOG MAY BE USED TO SUPPRESS; CONTAIN RUN-OFF. REMOVE WITH VACUUM TRUCKS OR PUMP TO STORAGE/SALVAGE VESSELS. SOAK UP RESIDUE WITH AN ABSORBENT SUCH AS CLAY. SAND OR OTHER SUITABLE MATERIAL: PLACE IN NON-LEAKING CONTAINERS FOR PROPER DISPOSAL. FLUSH AREA WITH WATER TO REMOVE TRACE RESIDUE: DISPOSE OF FLUSH SOLUTIONS AS ABOVE. SHALL SPILLS >> TAKE UP WITH AN ABSORBENT MATERIAL AND PLACE IN NON LEAKING CONTAINERS.

VASTE DISPOSAL

OBSERVE ALL FEDERAL. STATE. AND LOCAL REGULATIONS REGARDING PROPER DISPOSAL.

EMERGENCY OVERVIEW: May cause target organ or system damage. Refer to chronic health effects section. Contents may develop pressure if exposed to water. At elevated temperatures may cause irritation of the eyes and respiratory tract. May cause allergic skin reaction. May cause allergic respiratory reaction. May cause skin and eye irritation.

SECTION 3 - HAZARDS IDENTIFICATION

ACUTI EFFECTS - EYE CONTACT: Moderately irritating to the eyes.

ACUTE EFFECTS - SKIN CONTACT: Moderate irritant. Prolonged contact may cause dermatitis.

ACUTE EFFECTS - INHALATION: Liquid particles breathed into the lungs may cause injury to the lungs, liver, or kidneys. Vapors and/or aerosols which may be formed at elevated temperatures may be irritating. Causes respiratory tract irritation. Strong respiratory sensitizer.

ACUTE EFFECTS - INGESTION: Irritating to mouth, throat and stomach, with nouses.

CHRONIC CVEREXPOSURE EFFECTS: "Chronic overexposure to isocyanate may cause respiratory sensitization which may cause future reactions even at levels below the TLV. Reaction may be immediate or delayed up to several hours after exposure. Additionally, there are reports that sensitized individuals can experience symptoms when exposed to dust, cold air, or other irritants. Such sensitization and/or increased lung sensitivity may be temporary or permanent. Usermal/respiratory cross-sansitization reactions are possible.

THE MUKEY CURP.

Product: 00142 Preparation Date: 03/19/97 SECTION 3 - HAZARDS IDENTIFICATION OTHER INFORMATION: Not Applicable. PRIMARY ROUTE (5) OF ENTRY: SKIN CONTACT, INHALATION, MYE CONTACT, SECTION 4 - FIRST ATD MEASURES EYE CONTACT: Immediately flush eyes with plenty of water for at least 15 minutes. Get immediate medical attention. SKIN CONTACT: Immediately flush affected area(s) thoroughly with water at least 15 minutes. Remove and wash contaminated clothing. Contaminated leather articles should be disposed of. Obtain medical attention. INMALATION: Remove to fresh air. If not broathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical INGESTION: Swallowing less than an ounce will not cause significant harm. For larger amounts, do not induce vomiting, but give one or two glasses of water to drink and get medical attention. NOTES TO PHYSICIAN: The manifestations of respiratory symptoms, including pulmonary adama, resulting from acute overexposure may be delayed. specific antidote. Supportive care. Treat symptomatically. SECTION 5 - FIRE FIGHTING MEASURES FLASH POINT: 300 F LOWER EXPLOSIVE LIMIT: N.A. (TAGLIABUE CLOSED CUP) UPPER EXPLOSIVE LIMIT: N.A. AUTOIGNITION TEMPERATURE: No data EXTINGUISHING MEDIA: CO2, DRY CHEMICAL, FOAM, WATER FO3. UNUSUAL FIRE AND EXPLOSION HAZARDS: Closed containers may rupture or explode (due to pressure build-up) when exposed to extreme heat. Irritating and/or toxic gases or fumes may be generated by thermal decomposition or combustion. SPECIAL FIREFIGHTING PROCEDURES: Use NIOSH-approved self-contained breathing apparatus and full protective clothing. Use water to cool exposed containers. Water stream directed into fire may cause frothing with subsequent spread of flame. SECTION  $\epsilon$  - ACCIDENTAL RELEASE MEASURES ====

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: meterial in waste container with neutralizing solution of 90% water, 8% concentrated ammonia, and 7% detergent. Add about 10 parts neutralizer one part of isocyanate, with making. Allow to stand uncovered for 40 hours. Rinse floor with same solution as above, letting the solution remain on the contaminated area for at least 15 minutes before removal. Add about 10 parts neutralizer per

#### SECTION 7 - HANDLING AND STORAGE

HANDIANG: Use only in a well ventilated area. Follow all MSDS/label precautions even after container is emptied because it may retain product residues. Avoid breathing vapors from heated material. Avoid contact with eyes, skip, and clothing. DO NOT take internally. FOR INDUSTRIAL USE ONLY.

 Preparation Date: 03/19/97
 Page 3
 SECTION 5 - FIRE FIGHTING MEASURES
 |----
STORAGE: Store away from heat. Store in a tightly closed container.
 Purge container with nitrogen before resealing. Keep dry.
 SECTION 9 - EXPOSURE CONTROLS/PTRAGNAL PROTECTION
ENCINEERING CONTROLS: No special ventilation normally required. Local
exhaust as needed to control vapor or dust levels to below lowest component
RESPIRATORY PROTECTION:
 If use is performed in a poorly-ventulated space,
if vapor levels exceed TLV/PEL, or it effects occur, use NIOSH-approved
positive-pressure supplied-air respirator in accordance with applicable
health and safety regulations and manufacturer's recommendations.
BKIN PROTECTION: Clean Clothing to cover skin.
 Saranex gloves. Butvl
rubber cloves. Nitrile gloves. Supported PVA gloves. EYE PROTECTION: Chemical splash goggles.
OTHER PROTECTIVE EQUITYMENT: Accessible eye wash and safety shower.

 SECTION & - EXPOSURE CONTROLS/PERSONAL PROTECTION
HYGIENIC PRACTICES: Follow good general industrial safety practices during
use. Do not smoke or eat during use. Wash after handling. Use only with
adaquate Vennilation. DO NOT reuse empty containers without commercial clean or recondition. Follow all MSDS/label preceditions even after
container is emptied.

 SECTION 9 - PHYSICAL AND CHEMICAL PROPERTIES
BOILING RANGE
 : 381 - 381 F
 VAPOR DENSITY
 : Is heavier than air
 : Mild musty
ODOR
 ODOR THRESHOLD
 : No data
AFPEARANCE
 EVAPORATION RATE: Is slower than Bury).
 : Brown
SCLUBILITY IN H20 : Reacts with water
 Acetate
 SPECIFIC GRAVITY: 1.2392
FREEZE POINT
 : No data
VAPOR PRESSURE
 : Very low
 pH @ 0.0 &
 : N/A
PHYSICAL STATE
 : Liquid
 VISCOSITY
 : Low
COEFFICIENT OF WATER/OIL DISTRIBUTION: No data
 (See Section 16 for abbreviation legend)
 SECTION 10 - STABILITY AND REACTIVITY
CONDITIONS TO AVOID: Prolonged exposure to heat. Exposure to moisture. INCOMPATIBILITY: Strong Lewis or mineral acids. Strong bases or oxidants.
Metals. Surface-sctive compounds, water. Alcohols. Amines.
HAZARDOUS DECOMPOSITION PRODUCTS: Oxides of darbon. mxides of nitrogen,
ammonia. Toxic monomers. Traces of hydrogen cyanide in oxygen-deficient
environments.
HAZARDOUS POLYMERIZATION: Will, not occur under normal conditions.
STABILITY: This product is stable under normal storage conditions.
 SECTION 11 - TOXTCOLOGICAL PROPERTIES
No product or component toxicological information is available.
 SECTION 12 - ECOLOGICAL INFORMATION
ECOLOGICAL TEST DATA: Not Applicable.

SECTION 3 - HAZARDS IDENTIFICATION

INGESTION: If swallowed, do NOT induce vomiting. Give victim a glass of water or milk. Call a physician or poison control center immediately. Never give anything by mouth to an unconscious person.

NOTES TO PHYSICIAN: Not Applicable.

SECTION 5 - FIRE FIGHTING MEASURES

FLASH POTNT: 350 F

LOWER EXPLOSIVE TIMET: N.A.

(TARTITABUE CLOSED CUP)

UPPER EXPLOSIVE LIMIT: N.A.

AUTHORITION TEMPERATURE: No data

EXTINGUISHING MEDIA: ALCOHOL FOAM, CO2, DRY CHEMICAL, FOAM, WATER FOG

UNUSUAL FIRE AND EXPLOSION HAZARDJ: Closed containers may rupture or explode (due to pressure build-up) when exposed to extreme heat. Irritating and/or toxic gases or fumes may be generated by thermal decomposition or combustion.

SPECIAL FIREFIGHTING PROCEDURES: Use NTOSH-approved self-contained breathing apparatus and full protective Clothing. Use water to cool exposed containers. Water stream directed into fire may cause frothing with subsequent spread of flame.

SECTION 6 - ACCIDENTAL RELEASE MEASURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: Reclaim elean material. Contaminated material should be swept or showeled into appropriate waste container and disposed of in accordance with applicable federal, state and local regulations.

SECTION 7 - HANDLING AND STORAGE

HANDLING: Wash hands before eating. Avoid prolonged or repeated contact with SXID. DO NOT take internally. FOR INDUSTRIAL USE ONLY.

STORAGE: Store away from heat. KEEP OUT OF THE REACH OF CHILDREN.

SECTION 8 - EXPOSURE CONTROLS/PERSONAL PROTECTION

ENGINEERING CONTROLS: Conoral ventilation usually adequate.

RESPIRATORY PROTECTION: None normally required under general Ventilation. If exposure levels are unknown, if levels exceed TLV/PEL or if effects occur, use NIOSE-approved dust/mist respirator in accordance with applicable health and safety regulations and manufacturer's recommendations.

SKIN PROTECTION: Clean clothing to cover skin. Cleth or synthetic gloves. HYE PROTECTION: Safety glasses. OTHER PROTECTIVE EQUIPMENT: Accessible eye wash and safety shower.

HYGIENIC PRACTICES: Follow general industrial safety practices during use. DO NOT reuse empty containers without commercial Clean or recondition. Follow all MSDS/label precautions even after container is amptied.

#### HAZARDS IDENTIFICATION . 3.

**EMERGENCY OVERVIEW:** 

White Solid

Vinegar odor

Avoid contact with eyes.

May irritate the skin.

Uncured product contact irritates eyes.

Refer to other MSDS sections for detailed information.

POTENTIAL HEALTH EFFECTS:

INGESTION:

May be harmful if swallowed.

SKIN CONTACT:

Uncured product contact will irritate lips, gums and tongue.

Uncured product contact may irritate the skin.

INHALATION:

## .LICUNE RUBBER SEALANT

Causes irritation of the mouth, nose, and throat.

Applies only in uncured state.

EYE CONTACT:

Uncured product contact irritates eyes.

MEDICAL CONDITIONS AGGRAVATED:

None known.

SUBCHRONIC (TARGET ORGAN) EFFECTS:

None known.

CHRONIC EFFECTS/CARCINOGENICITY:

This product or one of its ingredients present 0.1% or more is NOT listed as a carcinogen or suspected carcinogen by NTP, IARC, or OSHA.

PRODUCTS/INGREDIENTS

This space reserved for special use.

PRINCIPLE ROUTES OF EXPOSURE:

Dermal - skin.

Eyes.

Inhalation.

OTHER:

Acetic acid released during curing.

This product contains Methylpolysiloxanes which can generate Formaldehyde at approximately 300 degrees farenheit (150°C) and above, in atomospheres which contain oxygen. Formaldehyde is a skin and respiratory sensitizer, eye and throat irritant, acute toxicant, and potential cancer hazard. An MSDS for Formaldehyde is available from GE Silicones.

#### 4. FIRST AID MEASURES

INGESTION:

Rinse mouth with water several times.

SKIN:

To clean from skin, remove completely with a dry cloth or paper towel, before washing with detergent and water.

Get medical attention if irritation persists.

INHALATION:

Move person to fresh air.

EYES:

In case of contact, immediately flush eyes with plenty of water for at least 15 minutes and get medical attention if irritation persists.

NOTE TO PHYSICIAN:

None known.

### 5. FIRE FIGHTING MEASURES

FLASH POINT: NA (C) NA (F)

METHOD : NA

IGNITION TEMP : UNK (C) UNK

FLAMMABLE LIMITS IN AIR - LOWER (%): UNK

FLAMMABLE LIMITS IN AIR - UPPER (%): UNK

SENSITIVITY TO MECHANICAL IMPACT (Y/N): NO SENSITIVITY TO STATIC DISCHARGE:

Sensitivity to static discharge is not expected.

EXTINGUISHING MEDIA:

All standard firefighting media

SPECIAL FIREFIGHTING PROCEDURES:

None known.

#### 6. ACCIDENTAL RELEASE MEASURES

MOR 001174

(F)

ACTION TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED:

\*\*\* CONTINUED ON NEXT PAGE \*\*\*

PAGE: 03

(F)

(F)

MOR 001175

Wipe, scrape or soak up in an inert material and put in a container for disposal.

Wash walking surfaces with detergent and water to reduce slipping hazard.

Wear proper protective equipment as specified in the protective equipment section.

#### 7. HANDLING AND STORAGE

#### PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE:

Keep container closed when not in use.

Avoid contact with skin and eyes.

Caution]

Remove contact lenses before using sealant. Do not handle lenses until all sealant has been cleaned from the fingertips, nails and cuticles. Residual sealant may remain on fingers for several days and transfer to lenses and cause severe eye irritation.

Product releases acetic acid during application and curing. Use mechanical ventilation to stay below TLV of 10 ppm acetic acid.

Uncured product contact irritates eyes.

Uncured product contact may irritate skin.

Use in a well ventilated area to prevent irritation by vapors.

### 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

#### ENGINEERING CONTROLS:

Eyewash stations.

Use in a well ventilated area.

RESPIRATORY PROTECTION:

Use approved NIOSH respiratory protection if TLV exceeded..... Or over exposure is likely.

PROTECTIVE GLOVES:

Cloth gloves.

EYE AND FACE PROTECTION:

Safety glasses.

OTHER PROTECTIVE EQUIPMENT:

None known.

**VENTILATION:** 

Use only in well ventilated area.

Supplier recommended exposure limit of 10 mg/m3.

The recommended permissible exposure limits (PEL) indicated above reflect the levels adopted by OSHA in 1989. Although, some of the 1989 levels have since been vacated, the Nazdar Company recommends that the lower exposure levels be observed as reasonable worker protection.

SECTION 3 -- HAZARDS IDENTIFICATION

GENERAL HEALTH EFFECTS

THE FOLLOWING INFORMATION HAS BEEN DEVELOPED BASED UPON USING THE PRODUCT AS INTENDED BY THE MANUFACTURER. The potential health effects of this product are based on the hazards of its components. The use of this product in combination with other products may produce synergistic (additive) health effects. Cautionary labeling and material safety data sheets of all materials used with this product should be reviewed before use.

**EYES** 

Eye contact with liquid, vapors or mists may cause severe irritation including burning, tearing, redness or swelling and eye damage.

Skin contact may cause irritation. Symptoms may include dryness, chapping and redness. Repeated or prolonged overexposure may cause burns to the skin. This material may be absorbed through the skin. Toxic if absorbed through the skin.

Repeated and prolonged overexposure by inhalation may cause respiratory tract irritation. Symptoms may include central nervous system disorders such as headaches, dizziness, weakness and fatigue.

INGESTION

Ingestion may cause gastrointestinal tract irritation. Symptoms may include headaches, nausea and vomiting. Ingestion may cause vomiting. Aspiration of material into lungs may cause chemical pneumonitis which can be fatal.

CHRONIC EFFECTS/TARGET ORGANS

Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal.

ANIMAL STUDIES

Aliphatic dibasic acid esters (or its components) have been suggested as a cause of the following effects in lab animals, after overexposure, and may aggravate pre-existing disorders of these organs in humans; mild, reversible liver effects, nasal damage. Cyclohexanone has caused liver and kidney damage in animal tests. For animal studies, reference TSCA Section 4 Test Rule Results or contact the manufacturer for further details.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE

FIRE AND EXPLOSION HAZARDS

Isolate from heat, electrical equipment, sparks, and open flame. Keep containers tightly closed. Vapors may be heavier than air and can travel to a source of ignition then flash back. Closed containers may explode when exposed to extreme heat.

FIRE FIGHTING EQUIPMENT

Full protective equipment including self-contained breathing apparatus (SCBA) is recommended to protect firefighters.

SPECIAL FIRE FIGHTING PROCEDURES

Water may be ineffective but may be used to cool containers. Fumes released on burning may be toxic and dangerous.

SECTION 6 -- ACCIDENTAL RELEASE MEASURES

RELEASE MANAGEMENT HEASURES

Remove all sources of ignition (flames, hot surfaces and electrical, static or frictional sparks). Avoid contact or breathing vapors. Ventilate area. Contain release and remove with inert absorbent. Use non-sparking tools to place material in appropriate container for disposal. The National Response Center (800-424-8802) and local authorities should be contacted for any reportable spill/release.

SECTION 7 -- HANDLING AND STORAGE

HANDLING AND STORAGE METHODS

Use in a well ventilated area. Follow all MSDS/label precautions even after container is emptied; container may retain product residues. Store in closed containers in cool, dry, well ventilated area away from sources of ignition. Keep containers closed when not in use. Smoke in designated areas only. Avoid prolonged or repeated overexposure to this product. Keep out of reach of children. Follow label directions carefully. Do not take internally. Harmful or fatal if swallowed. SECTION 8 -- EXPOSURE CONTROLS, PERSONAL PROTECTION

#### RESPIRATORY PROTECTION

If concentrations of hazardous ingredients exceed exposure limits listed in Section 2 an appropriate NIOSH (National Institute for Occupational Safety and Health) approved respirator with an organic vapor cartridge should be used. If material is handled under mist, spray or dust forming conditions, a P100 (99.97% efficiency) filter should be used in addition to the organic vapor cartridge. If no exposure limits are listed in Section 2, follow general safety guidelines in 29 CFR 1910.134 Respiratory Protection or other applicable respiratory standard.

#### SKIN PROTECTION

Use neoprene, nitrile or other gloves resistant to chemicals listed in Section 2. Contact a reputable safety supply company for appropriate gloves. Solvent resistant aprons are recommended. Prevent prolonged skin contact with contaminated clothing.

#### EYE PROTECTION

Use ANSI (American National Standards Institute) approved safety glasses, faceshield or splash proof goggles to prevent eye contact. Contact a reputable safety supply company for appropriate eye protection. The availability of an eye wash is highly recommended.

#### EXPOSURE GUIDELINES

See Section 2 "Composition, Information on Ingredients" for occupational exposure limits.

#### HYGIENIC PRACTICES

Wash with soap and water before eating, smoking or using toilet facilities. Separately wash or discard clothing and footwear before reuse. NEVER try to remove ink from the skin by using solvent or thinner. Such action is likely to increase the possibility of undesirable effects. Remove contaminated clothing to prevent prolonged skin contact.

#### **ENGINEERING CONTROLS**

Use applicable engineering controls, work practices and personal protective equipment to ensure all concentrations are kept below the exposure limits listed in Section 2. Adequate controls should be implemented to ensure employee safety from fine mists which may be produced under some printing conditions.

#### OTHER PROTECTION

No Data Available

SECTION 9 -- PHYSICAL AND CHEMICAL PROPERTIES

\*\*

APPEARANCE:

Thin liquid

ODOR:

Characteristic

PHYSICAL STATE:

SECTION 16 -- OTHER INFORMATION

#### DISCLOSURE

The information and recommendations contained herein are based upon data believed to be correct. However, no guarantee or warranty of any kind express or implied is made with respect to the information contained herein. The data in this MSDS relates only to the specific material designated herein and does not apply to use in combination with any other material or process.

#### DEFINITIONS

ACGIH: American Conference of Governmental Industrial Hygienists

AIHA: American Industrial Hygiene Association

CEILING: (TLV-Ceiling and PEL Ceiling Limit) The ceiling exposure limit or concentration not to be exceeded for even brief times.

DOT: Department of Transportation

HMIS: The Hazardous Materials Identification System (HMIS) developed by the National Paint and Coatings Association (NPCA) to provide information on the acute health hazards, reactivity and flammability of products encountered in the workplace at room temperatures.

HMIS codes assigned for this product are only suggested ratings based on anticipated normal screen printing applications. The employer has the ultimate responsibility for assigning these ratings and should fully evaluate the MSDS, work practices and environmental conditions prior to assigning the appropriate ratings.

HMIS Personal Protection Index of "X-Ask your supervisor" is given on this MSDS due to varying work conditions which may dictate different levels of protection. Please review this MSDS before determining appropriate protective equipment and beginning work.

IARC: International Agency for Research on Cancer

NFPA: National Fire Protection Association

NTP: National Toxicology Program

STEL: Short-Term Exposure Limit: ACGIH terminology for the short-term exposure limit or maximum concentration for a continuous exposure period of 15 minutes.

TLV: Threshold Limit Value. A term ACGIH uses to express the airborne concentration of a material to which most workers can be exposed during a normal daily and weekly work schedule without adverse effects.

TWA: Time-Weighted Average

VOC: Volatile Organic Compound

MATERIAL SAFETY DATA SHEET INFORMATION:

PLEASE FIND ENCLOSED MATERIAL SAFETY DATA SHEETS (MSDS) COVERING ITEMS PURCHASED FROM ELECTRICAL INSULATION SUPPLIERS (EIS). OSHA REGULATIONS REQUIRE MSDS INFORMATION BE MADE AVAILABLE TO ALL PERSONNEL WHO MAY BE EXPOSED TO HAZARDOUS MATERIALS IN THE WORK PLACE.

UNDER THE "EMERGENCY PLANNING COMMUNITY RIGHT-TO-KNOW ACT OF 1986" INVENTORY AND LOCATION INFORMATION, CONCERNING HAZARDOUS MATERIALS MFG JOB SITE, MAY NEED TO BE REPORTED TO THE LOCAL FIRE DEPARTMENT, THE LOCAL EMERGENCY PLANNING COMMITTEE AND THE STANDARD RESPONSE COMMISSION. YOU MAY WANT TO REFERENCE 40 CFR PART 372 FOR ADDITIONAL INFORMATION. MANUFACTURERS MUST REPORT ANNUAL RELEASES OF LISTED TOXIC CHEMICALS INTO THE ENVIRONMENT, ACCORDING TO SARA TITLE III.

ACCORDING TO 29 CFR PART 1910.1200 PARAGRAPH (g)(6) OF THE HAZARD COMMUNICATION STANDARD, A MSDS IS TO BE PROVIDED THE FIRST TIME THE CUSTOMER BUYS AN ITEM REQUIRING A MSDS. IF AT ANY TIME THE MSDS IS UPDATED OR CHANGED, THE UPDATED MSDS MUST BE SUPPLIED WITH THE FIRST SHIPMENT AFTER THE MSDS UPDATE HAS OCCURRED.

IF YOU NEED FURTHER INFORMATION CONCERNING YOUR SITUATION, YOU MAY CONTACT THE EPA IN WASHINGTON, D.C. THEIR TOLL FREE NO. IS (800)535-0202; THE RCRA/SUPERFUND HOT LINE IS (800)424-9346 OR (703)920-9810; THE TSCA HOT LINE IS (202)554-1404.

BY PROVIDING THIS DOCUMENTATION, EIS IS COMPLYING WITH FEDERAL LAWS GOVERNING MSDS INFORMATION, AS IS KNOWN TO US. THIS IS A SERVICE AIMED AT HELPING YOUR BUSINESS TO ALSO COMPLY WITH GOVERNMENT REGULATIONS.

#### 3. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW:

This section not in use

POTENTIAL HEALTH EFFECTS:

INGESTION:

MAY BE harmful if swallowed.

SKIN CONTACT:

UNCURED PRODUCT WILL IRRITATE LIPS, GUMS AND TONGUE.

UNCURED PRODUCT CONTACT MAY IRRITATE THE SKIN.

INHALATION:

CAUSES MILD RESPIRATORY IRRITATION.

APPLIES ONLY IN UNCURED STATE.

EYE CONTACT:

UNCURED PRODUCT CONTACT IRRITATES EYES.

MEDICAL CONDITIONS AGGRAVATED:

NONE KNOWN.

SUBCHRONIC (TARGET ORGAN) EFFECTS:

NONE KNOWN.

CHRONIC EFFECTS/CARCINOGENICITY:

This product or one of its ingredients present 0.1% or more is NOT listed as a carcinogen or suspected carcinogen by

NTP, IARC, OF OSHA.

PRODUCTS/INGREDIENTS

This space reserved for special use.

PRINCIPLE ROUTES OF EXPOSURE:

Eves.

DERMAL-SKIN

OTHER:

METHANOL RELEASED DURING CURING. THIS PRODUCT CONTAINS METHYL-POLYSILOXANES WHICH CAN GENERATE FORMALDEHYDE AT APPROXIMATELY 300 DEGREES FARENHEIT (150°C) AND ABOVE, IN ATMOSPHERES WHICH CONTAIN OXYGEN. FORMALDEHYDE IS A SKIN AND RESPIRATORY SENSITIZER, EYE AND THROAT IRRITANT, ACUTE TOXICANT, AND POTENTIAL CANCER HAZARD. AN MSDS FOR FORMALDEHYDE IS AVAILABLE FROM GE SILICONES.

#### 4. FIRST AID MEASURES

#### INGESTION:

RINSE MOUTH WITH WATER SEVERAL TIMES.

SKIN:

TO CLEAN FROM SKIN, REMOVE COMPLETELY WITH A DRY CLOTH OR PAPER TOWEL, BEFORE WASHING WITH DETERGENT AND WATER. GET MEDICAL ATTN. IF IRRITATION PERSISTS.

INHALATION:

MOVE PERSON TO FRESH AIR.

EYES:

In case of contact, immediately flush eyes with plenty of water for at least 15 minutes and get medical attention IF IRRITATION PERSISTS.

NOTE TO PHYSICIAN:

None Known.

#### 5. FIRE FIGHTING MEASURES

FLASH POINT: (C) NA (F) METHOD NA IGNTIION TEMP NA (C) NA (F) FLAMMABLE LIMITS IN AIR - LOWER(%): NA FLAMMABLE LIMITS IN AIR . UPPER(%): NA SENSITIVITY TO MECHANICAL IMPACT (Y/N): NO SENSITIVITY TO STATIC DISCHARGE: Sensitivity to static discharge is NOT EXPECTED. EXTINGUISHING MEDIA:

All standard firefighting media.

SPECIAL FIREFIGHTING PROCEDURES:

NONE KNOWN.

#### 6. ACCIDENTAL RELEASE MEASURES

ACTION TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED:

Wipe, scrape or soak up in an inert material and put in a container for disposal.

WASH WALKING SURFACES WITH DETERGENT AND WATER TO REDUCE SLIPPING HAZARD. WEAR PROPER PROTECTIVE EQUIPMENT AS SPECIFIED IN THE PROTECTIVE EQUIPMENT SECTION.

#### 7. HANDLING AND STORAGE

#### PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE:

AVOID CONTACT WITH SKIN AND EYES. CAUTION! COMBUSTIBLE. REMOVE CONTACT LENSES BEFORE USING SEALANT. DO NOT HANDLE LENSES UNTIL ALL SEALANT HAS BEEN CLEANED FROM THE FINGERTIPS, NAILS AND CUTICLES. RESIDUAL SEALANT MAY REMAIN ON FINGERS FOR SEVERAL DAYS AND TRANSFER TO LENSES AND CAUSE SEVERE EYE IRRITATION. PRODUCT RELEASES METHANOL DURING APPLICATION AND CURING. (METHANOL TLV=200 PPM). UNCURED PRODUCT CONTACT IRRITATES EYES. UNCURED PRODUCT CONTACT MAY IRRITATE SKIN.

#### 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

#### 56479/MOREY CORP.

#### HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW:

This section not in use POTENTIAL HEALTH EFFECTS:

INGESTION:

May be harmful if swallowed.

المناسل المناسلات

NOV 17 1995

THE MOREY CORP.

\*\*\* CONTINUED ON NEXT PAGE \*\*\*

PRODUCT: RIV162

POLYDIMETHYLSILOXANE SEALANT

PAGE: 002

SKIN CONTACT:

Uncured product contact will irritate lips, gums and tongue.

May cause mild skin irritation.

INHALATION:

Causes mild respiratory irritation.

Applies only in uncured state.

EYE CONTACT:

Uncured product contact irritates eyes.

MEDICAL CONDITIONS AGGRAVATED:

None known.

SUBCHRONIC (TARGET ORGAN) EFFECTS:

None known.

CHRONIC EFFECTS/CARCINOGENICITY:

This product or one of its ingredients present 0.1% or more is NOT listed as a carcinogen or suspected carcinogen by NTP, IARC, or OSHA.

PRODUCTS/INGREDIENTS

This space reserved for special use.

PRINCIPLE ROUTES OF EXPOSURE:

Eyes.

OTHER:

This product contains Methylpolysiloxanes which can generate Formaldehyde at approximately 300 degrees farenheit (150°C) and above, in atmospheres which contain oxygen. Formaldehyde is a skin and respiratory sensitizer, eye and throat irritant, acute toxicant, and potential cancer hazard. An MSDS for Formaldehyde is available from GE Silicones.

Product releases methanol (1-3% by weight) during cure process.

#### 4 FIRST AID MEASURES

#### INGESTION:

Do not induce vomiting. Slowly dilute with 1-2 glasses of water or milk and seek medical attention. Never give anything by mouth to an unconscious person.

SKIN:

To clean from skin, remove completely with a dry cloth or paper towel, before washing with detergent and water.

INHALATION:

Move person to fresh air.

EYES

In case of contact, immediately flush eyes with plenty of water for at least 15 minutes and get medical attention if irritation persists.

NOTE TO PHYSICIAN:

None known.

#### 6. ACCIDENTAL RELEASE MEASURES

ACTION TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED:

Wipe, scrape or soak up in an inert material and put in a container for disposal.

Wash walking surfaces with detergent and water to reduce slipping hazard.

Wear proper protective equipment as specified in the protective equipment section.

#### 7. HANDLING AND STORAGE

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE:

Avoid contact with skin and eyes.

Use only in a well ventilated area.

Remove contact lenses before using sealant. Do not handle lenses until all sealant has been cleaned from the fingertips, nails and cuticles. Residual sealant may remain on fingers for several days and transfer to lenses and cause severe eye irritation.

Product releases methanol during application and curing.

(methanol TLV = 200 ppm).

Uncured product contact irritates eyes.

#### HEALTH HAZARD AND TOXICOLOGICAL DATA

A EFFECTS OF CHRONIC EXPOSURE

Health Effects Toxicological Data Carcinogenicity Data

Reproductive Data

Mutagenicity Data

Teratogenicity Data

Synergistic Products

Delayed Effects

Pulmonary Edema, Dermatitis

LD50 of mixture (calculated) Ingestion/Rat 3810-4670 mg/kg

The ingredients of this product are not listed as carcinogens by the National Toxicology Program, and have not been evaluated by the International Agency for Research on Cancer or the American Conference of Governmental Industrial Hygienists.

No information available and no adverse reproductive effects are anticipated.

No information available and no adverse mutagenic effects are anticipated.

No information available and no adverse teratogenic effects are anticipated.

None known

Decomposition product Methyl Ethyl Ketoxime (MEKO). Preliminary results from a lifetime study of rats and mice indicate potential for long term health effects. Until the study is completed we do not know if these effects will be relevant to human health. Until such time, exposure to MEKO should be as low as reasonably achievable. Exposure levels experienced by users indicate exposures of 2 ppm or less.

**B. EFFECTS OF ACUTE EXPOSURE** 

Not normally an inhalation hazard. At high vapor concentration, curing by-product has a narcotic action with no irreversible Inhalation

Moderate irritation. Can cause burns. Eves Skin

Mild irritant; may cause transient reddening of skin.

**€**)

Ingestion

Very low oral toxicity. May cause some nausea and an obstruction to gastro-intestinal tract.

Delayed (Subchromic & Chronic) Effects: Decomposition product Methyl Ethyl Ketoxime (MEKO). In a chronic oral toxicity

animal study, methyl ethyl ketoxime produced an adverse effect upon red blood cells. This was found for all dose levels tested. Gross nistopathologic alterations were observed in the spleen, lung, and kidney. In an soute dermal animal study,

200 mg/kg caused mild hematologic (blood) effects. No effects were seen at 20 mg/kg.

FIRST AID PROCEDURES

..alation

No emergency care anticipated. Treat symptomatically. If symptoms persist, consult physician.

Eye Contact

Do not attempt to physically remove solids or gums from eye. Immediately flush the contaminated eye(s) with lukewarm. gently flowing water for 20 minutes, by the clock, holding the eyelid(s) open. Obtain medical attention immediately.

Skin Contact

Remove contaminated clothing. Wash gently and thoroughly with water and non-abrasive soap. If symptoms persist,

obtain medical attention. Contaminated clothing should be laundered before re-use.

Ingestion

Never give anything by mouth if victim is rapidly losing consciousness, or is unconscious or convulsing. DO NOT INDUCE VOMITING. Have the victim drink 8 to 10 ozs. (240 to 300 ml) of water or milk to dilute material in the stomach. If vomiting occurs naturally, have the victim lean forward to reduce the risk of aspiration. Repeat the administration of water/milk. Obtain medical attention immediately.

First Aid

Provide general supportive measures (comfort, warmth, rest). Consult a physician and/or the nearest Poison Control Center for all exposures except minor instances of inhalation or skin contact. Solid or plastic material should be removed

only by a physician.

VII

REACTIVITY DATA

Product Stability

Stable Will not occur

Hazardous Polymerization Incompatible Materials

CONCENTRATED ACIDS OR BASES - cause degradation of polymer. Boiling water may soften and weaken

material.

Hazardous Decomposition

Combustion will produce silicon dioxide, carbon monoxide and carbon dioxide.

Products

#### PREVENTATIVE MEASURES

#### A PERSONAL PROTECTION EQUIPMENT

Respiratory Protection

Not required unless normal ventilation is inadequate.

Eye/Face Protection

Chemical splash goggles

Skin Protection

Gloves, coveralls, apron may be useful to prevent contamination of skin or clothing.

Resistance of Materials for

No specific data. Most rubbers and plastics are adequate.

Protective Clathing

Ventilation Requirements

Local exhaust to provide sufficient removal of vapors.

EN 0.9 1995

#### **B. STORAGE AND HANDLING**

Storage Conditions

Store under cool dry conditions. Keep container tightly sealed when not in use.

Handling Procedure

No apecial measures required. Do not inhale vapor or ingest sealant. Cured CSL Product requires no special

precautions.

#### C. ENVIRONMENTAL PROTECTION

Spill and Leak Procedure

Restrict access to the area of spill. Provide ventilation and protective clothing if necessary. Scrape-up sealant

with cardboard/rag and place in container.

Waste Disposal

Review environmental regulations prior to disposal. Silicone wastes can often be incinerated in approved

facilities. Solid wastes may be sent to a designated landfill site.

| 068909206  | 16             | Trimethylated silica   | Dow Corning guide: 5 mg/m3<br>Ceiling (as dust).                 |

Methyl alcohol forms on contact with water or humid air. Provide adequate ventilation to control exposures within guidelines of OSHA PEL: TWA 200 ppm and ACGIH TLV-skin: TWA 200 ppm, STEL 250 ppm. The effects of overexposure listed in Section 3 include health effects related to conversion of methoxysilanes to methyl alcohol upon exposure to moist or humid air.

#### SECTION 3. EFFECTS OF OVEREXPOSURE

#### Acute Effects

Direct contact irritates slightly with redness and swelling. Eye:

A single relatively short exposure causes no known adverse effect. Several Skin:

repeated or prolonged exposures (24 to 48 hours) may irritate.

Vapor may irritate nose and throat. Product generates methyl alcohol which Inhalation:

may cause blindness and damage to nervous system. Vapor overexposure may

cause drowsiness.

Product generates methyl alcohol which may cause blindness and possibly Oral:

death if swallowed.

#### Repeated Exposure Effects

Skin: None Known.

Product generates methyl alcohol which may cause blindness and damage to Inhalation:

nervous system.

Product generates methyl alcohol which may cause blindness and possibly Oral:

death if swallowed.

#### Special Hazards

This material contains the following components with the special hazards listed below.

#### Carcinogens

None Known

DOW CORNING(R) 3140 RTV COATING

Page 2

Teratogens

None Known

<u>Mutagens</u>

None Known

Reproductive Toxins

None Known

Sensitizers

None Known

Comments:

When heated to temperatures above 180 degrees C in the presence of air, product can form formaldehyde vapors. Formaldehyde is a potential cancer hazard, a known skin and respiratory sensitizer; and an irritant to the eyes, nose, throat, skin, and digestive system. Safe handling conditions may be maintained by keeping vapor concentrations within the OSHA

Permissible Exposure Limit for formaldehyde.

The above listed potential effects of overexposure are based on actual data, results of studies performed upon similar compositions component data and/or expert review of the product.

SECTION 4. FIRST AID MEASURES

Immediately flush with water for 15 minutes. Eye:

Skin:

No first aid should be needed.

Inhalation: Remove to fresh air. Get medical attention if ill effects persist.

Oral:

Get medical attention. If conscious, induce vomiting. Lie down, keep

warm, and cover eyes to exclude light.

Comments: Treat same as methyl alcohol poisoning.

SECTION 5. FIRE FIGHTING MEASURES

Flash Point (Closed Cup):

> 213.98 DEGREE F / 101.10 DEGREE C

Autoignition Temperature:

Not Determined

Flammability Limits in Air:

Not Determined

Extinguishing Media:

Carbon dioxide (CO2). Water spray. Dry chemical.

Foam. Water can be used to cool fire exposed

containers.

Unsuitable Extinguishing Media:

None

Fire Fighting Procedures:

Self-contained breathing apparatus and protective clothing should be worn in fighting fires involving chemicals. Determine the need to evacuate or isolate

the area according to your local emergency plan.

Unusual Fire Hazards:

None

MOR 001216

#### Hazardous Decomposition Products:

Thermal breakdown of this product during fire or very high heat conditions may evolve the following hazardous decomposition products: Metal oxides. Carbon oxides and traces of incompletely burned carbon compounds. Silicon dioxide. Formaldehyde.

#### SECTION 6. ACCIDENTAL RELEASE MEASURES

Containment/Clean-up: Disposal of collected product, residues, and cleanup materials may be governmentally regulated. Observe all applicable local,

state, and federal waste management regulations. Mop up, or wipe

up, or soak up with absorbent and contain for salvage or

DOW CORNING(R) 3140 RTV COATING

Page 3

disposal. For large spills, provide diking or other appropriate containment to keep material from spreading. Clean any remaining slippery surfaces by appropriate techniques, such as: several moppings or swabbings with appropriate solvents; washing with mild, caustic detergents or solutions; or high pressure steam for large areas. For nonsilicones, use typical industrial cleaning materials. Observe any safety precautions applicable to the cleaning material being used. Observe all personal protection equipment recommendations described in Sections 5 and 8. Local, state, and federal reporting requirements may apply to spills or releases of this material into the environment. See applicable regulatory compliance information in Section 15.

NOTE: See Section 8 for Personal Protective Equipment for Spills

SECTION 7. HANDLING AND STORAGE

Handling: No special precautions.

Keep container closed and store away from water or moisture. Storage:

SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering Controls

Local exhaust:

Recommended

General Ventilation: Recommended

Personal Protective Equipment For Routine Handling

Eves:

Use proper protection - safety glasses as a minimum.

Skin:

Because of the nature of the fluorescent agent in this material, small amounts on the skin will fluoresce under UV light. This does not present a hazard. Washing at mealtime and end of shift Continued washing with soap and water will is recommended.

eventually remove the fluorescing agent from the skin.

Suitable Gloves:

No special protection needed.

Inhalation:

Use respiratory protection unless adequate local exhaust ventilation is provided or air sampling data show exposures are within recommended exposure guidelines. Industrial Hygiene Personnel can assist in judging the adequacy of existing

engineering controls.

Suitable Respirator:

Self-contained breathing apparatus (SCBA) or other supplied-air

respirator.

Personal Protective Equipment For Spills

Fva:

Use full face respirator.

Skin:

Because of the nature of the fluorescent agent in this material, small amounts on the skin will fluoresce under UV light. This does not present a hazard. Washing at mealtime and end of shift is recommended. Continued washing with soap and water will

eventually remove the fluorescing agent from the skin.

Inhalation/

Suitable Respirator:

Use self-contained breathing apparatus (SCBA) or other

supplied-air respirator.

Precautionary Measures:

Avoid eye contact. Avoid breathing vapor. Keep container

closed. Do not take internally.

DOW CORNING(R) 3140 RTV COATING

Page 4

Product evolves methyl alcohol when exposed to water or humid air. Comments: ventilation during use to control exposure within Section 2 guidelines or use air-supplied or self-contained breathing apparatus.

Note: These precautions are for room temperature handling. Use at elevated temperature, or aerosol/spray applications, may require added precautions.

#### SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES

Physical form: Liquid

Color: Translucent white

Odor: Slight odor

Specific Gravity @ 250: 1.05

Viscosity: 300.00 P

Freezing/Melting Point: Not Applicable.

Boiling Point: Not Available.

Vapor Pressure @ 250: Not Determined.

Vapor Density: Not Determined.

Solubility in Water: Not Determined.

pH: Not Applicable.

Volatile content: Not Determined.

Note: The above information is not intended for use in preparing product specifications. Contact Dow Corning before writing specifications.

#### SECTION 10. STABILITY AND REACTIVITY

Chemical Stability:

Stable.

Hazardous Polymerization:

Hazardous polymerization will not occur.

Conditions to Avoid:

None.

Materials to Avoid:

Oxidizing material can cause a reaction.

Comments: Water, moisture, or humid air can cause hazardous vapors to form as described

in Section 2.

|Comments: The above components are hazardous as defined in 29 CFR 1910.1200.

#### SECTION 3. EFFECTS OF OVEREXPOSURE

#### Acute Effects

Eye: Direct eye contact may cause temporary discomfort with mild redness

and dryness similar to windburn.

Skin: A single prolonged exposure (24 to 48 hours) causes no known adverse

effect.

|Inhalation: No irritation to eyes and respiratory passages. No injury is likely|

from relatively short exposures of less than 8 hours.

Oral: Small amounts transferred to the mouth by fingers during use, etc.,

should not injure. Swallowing large amounts may cause digestive dis-

comfort.

Page 2

#### SILASTIC(R) E RTV SILICONE RUBBER BASE

Repeated Exposure Effects

Skin:

None Known.

Inhalation: None Known.

loral: None Known.

|Special Hazards

This material contains the following components with the special hazards listed

Carcinogens

None Known

Teratogens

None Known

Mutagens

None Known

Reproductive Toxins

None Known

Sensitizers

Nome Known

Comments: When heated to temperatures above 180 degrees C in the presence of air, product can form formaldehyde vapors. Formaldehyde is a potential cancer hazard, a known skin and respiratory sensitizer; and an irritant to the eyes, nose, throat, skin, and digestive system. Safe handling conditions may be maintained by keeping vapor concentrations within the OSHA Permissible Exposure Limit for formaldehyde.

The above listed potential effects of overexposure are based on actual data, results of studies performed upon similar compositions component data and/or expert review of the product.

**+----**

SECTION 4. FIRST AID MEASURES

Immediately flush with water. Eye:

Skin: No first aid should be needed.

Inhalation: No first aid should be needed.

Page 3

#### SILASTIC(R) E RTV SILICONE RUBBER BASE

Oral: No first aid should be needed.

|Comments: Treat symptomatically.

### SECTION 5. FIRE FIGHTING MEASURES

|Flash Point (Closed Cup): 212.00 DEGREE F / 100.00 DEGREE C

Autoignition Temperature: Not Determined

Flammability Limits in Air: Not Determined

Extinguishing Media: Water spray. Carbon dioxide (CO2). Dry chemical.

Foam. Water can be used to cool fire exposed con-

tainers.

Fire Fighting Procedures: Self-contained breathing apparatus and protective

clothing should be worn in fighting fires involving

chemicals.

Unusual Fire Hazards: None

#### Hazardous Decomposition Products:

|Thermal breakdown of this product during fire or very high heat conditions may | evolve the following hazardous decomposition products: Carbon oxides and traces | of incompletely burned carbon compounds. Silicon dioxide. Formaldehyde.

.----

#### SECTION 6. ACCIDENTAL RELEASE MEASURES

Containment/Clean-up: Disposal of collected product, residues, and cleanup materials may be governmentally regulated. Observe all applicable local, state, and federal waste management regulations. Mop up, or wipe up, or soak up with absorbent and contain for salvage or disposal. Clean any remaining slippery surfaces by appropriate techniques, such as: several moppings or swabbings with appropriate solvents; washing with mild, caustic detergents or solutions; or high pressure steam for large areas. For nonsilicones, use typical industrial cleaning materials. Observe any safety precautions applicable to | the cleaning material being used. For large spills, provide diking or other appropriate containment to keep material from spreading. Observe all personal protection equipment recommendations described in Sections 5 and 8. Local, state, and federal reporting requirements may apply to spills or releases of this material into the environment. See applicable regulatory compliance information in Section 15.

NOTE: See Section 8 for Personal Protective Equipment for Spills

|Comments: The above components are hazardous as defined in 29 CFR 1910.1200.

#### SECTION 3. EFFECTS OF OVEREXPOSURE

#### Acute Effects

Eye: Direct eye contact may cause temporary discomfort with mild redness

and dryness similar to windburn.

Skin: A single prolonged exposure (24 to 48 hours) causes no known adverse

effect.

Inhalation: No irritation to eyes and respiratory passages. No injury is likely

from relatively short exposures of less than 8 hours.

Oral: Small amounts transferred to the mouth by fingers during use, etc.,

should not injure. Swallowing large amounts may cause digestive dis-

comfort.

### Repeated Exposure Effects

Page 2

### SILASTIC(R) E RTV SILICONE RUBBER CURING AGENT

Skin: None Known.

| |Inhalation: None Known.

Oral: None Known.

#### Special Hazards

This material contains the following components with the special hazards listed below.

Carcinogens

None Known

Teratogens

None Known

Mutagens

None Known

Reproductive Toxins

None Known

Sensitizers

None Known

Comments: When heated to temperatures above 180 degrees C in the presence of air, product can form formaldehyde vapors. Formaldehyde is a potential cancer hazard, a known skin and respiratory sensitizer; and an irritant to the eyes, nose, throat, skin, and digestive system. Safe handling conditions may be maintained by keeping vapor concentrations within the OSHA Permissible Exposure Limit for formaldehyde.

The above listed potential effects of overexposure are based on actual data, re-|sults of studies performed upon similar compositions component data and/or ex-|pert review of the product.

### SECTION 4. FIRST AID MEASURES

Eye: Immediately flush with water.

Skin: No first aid should be needed.

|Inhalation: No first aid should be needed.

Oral: No first aid should be needed.

Page 3

SILASTIC (R) E RTV SILICONE RUBBER CURING AGENT

|Comments: Treat symptomatically.

SECTION 5. FIRE FIGHTING MEASURES

|Flash Point (Closed Cup): > 213.98 DEGREE F / 101.10 DEGREE C

Autoignition Temperature: Not Determined

|Flammability Limits in Air: Not Determined

Extinguishing Media: Water spray. Carbon dioxide (CO2). Dry chemical.

Foam. Water can be used to cool fire exposed con-

tainers.

|Fire Fighting Procedures: Self-contained breathing apparatus and protective

clothing should be worn in fighting fires involving chemicals. Determine the need to evacuate or isolate the area according to your local emergency

plan.

Unusual Fire Hazards: None

#### | Hazardous Decomposition Products:

SECTION 6. ACCIDENTAL RELEASE MEASURES

|Containment/Clean-up: Disposal of collected product, residues, and cleanup materials may be governmentally regulated. Observe all applicable local, state, and federal waste management regulations. Determine whether to evacuate or isolate the area depending on such specific factors as site location, population density, traffic flow, size of the release or spill, weather conditions, the material's hazards and risks to people, and whether a fire is underway or possible. Mop up, wipe up, or soak up with absorbent and place in a vented container for salvage or disposal. Clean any remaining slippery surfaces by appropriate techniques, such as: several moppings or swabbings with appropriate solvents; washing with mild, caustic detergents or solutions; or high pressure steam for large areas. For nonsilicones, use typical industrial cleaning materials. Observe any safety precautions applicable to the cleaning material being used. For large spills, provide diking or other appropriate containment to keep material from spreading. Observe all personal protection equipment recom-

mendations described in Sections 5 and 8. Local, state, and | federal reporting requirements may apply to spills or releases of this material into the environment. See applicable regulatory compliance information in Section 15.

NOTE: See Section 8 for Personal Protective Equipment for Spills

SECTION 7. HANDLING AND STORAGE

|Handling: No special precautions.

Storage: Product evolves minute quantities of flammable hydrogen gas. Do not repackage or store in unvented containers. Adequately ventilate the work area to maintain vapors well below established flammability limits! and exposure guidelines. Keep container closed and store away from water or moisture.

SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering Controls

None should be needed Local exhaust:

General Ventilation: Recommended

Personal Protective Equipment For Routine Handling

Eyes: Use proper protection - safety glasses as a minimum.

Washing at mealtime and end of shift is adequate. Skin:

|Suitable Gloves: No special protection needed.

Inhalation: No respiratory protection should be needed.

|Suitable Respirator: None should be needed.

Personal Protective Equipment For Spills

Use proper protection - safety glasses as a minimum. Eye:

Skin: Washing at mealtime and end of shift is adequate.

|Inhalation/

Suitable Respirator: No respiratory protection should be needed.

Precautionary Measures: Avoid eye contact. Use reasonable care.

Page 5

SILASTIC (R) E RTV SILICONE RUBBER CURING AGENT Comments: None Note: These precautions are for room temperature handling. Use at elevated tem-! perature, or aerosol/spray applications, may require added precautions. SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES Physical form: Liquid Color: White Odor: Not reported Specific Gravity @ 25C: 0.99 Viscosity: 3200.00 CST
Freezing/Melting Point: Not Applicable. Boiling Point: Not Available. Vapor Pressure @ 25C: < 5.00 MM HG Vapor Density: Not Determined. Solubility in Water: Not Determined. pH: Not Applicable. Volatile content: 2.00 % Note: The above information is not intended for use in preparing product specifications. Contact Dow Corning before writing specifications. \_\_\_\_\_\_\_ SECTION 10. STABILITY AND REACTIVITY Chemical Stability: Stable. |Hazardous Polymerization: Hazardous polymerization will not occur. |Conditions to Avoid: None. Materials to Avoid: Oxidizing material can cause a reaction. Comments: Water, alcohols, acidic or basic materials, and many metals or metallic compounds, when in contact with product, liberate flammable hydrogen gas, which can form explosive mixtures in air'. SECTION 11. TOXICOLOGICAL INFORMATION OPTIONAL SECTION - Complete information not yet available. SECTION 12. ECOLOGICAL INFORMATION

## VII PRECAUTIONS FOR SAFE HANDLING & USE

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED:

ELIMINATE SOURCES OF IGNITION

ABSORB WITH SAND, EARTH OR INERT INGREDIENTS AND DISPOSE OF IN ACCORDANCE WITH FEDERAL, STATE AND LOCAL REGULATIONS.

WASTE DISPOSAL METHOD: DISPOSE OF AT A GOVERNMENTAL APPROVED LANDFILL, INCINERATOR OR RECOVERY FACILITY. OBSERVE ALL FEDERAL, STATE AND LOCAL REGULATIONS.

PRECAUTIONS IN HANDLING AND STORAGE: AVOID CONTACT WITH SKIN AND EYES, STORE IN COOL, DRY PLACE, REMOVE AND DISPOSE OF ANY CONTAMINATED CLOTHING

OTHER PRECAUTIONS: AVOID FREQUENT AND/OR PROLONGED SKIN CONTACT OR INHALATION EXTREMES.

## VIII CONTROL MEASURES

RESPIRATORY PROTECTION: NIOSH APPROVED, HAVE RESPIRATORS PRESENT

**VENTILATION:** 

LOCAL EXHAUST: X, MEETING TLD REQUIREMENTS SPECIAL: NO MECHANICAL X, OTHER: NO

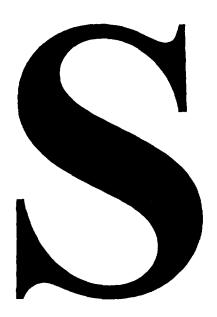

PROTECTIVE GLOVES: YES, NEOPRENE OR LATEX

EYE PROTECTION: WEAR GOGGLES

OTHER PROTECTIVE CLOTHING OR EQUIPMENT: YES, STANDARD

WORK/HYGIENIC PRACTICES: SHOWER BATH AND EYE WASH SHOULD BE AVAILABLE

SECTION I - IDENTIFICATION

PRODUCT (TRADE) NAME: Cho-Therm 1674

General Chemical Description: Solvent-based silicone

SECTION II - INGREDIENTS
Exposure Guidelines

OSHA PEL ACGIH TLV Components % by Weight Aluminum Oxide 60-80% 10 #0/#3 10 mg/m3 Silicone Resin 15-305 NE NE 50 рр≋ Toluene 10.20% 100 pp# Isopropanol 2-5% 50 pp≡ 50 ppm

SECTION III · PHYSICAL DATA

Boiling Point (Degree F): )200
Vapor Pressure (mm Hg @25 C): {4
Percent volatiles by weight: (20
Specific Gravity (water =1): ) 1.75
Solubility in Water : Insoluble

Vapor Density : Heavier than air

Appearance and Odor : Gray liquid; solvent odor

SECTION IV - FIRE AND EXPLOSION HAZARD DATA

Flash Point (Degree F): 40-50, based on toluene

Flammable limits:

Lel: 1.3% UEL: 7.1% for Toluene

Extinguishing Media:

Use carbon dioxide, dry chemical, foam.

Unusual Fire or Explosion Hazard:

Decomposition and combustion products may be toxic. Closed containers may violently rupture under fire conditions. Vapors may form flammable mixtures with air. Vapors from this product are heavier than air, and may travel a considerable distance to a source of ignition and flash back.

Special Firefighting Procedures:

Firefighters/rescue personnel should wear positive pressure self contained breathing apparatus and full protective equipment. Cool exposed containers with water to prevent pressure buildup. If large quantities of material are involved, evacuate area and fight fire from a safe distance.

SECTION V - REACTIVITY DATA

Product Stability:

Product is stable under normal handling and storage conditions. Hazardous polymerization will not occur; however, review reactivity data concerning conditions to avoid and incompatible substances.

Incompatibility:

Incompatible with strong oxidizers, acids, bases.

Hazardous Decompositions Products;

Carbon monoxide, carbon dioxide, aldehydes, acids and other organic substances may be formed during combustion. The chemical nature and quantity of decomposition by-products will vary widely depending on th conditions of combustion.

Provided By Electrical Insulation Suppliers Inc.

MOR 001241

#### Conditions to avoid:

Avoid storage in open containers, exposure to open flame or uncontrolled exposure to heat, uncontrolled mixing with curing agents or exposure to incompatible substances.

#### SECTION VI - RELEASE RESPONSE DATA

Spill response operations must be conducted in accordance with the provisions of OSHA 29 CFR 1910.120. Review the entire MSDS before proceeding with spill response.

#### Small Spills:

Activate all explosion-proof exhuast ventilation in the immediate spill area. Extinguish open flames and eliminate all other sources of ignition. Wipe up, or absorb with vermiculite or other similar material. Wash area with soapy water to remove residue. Collect absorbed material and water rinses in appropriate chemical waste containers. Dispose of as an ignitable waste in accordance with all current Federal, State, and local regulations.

#### Large Spills:

Evacuate all personnel not directly involved with control/cleanup operations from the immediate spill area. Extinguish open flames and all other sources of ignition. Activate explosion-proof exhaust ventilation in the immediate spill area. Shut off the source of the release if this can be done without risk of injury. Use only spill response equipment approved for use in potential flammable/explosive environments. Directly area to contain the spill and prevent releases to sewers or other waterways. Collect spilled material for salvage/disposal. Apply absorbent material to soak up residue. Wash area with soapy water. Prevent runoff from entering sewers or other waterways. Collect abosrbed material and water rinses in appropriate waste containers. Dispose of as an ignitable waste in accordance with Federal, State, and local regulations.

#### SECTION VII - HANDLING PRECAUTIONS

The recommendations described in this section are provided as general guidance for minimizing exposure when handling this product. Because usage conditions will vary depending on customer application, specific safe handling procedures should be developed by a person knowledgeable in the intended usage conditions and equipment. Employees must be properly trained in safe handling of this product prior to use.

#### Personal Protection:

This product can cause severe eye irritation. Prevent eye contact through the use of splash-proof chemical goggles or face shield. This product can cause skin irritation. Components of this product may be absorbed through the skin. Wear appropriate protective gloves to minimize skin contact. If necessary a promper chemical-resistant apron and additional impervious clothing should be used to minimize skin contact and prevent contamination of clothing. Normal work clothing should be washed before re-use. Wash hands and face thoroughly after handling this product and before eating, drinking or smoking. Emergency eye wash facilities and safety shower must be available.

## Ventilation Recommendations and Respiratory Protection:

Provide effective explosion-proof mechanical exhaust ventilation to draw vapors, mists, or fumes generated during processing away from the worker and prevent routine inhalation. Ventilation must be sufficient to maintain airborne concentrations of Section 2 ingredients below their PEL/TLV values. The type of respiratory protection selected will depend upon the conditions of use. Observe OSHA regulations for respiratory protection (29 CFR 1910.134).

#### Storage

Store in a cool, dry location with adequate ventilation. Keep container tightly sealed when not in use. Do not store near heat, sparks or open flame. To prevent fire or explosion risk from static electricity accumulation and discharge, effectively ground storage and transfer containers in accordance with NFPA standards. Empty containers may contain flammable liquid or vapor residue. Do not cut, weld, solder, drill, grind or expose container to heat, flame or other source of ignition. They may explode and

Provided By Electrical Insulation Suppliers Inc.

cause injury or death.

SECTION VIII - HEALTH DATA

Routes of Exposure:

Skin and eye contact, inhalation of vapors.

Medical Conditions Aggravated by Exposure:

Exposure may aggravate preexisting skin, eye and/or respriatory disorders.

#### Eye Contact:

Contains materials which cause moderate skin irritation. Prolonged or repeated exposure to the liquid may exert a defatting or drying action on the skin, possibly resulting in dermatitis. Toluene may be absorbed through the skin

#### Inhalation:

High vapor concentrations may cause respiratory irritation, headaches, nausea, dizziness; may cause anesthetic efforts or other temporary central nervous system effects. Severity of effects will be dependent upon vapor concentration and severity of exposure.

Ingestion:

Harmful if swallowed.

Chronic Health Effects:

Overexposure to toluene has produced severe but reversible liver and kidney injury in humans. Repeated and prolonged overexposure has been associated with central nervous system injury and cardiac sensitization.

SECTION IX- FIRST AID PROCEDURES:

#### Eve Contact

Immediately flush eyes thoroughly with water for at least 15 minutes while holding eyelids open. Get immediate medical attention.

#### Skin Contact:

Remove any contaminated clothing and flush the affected area of the skin thoroughly with plenty of water. Follow by washing with soap and water. Get medical attention if irritation persists. Do not reuse contaminated clothing until properly cleaned.

#### Inhalation:

Remove victim to fresh air. Provide oxygen if breathing is difficult. Give artificial respiration if not breathing. Get immediate medical attention.

#### Ingestion:

Do NOT induce vomiting. If victim is conscious and alert, dilute by giving water to drink; never give anything by mouth to a drowsy, unconscious, or convulsing person. Get immediate medical attention.

#### SECTION X ADDITIONAL INFORMATION

### TSCA STATUS:

All components of this product are listed in the EPA toxic Substance Control  ${\sf Act}$  Inventory.

#### SARA STATUS:

The components listed in Section 2 which are substances regulated by the SARA Section 313 amendments to RCRA are as follows: Toluene (108-88-3)

Special Notes:

## TRI-PURE HG

## For Electronic Grade High Reliability Soldering

TRI-PURE HG is manufactured from virgin metals, with a new manufacturing process for Bar Solder that REDUCES DROSS by 12% to 18%. This will be a direct <u>COST REDUCTION</u> for our customers as this process will not add to the cost of our products. Manufacturing will also have the added benefit of LESS DROSS, MORE FLUID SOLDER BATH, STRONGER SOLDER JOINTS AND BRIGHTER CONNECTIONS. BOW ELECTRONIC SOLDERS feels this new process combined with their use of virgin metals will meet the demands of today's sophisticated electronic manufacturing processes.

Unusual Fire and Explosion Hazards
MOLTEN METALS PRODUCE FUME OR VAPOR THAT MAY BE TOXIC AND/OR RESPIRATORY
IRRITANTS. REACTS VIOLENTLY WITH OXYDIZING AGENTS.

Fire Extinguishing Agents Recommended USE CO2 OR DRY CHEMICAL ON SURROUNDING FIRE.

Fire Extinguishing Agents to Avoid
DO NOT USE WATER ON FIRE WHERE MOLTEN METAL IS PRESENT.

RCRA Status of Unused Material IF DISCARDED IN UNALTERED FORM, MATERIAL SHOULD BE TESTED TO DETERMINE IF IT MUST BE CLASSIFIED AS A HAZARDOUS WASTE FOR DISPOSAL PURPOSES. UNDER SPECIFIC CIRCUMSTANCES, APPLICATION CAN BE MADE TO THE EPA ADMINISTRATOR TO HAVE A PARTICULAR WASTE DESIGNATED NON-HAZARDOUS.

| UN/NA CODE                  | N/A |

\*THIS PRODUCT IS NOT REGULATED BY THE D.O.T. AS SHIPPED. THIS MATERIAL IS ONLY REGULATED BY THE D.O.T. IF IN A POWDER FORM WITH A PARTICLE SIZE LESS THAN 100 MICROMETERS. (0.0040 INCHES)

### 11. CERCLA INFORMATION

THIS PRODUCT CONTAINS THE FOLLOWING CHEMICALS SUBJECT TO THE RELEASE REQUIREMENTS OF SECTION 302:

CHEMICAL NAME: LEAD
REPORTABLE QUANTITY(LBS) 1.0 CERLA STATUTORY RQ

SPILLS TO THE ENVIRONMENT EXCEEDING THE REPORTABLE QUANTITY IN ANY 24 HOUR PERIOD MUST BE REPORTED TO THE NATIONAL RESPONSE CENTER (800-424-8802). NO REPORTING OF RELEASES OF THE HAZARDOUS SUBSTANCE IS REQUIRED IF THE DIAMETER OF THE PIECES OF THE SOLID METAL RELEASED IS EQUAL TO OR EXCEEDS 100 MICROMETERS (0.400 INCHES).

This Material Safety Data Sheet is offered for your information, consideration and investigation. Sow Electronic Solders provides no warranties, either express or implied and assumes no responsibilities for the accuracy or completeness of the data contained in this document. The data in this Material Buildy Data Sheet relates to this product and does not relate to use in combination with any other material or in any process.

Personal Hygiene

AVOID INHALATION OR INGESTION. PRACTICE GOOD HOUSEKEEPING AND PERSONAL HYGIENE PROCEDURES. A SHOWER IS RECOMMENDED IF SIGNIFICANT DUST EXPOSURE OCCURS.

**Engineering Controls** 

LOCAL EXHAUST VENTILATION IS RECOMMENDED FOR DUST AND/OR FUME GENERATION OPERATIONS WHERE AIRBORN EXPOSURES MAY EXCEED PERMISSIBLE AIR CONCENTRATIONS.

Storage

GENERAL STORAGE PROCEDURES ACCEPTABLE.

Special Precautions, Procedures, Label Instruction SPECIAL ATTENTION IS DRAWN TO THE REQUIREMENTS OF THE OSHA LEAD STANDARD (1910.1025) AND RESPIRATOR STANDARD (1910.134) SHOULD AIRBORN EXPOSURES EXCEED THE OSHA ACTION LEVEL OR PEL.

## 6. PERSONAL PROTECTIVE EQUIPMENT

Respiratory Protection

WHERE AIRBORN EXPOSURES MAY EXCEED OSHA/ACGIH PERMISSIBLE AIR CONCENTRATIONS, THE MINIMUM RESPIRATORY PROTECTION RECOMMENDED IS A NEGATIVE PRESSURE AIR PURIFYING RESPIRATOR WITH CARTRIDGES THAT ARE NIOSH/MSHA APPROVED AGAINST DUST, FUMES AND MISTS HAVING A TWA NOT LESS THAN 0/05 MG/CU M.

Eyes and Face

SAFETY GLASSES RECOMMENDED WHERE THE POSSIBILITY OF GETTING DUST PARTICLES IN EYES EXISTS OR WHEN HANDLING MOLTEN METAL.

Other Clothing and Equipment

GLOVES AND OTHER PROTECTIVE CLOTHING RECOMMENDED IF SKIN CONTACT IS APPRECIABLE.

## 7. REACTIVITY DATA

Stability: STABLE

Conditions to Avoid; NOT APPLICABLE

Incompatibility: STRONG OXIDIZERS MAY CAUSE VIOLENT REACTION

Hazardous Decomposition Products: AT TEMPERATURES ABOVE THE MELTING POINT, TOXIC FUMES OR VAPORS MAY BE EMITTED.

### 8. ENVIRONMENTAL

Regulated by DOT? NO

Waste Disposal Method(DISPOSER MUST COMPLY WITH FEDERAL, STATE AND LCCAL DISPOSAL OR DISCHARGE LAWS)
IF HAZARDOUS UNDER 40 CFR 261, SUBPARTS B AND C, MATERIAL MUST BE TREATED OR DISPOSED IN A FACILITY MEETING THE REQUIREMENTS OF 40 CFR 254 OR 265. IF NON-HAZARDOUS, MATERIAL SHOULD BE DISPOSED IN A FACILITY MEETING THE REQUIREMENTS OF 40 CFR 257.

**Special Fire Fighting Precautions** USE NIOSH/MSHA APPROVED SELF-CONTAINED BREATHING APPARATUS AND FULL BODY PROTECTIVE CLOTHING.

#### 4. HEALTH HAZARD INFORMATION

**Primary Routes of Entry** X INHALATION INGESTION

**ABSORPTION** 

Carcinogencity

THIS PRODUCT HAS NOT BEEN LISTED AS A SUSPECT CARCINOGEN BY NTP, IARC OR OSHA.

Acute Overexposure(symptoms and effects) SEVERE SHORT-TERM OVEREXPOSURE MAY LEAD TO CENTRAL NERVOUS SYSTEM DISORDERS, CHARACTERIZED BY DROWSINESS, SEIZURES, COMA AND DEATH. IT SHOULD BE RECOGNIZED THAT EXPOSURES OF THIS MAGNITUDE IN AN INDUSTRIAL ENVIRONMENT ARE EXTREMELY UNLIKELY.

Chronic Overexposure(symptoms and effects) PROLONGED OVEREXPOSURE TO LEAD CAN RESULT IN SYSTEMIC POISONING WITH SYMPTOMS OF METALLIC TASTE, ANEMIA, INSOMNIA, WEAKNESS, CONSTIPATION, ABDOMINAL PAIN, GASTROINTESTINAL DISORDERS, JOINT AND MUSCLE PAIN AND MUSCULAR WEAKNESS AND MAY CAUSE DAMAGE TO THE BLOOD-FORMING, NERVOUS, KIDNEYS AND REPRODUCTIVE SYSTEMS. DAMAGE MAY INCLUDE REDUCED FERTILITY IN BOTH MEN AND WOMEN, DAMAGE TO THE FETUS OF EXPOSED PREGNANT WOMEN, ANEMIA, MUSCULAR WEAKNESS AND KIDNEY DYSFUNCTION.

Medical Conditions Possibly Aggravated by Exposure DISEASES OF THE BLOOD AND BLOOD FORMING ORGANS, KIDNEYS, NERVOUS AND POSSIBLY REPRODUCTIVE SYSTEMS.

## First Aid Procedures

INHALATION: REMOVE FROM EXPOSURE AND CALL A PHYSICIAN. SKIN CONTACT: WASH AFFECTED AREAS WITH SOAP AND WATER. IF BURNS SHOULD OCCUR FROM MOLTEN METAL, TREAT FOR BURN AND GET IMMEDIATE MEDICAL ASSISTANCE. EYE CONTACT: FLUSH EYES WITH WATER POR 15 MINUTES, CALL A PHYSICIAN. INGESTION: INGEST LARGE QUANTITIES OF WATER, CALL A PHYSICIAN.

## 5. PRECAUTIONS/PROCEDURES

OVERHEATING OF ALLOY CAN PRODUCE METAL FUMES AND OXIDES. MACHINING operations such as grinding, sawing or buffing can generate airborn PARTICULATES IN THE WORK AREA. EXPOSURE LEVELS INDICATED IN SECTION 1 ARE RELAVENT TO THESE AND OTHER OPERATIONS.

Normal Handling

USE OF APPROVED RESPIRATORS IS REQUIRED FOR APPLICATIONS WHERE ADEQUATE VENTILATION CANNOT BE PROVIDED. ACTIVITIES WHICH GENERATE DUST OR FUME SHOULD BE AVOIDED. WHEN MELTED, THE TEMPERATURE SHOULD BE KEPT AS LOW AS POSSEDLE.

Spill or Leak

ANY METHOD THAT KEEPS DUST TO A MINIMUM IS ACCEPTABLE. VACUUMING IS PREFERRED. USE OF APPROVED RESPIRATORY PROTECTION WHERE POSSIBILITY OF DUST/FUME EXPOSURE EXISTS. DO NOT USE COMPRESSED AIR FOR CLEANING.

Section V

(Health Hazard Data)

Routes of Entry:

Inhalation? Yes Skin? No Ingestion? Yes Other: None

**Health Hazards (Acute and Chronic)** 

Acute: Weakness, vomiting, loss of appetite, convulsions, stupor and possibly coma.

Chronic: Weakness, insomnia, hypertension, slight irritation of the eyes, headache, possible paralysis. Chronic overexposure to lead may result in damage to blood-forming, nervous, urinary and reproductive system.

California Proposition 65 Warning! This product contains a chemical known to the state of California to cause cancer, and that may cause birth defects or other reproductive harm.

Carcinogenicity: NTP? No IARC Monographs? Yes OSHA Regulated? No Other? No

Formaldehyde formed during the decomposition of rosin flux is listed as a suspected human carcinogen by ACGIH. Lead listed by IARC as 2B.

Signs and Symptoms of Exposure:

Dust, vapor and or fumes may be irritating to skin, eyes and respiratory system.

Medical Conditions Generally Aggravated by Exposure:

Note to physicians: Lead and its inorganic compounds are neurotoxins which may produce neuropathy. Rosin is an allergen.

**Emergency First Aid Procedures** 

Eyes: Flush with copious quantities of water. Get medical attention.

Skin: Wash with soap and water.

Inhalation: Remove from exposure. Get medical attention if experiencing effects of overexposure.

Ingestion: Get immediate medical attention.

Section VI

(Precautions for Safe Handling and Use)

## Steps to be Taken in Case Material is Released or Spilled:

Particulate matter should be stored in dry containers for later disposal. Dust material should be vacuumed or wet swept. Do not use compressed air or dry sweeping as a means of cleaning.

Waste Disposal Method:

Dispose of in accordance with local, state and federal regulations. Consult a licensed hazardous waste company.

Precautions to be Taken in Handling and Storing:

Wash hands with soap and water after handling solder. Store in dry area. Avoid skin contact. Avoid breathing smoke during soldering.

Other Precautions: None known.

Section VII

(Control Measures)

Respiratory Protection (Specify Type):

As specified by 29 CFR 1910.1025 (F) if exposure exceeds PEL.

Ventilation:

Local exhaust: Remove smoke from breathing area. Special: None needed

Mechanical (General): Adequate Other: None needed.

Protective Gloves: Impervious

**Eve Protection:** Face shield or safety glasses

Other Protective Clothing or Egulpment:

Personal clothing and shoes should be protected from contamination. Eye wash station.

Work/Hygenic Practices:

Do not eat, drink or smoke in work areas. Wash hands thoroughly before eating or smoking.

Solder Paste 63Sn/37Pb Ultraprint 78 (86-90% Alloy)

# SECTION V.(A) HEALTH HAZARD DATA (Symptoms/Effects Of Overexposure)

LEAD: Exposure to high levels of airborne or ingested lead may produce symptoms of anemia, insomnia, weakness, constipation, nausea and abdominal pain. Overexposure may cause damage to blood-forming, nervous, reproductive, intestinal and urinary systems. For occupational exposure requirements see 29 CFR 1910.1025 Lead Standard and its appendices.

CHRONIC TOXICITY: Women of child bearing age should avoid exposure to lead and its inorganic compounds due to post-natal effects. Lead can cause potential injury to a developing fetus and possible effects on reproduction. For overexposure to TIN see Section X.

LISTED CARCINOGENS: None of the metal elements of this product are confirmed as human carcinogens at this time by NTP, IARC, or OSHA. IARC classifies lead and some lead compounds as 2B carcinogens (possibly carcinogenic to humans).

MEDICAL CONDITIONS POSSIBLY AGGRAVATED: See Section X.

# SECTION V.(B) HEALTH HAZARD DATA (Emergency and First Aid Procedures)

INHALATION

If inhaled when heated to soldering temperatures, remove individual to fresh air. If breathing is difficult administer oxygen and consult a physician.

INGESTION

Call a physician or Poison Control Center immediately. Never give anything by mouth to an unconscious person.

SKIN CONTACT Wash exposed area with soap and water. Remove contaminated clothing.

· EYE CONTACT Flush with large amounts of water, lifting upper and lower lids occasionally. Get medical attention.

Solder Paste 63Sn/37Pb Ultraprint 78 (86-90% Alloy)

## SECTION VII. SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED

Material is a heavy viscous paste. Scoop into appropriate containers. Clean with degreasing detergent or solvent such as alcohol.

WASTE DISPOSAL Reclaim (Recycle) solder alloy portion of paste or store in

sealed containers for later disposal.

EPA Hazardous waste classification (D008).

Must be in accordance with Federal, State and Local Laws and

Regulations

## SECTION VIII. SPECIAL PROTECTION

RESPIRATORY If threshold limit value is exceeded or ventilation is not

adequate to remove smoke from the breathing zone, then a

NIOSH/MSHA approved, cartridge type respirator for organic fume

should be worn.

EYEWEAR

Safety glasses are recommended. Eye bath sould be located

near work site.

CLOTHING/

GLOVES

Protective gloves or chemically resistant finger cots are recommended. Finger cots should not be re-used when

contaminated.

VENTILATION

Provide sufficient mechanical (general and/or local exhaust)

ventilation to maintain exposure levels below TLVs.

## SECTION IX. SPECIAL PREGAUTIONS

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING

Read all container labeling. Food and drink should not be consumed or tobacco products used, nor cosmetics applied in areas where solder paste may be used. Always wash hands after handling solder paste and before eating, drinking or smoking.

Material should be stored refrigerated upon receipt at 34 deg F to 45 deg F.

OTHER PRECAUTIONS:

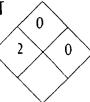

MOR 001255

Containers: Since empty containers may retain product residues (vapor, liquid, or solid) all labeled hazard precautions must be observed. FOR INDUSTRIAL USE ONLY. KEEP OUT OF REACH OF CHILDREN. DO NOT TAKE INTERNALLY.

Solder Paste 63Sn/37Pb Ultraprint 78 (86-90% Alloy)

# SECTION X. ADDITIONAL INFORMATION

HEALTH HAZARD DATA: (continued)

MEDICAL CONDITIONS POSSIBLY AGGRAVATED:

Diseases of the blood and blood-forming organs, kidneys, nervous and possibly reproductive systems. Chemical hypersensitivity and diseases of the lungs.

CHRONIC TOXICITY:

TIN: Overexposure to dust or fume may cause irritation of the skin

and mucous membranes, and may result in a benign pneumoconiosis

(stannosis).

OVEREXPOSURE TO ROSIN:

INHALATION: Exposure to rosin fume may cause dizziness or headache. May also cause an allergic reaction such as throat and respiratory irritation or damage.

INGESTION: Essentially non-hazardous at room temperature. (NOT likely to

occur.)

SKIN: Repeated exposure to rosin fume may cause a skin rash. EYES: Can cause irritation. Not a primary irritant. Can be abrasive.

Section V

(Health Hazard Data)

Routes of Entry:

Inhalation? Yes Skin? No Ingestion? Yes Other: None

Health Hazards (Acute and Chronic)

Acute: Weakness, vomiting, loss of appetite, convulsions, stupor and possibly coma.

Chronic: Weakness, insomnia, hypertension, slight irritation of the eyes, headache, possible paralysis. Chronic overexposure to lead may result in damage to blood-forming, nervous, urinary and reproductive system.

California Proposition 65 Warning! This product contains a chemical known to the state of California to cause cancer, and that may cause birth defects or other reproductive harm.

Carcinogenicity: NTP? No IARC Monographs?Yes OSHA Regulated? No Other? No

Formaldehyde formed during the decomposition of rosin flux is listed as a suspected human carcinogen by ACGIH Lead listed by IARC as 2B.

Signs and Symptoms of Exposure:

Dust, vapor and or fumes may be irritating to skin, eyes and respiratory system.

Medical Conditions Generally Aggravated by Exposure:

Note to physicians: Lead and its inorganic compounds are neurotoxins which may produce neuropathy.Rosin is an allergen.

**Emergency First Aid Procedures** 

Eyes: Flush with copious quantities of water. Get medical attention.

Skin: Wash with soap and water.

Inhalation: Remove from exposure. Get medical attention if experiencing effects of overexposure.

Ingestion: Get immediate medical attention.

Section VI

(Precautions for Safe Handling and Use)

## Steps to be Taken in Case Material is Released or Spilled:

Particulate matter should be stored in dry containers for later disposal. Dust material should be vacuumed or wet swept. Do not use compressed air or dry sweeping as a means of cleaning.

Waste Disposal Method:

Dispose of in accordance with local, state and federal regulations. Consult a licensed hazardous waste company.

## Precautions to be Taken in Handling and Storing:

Wash hands with soap and water after handling solder. Store in dry area. Avoid skin contact. Avoid breathing smoke during soldering. Shelf life of 10 years if stored in a dry area at room temperature.

Other Precautions: None known.

Section VII

(Control Measures)

## Respiratory Protection (Specify Type):

As specified by 29 CFR 1910.1025 (F) if exposure exceeds PEL.

Ventilation:

Local exhaust: Remove smoke from breathing area. Special: None needed

Mechanical (General): Adequate Other. None needed.

Protective Gloves: Impervious

Eye Protection: Face shield or safety glasses

## Other Protective Clothing or Equipment:

Personal clothing and shoes should be protected from contamination. Eye wash station.

## Work/Hygenic Practices:

Do not eat, drink or smoke in work areas. Wash hands thoroughly before eating or smoking.

Data Propared:

## SECTION 7 - PROCEDURES FOR MATERIAL CONTROL

iteps to be Taken If Material Is Spilled Or Released: Melted solder will solidify on cooling and can be acraped up. Use caution to avoid breathing fumes if a gas torch is used to cut up large pisces.

Waste Disposal Methods:

Solder can be recisimed.

CAUTION: Empty containers may contain product residue. Observe all label precautions.

Precautions to be Taken in Handling and Storage: Store away from sources of sulfur. Wash hands after handling solder containing lead before eating or smoking. Avoid breathing smoke / fumes generated during soldering. Do not place flux cored solder into a hot solder pot because the flux may ignite.

## SECTION 8 - PROTECTIVE MEASURES

Respiratory Protection: Usually not required. When ventilation is not sufficient to remove fumes from the breathing zone, a certridge type respirator should be worn.

Protective Gloves: Usually not required.

Eye Protection: When soldering, use goggles or face shield.

ventilation to be used:

Provide adequate exhaust ventilation (general and / or local) to meet TLV requirements

er Protective Clothing and Equipment: None.

Hygienic Work Practices: Wash hands thoroughly after handling solder containing lead before eating or smoking.

## SECTION 9 - ADDITIONAL INFORMATION

If the solder contains lead, these presentions are applicable.

This product contains lead which is known to the State of California to cause cancer, birth defects or other reproductive harm. Lead and its compounds have been placed in Class B2, probably carcinogenic to humans by USEPA.

IARC has placed lead and its compounds in Class 2B, possibly carcinogenic to humans.

### HAZARDS IDENTIFICATION

Toxicity:

Skin and eye irritant. Moderately toxic ingestion.

ingestion.
When heated to temperatures above 300°F (150°C) in the presence of air, this product can form formaldehyde vapors. Formaldehyde is a potential cancer hazard and a known skin and respiratory sensitizer. Vapors irritate eyes, nose and throat. Safe handling conditions may be maintained by keeping vapor concentrations below the OSHA permissible limit for formaldehyde. Skin, ingestion, inhalation.

Primary Routes of Entry: Signs and Symptoms of Exposure:

Methyl ethyl ketoxime produced during cure is toxic and irritates eyes, nose and throat.

Existing Conditions Aggravated by Exposure: None known

| CAS Number    | Wtt | Component                                  | Exposure Limits                                                                                          |
|---------------|-----|--------------------------------------------|----------------------------------------------------------------------------------------------------------|
| 068909206     | 26  | Trimethylated silica                       | Dow Corning guide: 5 mg/m3 Ceiling (as dust).                                                            |
| 068988896     | 7   | Dimethylvinylated and trimethylated silica | Dow Corning guide: 5 mg/m3 Ceiling (as dust).                                                            |
| None<br> <br> | 3   | Silylated titanium<br>dioxide              | Observe titanium dioxide<br>limits: OSHA PEL (final<br>rule) and ACGIH TLV: TWA<br>10 m g/m3 total dust. |

|Comments: The above components are hazardous as defined in 29 CFR 1910.1200.

## SECTION 3. EFFECTS OF OVEREXPOSURE

### Acute Effects

Eye: Direct eye contact may cause temporary discomfort with mild redness

and dryness similar to windburn.

Skin: A single prolonged exposure (24 to 48 hours) causes no known adverse

effect.

|Inhalation: No irritation to eyes and respiratory passages. No injury is likely|

from relatively short exposures of less than 8 hours.

Oral: Small amounts transferred to the mouth by fingers during use, etc.,

should not injure. Swallowing large amounts may cause digestive dis-

comfort.

Page 2

#### SILASTIC(R) E RTV SILICONE RUBBER BASE

Repeated Exposure Effects

Skin: None Known.

Inhalation: None Known.

Oral:

None Known.

## Special Hazards

This material contains the following components with the special hazards listed below.

Carcinogens

None Known

Teratogens

None Known

Mutagens

None Known

Reproductive Toxins

None Known

Sensitizers

None Known

Comments: When heated to temperatures above 180 degrees C in the presence of air, product can form formaldehyde vapors. Formaldehyde is a potential cancer hazard, a known skin and respiratory sensitizer; and an irritant to the eyes, nose, throat, skin, and digestive system. Safe handling conditions may be maintained by keeping vapor concentrations within the OSHA Permissible Exposure Limit for formaldehyde.

|The above listed potential effects of overexposure are based on actual data, results of studies performed upon similar compositions component data and/or expert review of the product.

## SECTION 4. FIRST AID MEASURES

Immediately flush with water.

|Skin:

No first aid should be needed.

Inhalation: No first aid should be needed.

# DOW CORNING CORPORATION MATERIAL SAFETY DATA SHEET

Page 3

#### SILASTIC(R) E RTV SILICONE RUBBER BASE

Oral: No first aid should be needed.

Comments: Treat symptomatically.

\_\_\_\_\_\_\_

## SECTION 5. FIRE FIGHTING MEASURES

| Flash Point (Closed Cup): 212.00 DEGREE F / 100.00 DEGREE C

Autoignition Temperature: Not Determined

Flammability Limits in Air: Not Determined

Extinguishing Media: Water spray. Carbon dioxide (CO2). Dry chemical.

Foam. Water can be used to cool fire exposed con-

tainers.

Fire Fighting Procedures: Self-contained breathing apparatus and protective

clothing should be worn in fighting fires involving

chemicals.

Unusual Fire Hazards: None

## | Hazardous Decomposition Products:

|Thermal breakdown of this product during fire or very high heat conditions may | evolve the following hazardous decomposition products: Carbon oxides and traces | of incompletely burned carbon compounds. Silicon dioxide. Formaldehyde.

## SECTION 6. ACCIDENTAL RELEASE MEASURES

|Containment/Clean-up: Disposal of collected product, residues, and cleanup materials may be governmentally regulated. Observe all applicable local, state, and federal waste management regulations. Mop up, or wipe up, or soak up with absorbent and contain for salvage or disposal. Clean any remaining slippery surfaces by appropriate techniques, such as: several moppings or swabbings with appropriate solvents; washing with mild, caustic detergents or solutions; or high pressure steam for large areas. For nonsilicones, use typical industrial cleaning materials. Observe any safety precautions applicable to the cleaning material being used. For large spills, provide | diking or other appropriate containment to keep material from spreading. Observe all personal protection equipment recommendations described in Sections 5 and 8. Local, state, and federal reporting requirements may apply to spills or releases of this material into the environment. See applicable regulatory compliance information in Section 15.

NOTE: See Section 8 for Personal Protective Equipment for Spills

# DOW CORNING CORPORATION MATERIAL SAFETY DATA SHEET

Page 4 SILASTIC(R) E RTV SILICONE RUBBER BASE SECTION 7. HANDLING AND STORAGE |Handling: No special precautions. |Storage: No special precautions. Use reasonable care. SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION Engineering Controls Local exhaust: None should be needed General Ventilation: Recommended Personal Protective Equipment For Routine Handling Eyes: Use proper protection - safety glasses as a minimum. Skin: Washing at mealtime and end of shift is adequate. Suitable Gloves: No special protection needed. Inhalation: No respiratory protection should be needed. Suitable Respirator: None should be needed. Personal Protective Equipment For Spills Use proper protection - safety glasses as a minimum. Eye: skin: Washing at mealtime and end of shift is adequate. |Inhalation/ Suitable Respirator: No respiratory protection should be needed. Precautionary Measures: Avoid eye contact. Use reasonable care. Comments: None Note: These precautions are for room temperature handling. Use at elevated temperature, or aerosol/spray applications, may require added precautions.

Page 5 SILASTIC(R) E RTV SILICONE RUBBER BASE SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES Physical form: Viscous Liquid Color: White Odor: Not reported Specific Gravity @ 25C: 1.14 Viscosity: 800.00 P
Freezing/Melting Point: Not Applicable. Boiling Point: Not Available. Vapor Pressure @ 25C: Not Determined. Vapor Density: Not Determined. Solubility in Water: Not Determined. pH: Not Applicable. Volatile content: < 5.00 % Note: The above information is not intended for use in preparing product specifications. Contact Dow Corning before writing specifications. SECTION 10. STABILITY AND REACTIVITY Chemical Stability: Stable. , Hazardous Polymerization: Hazardous polymerization will not occur. !Conditions to Avoid: None. |Materials to Avoid: Oxidizing material can cause a reaction. |Comments: None SECTION 11. TOXICOLOGICAL INFORMATION OPTIONAL SECTION - Complete information not yet available. SECTION 12. ECOLOGICAL INFORMATION OPTIONAL SECTION - Complete information not yet available.

### 3. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW:

This section not in use POTENTIAL HEALTH EFFECTS:

INGESTION:

MAY BE harmful if swallowed.

SKIN CONTACT:

UNCURED PRODUCT WILL IRRITATE LIPS, GUHS AND TONGUE.

UNCURED PRODUCT CONTACT MAY IRRITATE THE SKIN.

INHALATION:

CAUSES MILD RESPIRATORY IRRITATION.

APPLIES ONLY IN UNCURED STATE.

EYE CONTACT:

UNCURED PRODUCT CONTACT IRRITATES EYES.

MEDICAL CONDITIONS AGGRAVATED:

NONE KNOWN.

SUBCHRONIC (TARGET ORGAN) EFFECTS:

NONE KNOWN.

CHRONIC EFFECTS/CARCINOGENICITY:

This product or one of its ingredients present 0.1% or more is NOT listed as a carcinogen or suspected carcinogen by

Provided By Electrical Insulation Suppliers Inc.

```
NTP, IARC, or OSHA.
```

PRODUCTS/INGREDIENTS

This space reserved for special use.

PRINCIPLE ROUTES OF EXPOSURE:

Eves.

DERMAL · SKIN

OTHER:

METHANOL RELEASED DURING CURING. THIS PRODUCT CONTAINS METHYL-POLYSILOXANES WHICH CAN GENERATE FORMALDEHYDE AT APPROXIMATELY 300 DEGREES FARENHEIT (150°C) AND ABOVE, IN ATMOSPHERES WHICH CONTAIN OXYGEN. FORMALDEHYDE IS A SKIN AND RESPIRATORY SENSITIZER, EYE AND THROAT IRRITANT, ACUTE TOXICANT, AND POTENTIAL CANCER HAZARD. AN MSDS FOR FORMALDEHYDE IS AVAILABLE FROM GE SILICONES.

4. FIRST AID MEASURES

#### INGESTION:

RINSE MOUTH WITH WATER SEVERAL TIMES.

SKIN:

TO CLEAN FROM SKIN, REMOVE COMPLETELY WITH A DRY CLOTH OR PAPER TOWEL, BEFORE WASHING WITH DETERGENT AND WATER. GET MEDICAL ATTN. IF IRRITATION PERSISTS.

INHALATION:

MOVE PERSON TO FRESH AIR.

EYES:

In case of contact, immediately flush eyes with plenty of water for at least 15 minutes and get medical attention IF IRRITATION PERSISTS.

NOTE TO PHYSICIAN:

None Known.

#### 5. FIRE FIGHTING MEASURES

FLASH POINT: NA (C) NA (F) METHOD NA **IGNTIION TEMP** NA (C) NA (F) FLAMMABLE LIMITS IN AIR - LOWER(%): NA FLAMMABLE LIMITS IN AIR . UPPER(%): SENSITIVITY TO MECHANICAL IMPACT (Y/N): SENSITIVITY TO STATIC DISCHARGE: Sensitivity to static discharge is NOT EXPECTED. EXTINGUISHING MEDIA: All standard firefighting media.

SPECIAL FIREFIGHTING PROCEDURES:

NONE KNOWN..

### 6. ACCIDENTAL RELEASE MEASURES

ACTION TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED:

Wipe, scrape or soak up in an inert material and put in a container for disposal.

WASH WALKING SURFACES WITH DETERGENT AND WATER TO REDUCE SLIPPING HAZARD. WEAR PROPER PROTECTIVE EQUIPMENT AS SPECIFIED IN THE PRO-TECTIVE EQUIPMENT SECTION.

7. HANDLING AND STORAGE

### PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE:

AVOID CONTACT WITH SKIN AND EYES. CAUTION! COMBUSTIBLE. REMOVE CON-TACT LENSES BEFORE USING SEALANT. DO NOT HANDLE LENSES UNTIL ALL SEALANT HAS BEEN CLEANED FROM THE FINGERTIPS, NAILS AND CUTICLES RESIDUAL SEALANT WAY REMAIN ON FINGERS FOR SEVERAL DAYS AND TRANSFER TO LENSES AND CAUSE SEVERE EYE IRRITATION. PRODUCT RELEASES METHANOL DURING APPLICATION AND CURING. (METHANOL TLV=200 PPM). UNCURED PRODUCT CONTACT IRRITATES EYES. UNCURED PRODUCT CONTACT MAY IRRITATE SKIN.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

#### ENGINEERING CONTROLS:

Eyewash stations.

Use in a well ventilated area.

#### SILASTIC (R) E RTV SILICONE RUBBER CURING AGENT

Skin: None Known.

Inhalation: None Known.

Oral:

None Known.

### Special Hazards

This material contains the following components with the special hazards listed below.

#### Carcinogens

None Known

Teratogens

None Known

### Mutagens

None Known

Reproductive Toxins

None Known

#### Sensitizers

None Known

Comments: When heated to temperatures above 180 degrees C in the presence of air, product can form formaldehyde vapors. Formaldehyde is a potential cancer hazard, a known skin and respiratory sensitizer; and an irritant to the eyes, nose, throat, skin, and digestive system. Safe handling conditions may be maintained by keeping vapor concentrations within the OSHA Permissible Exposure Limit for formaldehyde.

The above listed potential effects of overexposure are based on actual data, results of studies performed upon similar compositions component data and/or expert review of the product.

------

### SECTION 4. FIRST AID MEASURES

Eye: Immediately flush with water.

Skin: No first aid should be needed.

Inhalation: No first aid should be needed.

Oral: No first aid should be needed.

MOR 001283

Page 3

SILASTIC (R) E RTV SILICONE RUBBER CURING AGENT

Comments: Treat symptomatically.

SECTION 5. FIRE FIGHTING MEASURES

|Flash Point (Closed Cup):

> 213.98 DEGREE F / 101.10 DEGREE C

Autoignition Temperature:

Not Determined

|Flammability Limits in Air: Not Determined

Extinguishing Media:

Water spray. Carbon dioxide (CO2). Dry chemical. Foam. Water can be used to cool fire exposed con-

tainers.

|Fire Fighting Procedures:

Self-contained breathing apparatus and protective clothing should be worn in fighting fires involving chemicals. Determine the need to evacuate or isolate the area according to your local emergency

plan.

Unusual Fire Hazards:

None

### Hazardous Decomposition Products:

|Thermal breakdown of this product during fire or very high heat conditions may evolve the following hazardous decomposition products: Formaldehyde. Hydrogen. Carbon oxides and traces of incompletely burned carbon compounds. Silicon |dioxide.

### SECTION 6. ACCIDENTAL RELEASE MEASURES

|Containment/Clean-up: Disposal of collected product, residues, and cleanup materials may be governmentally regulated. Observe all applicable local, state, and federal waste management regulations. Determine whether to evacuate or isolate the area depending on such specific factors as site location, population density, traffic flow, size of the release or spill, weather conditions, the material's hazards and risks to people, and whether a fire is underway or possible. Mop up, wipe up, or soak up with absorbent and place in a vented container for salvage or disposal. Clean any remaining slippery surfaces by appropriate techniques, such as: several moppings or swabbings with appropriate solvents; washing with mild, caustic detergents or solutions; or high pressure steam for large areas. For nonsilicones, use typical industrial cleaning materials. Observe any safety precautions applicable to the cleaning material being used. For large spills, provide diking or other appropriate containment to keep material from spreading. Observe all personal protection equipment recomPage 4

#### SILASTIC (R) E RTV SILICONE RUBBER CURING AGENT

mendations described in Sections 5 and 8. Local, state, and | federal reporting requirements may apply to spills or releases of this material into the environment. See applicable | regulatory compliance information in Section 15.

| NOTE: See Section 8 for Personal Protective Equipment for Spills

.................

SECTION 7. HANDLING AND STORAGE

|Handling: No special precautions.

|Storage: Product evolves minute quantities of flammable hydrogen gas. Do not repackage or store in unvented containers. Adequately ventilate the work area to maintain vapors well below established flammability limits and exposure guidelines. Keep container closed and store away from wa-

ter or moisture.

SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Engineering Controls

Local exhaust: None should be needed

General Ventilation: Recommended

Personal Protective Equipment For Routine Handling

|Eyes: Use proper protection - safety glasses as a minimum.

Skin: Washing at mealtime and end of shift is adequate.

|Suitable Gloves: No special protection needed.

Inhalation: No respiratory protection should be needed.

Suitable Respirator: None should be needed.

Personal Protective Equipment For Spills

Eye: Use proper protection - safety glasses as a minimum.

Skin: Washing at mealtime and end of shift is adequate.

|Inhalation/

Suitable Respirator: No respiratory protection should be needed.

| Precautionary Measures: Avoid eye contact. Use reasonable care.

Page 5 SILASTIC(R) E RTV SILICONE RUBBER CURING AGENT Comments: None Note: These precautions are for room temperature handling. Use at elevated temperature, or aerosol/spray applications, may require added precautions. SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES Physical form: Liquid Color: White Odor: Not reported Specific Gravity @ 25C: 0.99
Viscosity: 3200.00 CST Freezing/Melting Point: Not Applicable. Boiling Point: Not Available. Vapor Pressure @ 25C: < 5.00 MM HG Vapor Density: Not Determined. Solubility in Water: Not Determined. pH: Not Applicable. Volatile content: 2.00 % Note: The above information is not intended for use in preparing product specifications. Contact Dow Corning before writing specifications. SECTION 10. STABILITY AND REACTIVITY Chemical Stability: Stable. Hazardous Polymerization: Hazardous polymerization will not occur. Conditions to Avoid: None. |Materials to Avoid: Oxidizing material can cause a reaction. Comments: Water, alcohols, acidic or basic materials, and many metals or metallic compounds, when in contact with product, liberate flammable hydrogen gas, which can form explosive mixtures in air. SECTION 11. TOXICOLOGICAL INFORMATION \_\_\_\_\_ OPTIONAL SECTION - Complete information not yet available. SECTION 12. ECOLOGICAL INFORMATION

### SECTION IV. FIRE AND EXPLOSION HAZARD DATA

FLAMMABLE LIMITS IN AIR: LEL: 1.0 **UEL: 9.5** (VOLUME %)

FLASH POINT: N/A

SPECIAL FIRE FIGHTING PROCEDURES: CHLORINATED HYDROCARBON FORM HCL, HF AND TRACES OF PHOSGENE UPON PYROLYSIS.

UNUSUAL FIRE & EXPLOSION HAZARDS: AEROSOLS MAY RUPTURE VIOLENTLY AT TEMPERATURES ABOVE 120' F.

MATERIAL SAFETY DATA SHEET SLIDE PRODUCTS, INC. 40616T

PAGE 2

#### SECTION V. REACTIVITY DATA

STABILITY: STABLE
INCOMPATIBILITY (MATERIALS TO AVOID): NONE KNOWN
HAZARDOUS COMBUSTION BY-PRODUCTS: SEE SECTION IV
HAZARDOUS POLYMERIZATION: WILL NOT OCCUR
CONDITIONS TO AVOID: TEMP. ABOVE 120' F. - DIRECT SUNLIGHT

#### SECTION VI. HEALTH HAZARD DATA

THRESHOLD LIMIT VALUE: 100 PPM

### \* EFFECTS OF OVEREXPOSURE \*

INGESTION (SWALLOWING): N/A

INHALATION: GIDDINESS, NAUSEA, POSSIBLE NARCOSIS

SKIN CONTACT: DEFAITING OF SKIN EYE CONTACT: TEMPORARY IRRITATION

### \* EMERGENCY AND FIRST AID PROCEDURES \*

SKIN: WASH WITH SOAP AND WATER, APPLY HAND CREAM INHALATION: REMOVE TO FRESH-AIR LOCATION AWAY FROM EXPOSURE EYES: RINSE WITH PLENTY COOL CLEAN WATER UNTIL IRRITATION SUBSIDES

#### SECTION VII. SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED: REMOVE LEAKING CONTAINER TO OUTSIDE DISPOSAL SITE.

WASTE DISPOSAL METHOD: EMPTY FULLY, INCLUDING GAS PRESSURE. DO NOT PUNCTURE OR INCINERATE. CAN MAY BE RECYCLED OR ALTERNATIVELY REMOVED TO A SANITARY LANDFILL - CHECK APPLICABLE REGULATIONS.

### SECTION VIII. SPECIAL PROTECTION INFORMATION

RESPIRATORY PROTECTION: (SPECIFY TYPE): NOT NEEDED WITH ADEQUATE VENTILATION VENTILATION: ADEQUATE VENTILATION RECOMMENDED PROTECTIVE GLOVES: RECOMMENDED BUT NOT REQUIRED EYE PROTECTION: PROPER EYE CARE IS NEEDED IN ALL INDUSTRIAL OPERATIONS OTHER PROTECTIVE EQUIPMENT: AS REQUIRED BY YOUR COMPANY

### SECTION IX. SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING: STORE INDOORS AWAY FROM HEAT SOURCES OR DIRECT SUNLIGHT - DO NOT PUNCTURE OR INCINERATE - DO NOT DROP!

OTHER PRECAUTIONS: AVOID OVER-SPRAYING ONTO FLOORS OR SLIPPERY SURFACE MAY RESULT.

MATERIAL SAFETY DATA SHEET SLIDE PRODUCTS, INC. 40616T

PAGE 3

#### SECTION X. EFFECTS OF PROLONGED EXPOSURE

TRICHLOROETHYLENE: PROLONGED EXPOSURE MAY CAUSE SKIN IRRITATION. MAY BE ABSORBED THROUGH SKIN TO SOME DEGREE. EXCESSIVE INHALATION CAUSES IRRITATION TO UPPER RESPIRATORY TRACT AND MAY INCREASE SENSITIVITY TO EPINEPHRINE, AND INCREASED MYOCARDIAL IRRITABILITY (IRREGULAR HEART BEATS). MINIMAL ANESTHETIC EFFECTS AT LEVELS OF 200-400 PPM, DIZZINESS AT HIGHER LEVELS: AT 1000-2000 PPM UNCONSCIOUSNESS AND DEATH. CONCENTRATIONS OVER 6000 PPM ARE IMMEDIATELY HAZARDOUS TO LIFE. LC50 FOR RATS IS 12,500 PPM FOR 4 HOURS. ALCOHOL WILL ENHANCE ADVERSE EFFECTS. EXCESSIVE EXPOSURE MAY CAUSE LIVER OR KIDNEY EFFECTS: LOWER CONCENTRATIONS ABOVE ACCEPTED GUIDELINES MAY CAUSE CENTRAL OR PERIPHERAL NERVOUS SYSTEM EFFECTS.

#### SECTION XI. CARCINOGENIC HAZARD

PROLONGED EXPOSURE ABOVE THE OSHA PERMISSIBLE LIMITS MAY RESULT IN LIVER AND KIDNEY DAMAGE. TRICHLOROETHYLENE HAS BEEN EXTENSIVELY STUDIED FOR CHRONIC EFFECTS IN ANIMALS. WHILE THERE ARE STUDIES IN WHICH TUMORS WERE INDUCED IN MICE, THERE IS NO DOCUMENTED EVIDENCE THAT EXPOSURE TO TRICHLOROETHYLENE PRODUCES CANCER IN HUMANS. THRICHLOROETHYLENE IS LISTED IN GROUP 2A BY IARC BUT IS NOT LISTED BY NTP OR OSHA.

### SECTION XII. SARA TITLE III REPORTING

THIS PRODUCT CONTAINS THE FOLLOWING CHEMICALS REQUIRED TO BE REPORTED UNDER SARA TITLE III, SECTION 313: TRICHLOROETHYLENE, CAS NUMBER 79-01-6 REPORTING REQUIREMENTS UNDER SECTION 304 (CERCLA) ARE 1000 POUNDS OR OVER.

THIS DATA IS OFFERED IN GOOD FAITH AS TYPICAL VALUES AND NOT AS A PRODUCTS SPECIFICATION. NO WARRANTY, EXPRESS OR IMPLIED, IS HEREBY MADE. THE RECOMMENDED INDUSTRIAL HYGIENE AND SAFE HANDLING PROCEDURES ARE BELIEVED TO BE GENERALLY APPLICABLE. HOWEVER, EACH USER SHOULD REVIEW THESE RECOMMENDATIONS IN THE SPECIFIC CONTEXT OF THE INTENDED USE AND DETERMINE WHETHER THEY ARE APPROPRIATE. THE INFORMATION CONTAINED IN THIS MATERIAL SAFETY DATA SHEET IS BELIEVED TO BE CORRECT AS OF THIS DATE. THE REGULATIONS PROMULGATED BY OSHA FOR HAZARD COMMUNICATION, 29 CFR 1910.1200, AS WELL AS SEVERAL STATE AND LOCAL LAWS AND REGULATIONS, HAVE BEEN CONSULTED IN PREPARING THIS M.S.D.S.

### ÍSECTION VIII - SPECIAL PRECAUTIONS AND SPILL/LEAK PROCEDURES

Precautions to be taken in handling/storage:

Store in a refrigerated space, away from bases or oxidizers. Do not store

at extreme temperatures.

Do not store near sources of ignition. Keep container closed when not in use.

Other Precautions: Do not consume food or drinks near product.

Steps to be taken in case material is spilled or released:

Wipe, scrape, or soak up in an inert non-combustible material and put in a container for disposal. This solder paste contains lead, and must be disposed of according to all local, state, and federal regulations.

Waste Disposal Methods:

Dispose of according to all local, state, and federal regulations.

Proper Shipping Name:

Solder Paste

Flammability: 0

Reactivity: 1

Symbol: Not applicable

Potential Health Effects:

Eve Contact: Causes severe burns

Skin Contact: Causes severe burns May cause: scarring

Skin Absorption: None reported Target Organs: None reported

Ingustion: Causes: severe burns May cause: abdominal pain collapse death

Target Organs: None reported

Inhalation: Causes: severe burns May cause: pneumonitis

Target Organs: None reported

Medical Conditions Aggravated: Pre-existing: Eye conditions Skin conditions Respiratory conditions

Chronic Effects: Chronic overexposure may cause destruction of any tissue contacted

Cancer / Reproductive Toxicity Information:

This product does NOT contain any OSHA listed cardinogens.

This product does NOT contain any IARC listed chemicals.

This product does NOT contain any NTP listed chemicals.

Additional Cancer / Reproductive Toxicity Information: None reported Toxicologically Synergistic Products: None reported

### 4. FIRST AID

Eve Contact: Immediately flush eyes with water for 15 minutes. Call physician.

Skin Contact (First Aid): Wash skin with plenty of water for 15 minutes. Remove contaminated clothing. Call physician immediately.

Ingestion (First Aid): Do not induce vomiting. Give 1-2 glasses of water. Never give anything by mouth to an unconscious person. Call physician immediately.

Inhalation: Remove to fresh air. Give artificial respiration if necessary. Call physician,

### 5. FIRE FIGHTING MEASURES

Flammable Properties: Not Flammable, but reacts with most metals to form flammable hydrogen gas. Flush Point: Not applicable

Method: Not applicable Flammability Limits:

Page 3 Date Printed 2/9/99 MSDS No: M00646

Lower Explosion Limits: Not applicable Upper Explosion Limits: Not applicable Autoignition Temperature: Not applicable

Hazurdous Combustion Products: This material will not burn.

Fire / Explosion Hazards: This product will not burn or explode. Contact with metals gives off hydrogen gas

which is flammable

Static Discharge: None reported. Mechanical Impact: None reported

Extinguishing Media: Use media appropriate to surrounding fire conditions

Fire Fighting Instruction: As in any fire, wear self-contained breathing apparatus pressure-demand and full

protective gear. Evacuate area and fight fire from a safe distance.

### 6. ACCIDENTAL RELEASE MEASURES

Spill Response Notice:

Only persons properly qualified to respond to an emergency involving hazardous substances may respond to a spill according to federal regulations (OSHA 29 CFR 1910.120(a)(v)) and per your company's emergency response plan and guidelines/procedures. See Section 13, Special Instructions for disposal assistance, Containment Technique: Releases of this material may contaminate the environment. Absorb spilled liquid with non-reactive sorbent material. Stop spilled material from being released to the environment. Dike the spill to contain material for later disposal.

Clean-up Technique: Cover spilled material with a dry acid, such as citric or boric. Scoop up slurry into a large beaker. Adjust to a pH between 6 and 9 with an acid, such as sulfuric or citric. Flush reacted material to the drain with a large excess of water. Decontaminate the area of the spill with a soap solution.

Evacuation Procedure: Evacuate general area (50 foot radius or as directed by your facility's emergency response plan) when: a gallon or more of liquid is spilled. If conditions warrant, increase the size of the evacuation.

Special Instructions (for accidental release): Product is regulated as RCRA hazardous waste. Product is regulated as a hazardous water pollutant.

304 EHS RQ (40 CFR 355): Not applicable

D.O.T. Emergency Response Guide Number: 154.

### 7. HANDLING / STORAGE

Hundling: Avoid contact with eyes skin clothing Do not breathe mist or vapors. Wash thoroughly after

handling. Maintain general industrial hygiene practices when using this product.

Storage: Store in a cool, dry place. Keep away from: heat acids / acid fumes.

Flammability Class: Not applicable

### 8. EXPOSURE CONTROLS / PROTECTIVE EQUIPMENT

Engineering Controls: Have an eyewash station nearby. Have a safety shower nearby. Maintain general industrial hygiene practices when using this product.

Personal Protective Equipment:

Eye Protection: safety glasses with top and side shields Skin Protection: disposable latex gloves lab coat

Inhalation Protection: adequate ventilation

Precautionary Measures: Avoid contact with: eyes skin clothing Do not breathe: mist/vapor Wash thoroughly after handling. Use with adequate ventilation. Keep away from: acids/acid fumes heat

TLV: Not established PEL: Not established

Page 4
Date Printed 2/9/99
MSDS No: M00646

### 9. PHYSICAL / CHEMICAL PROPERTIES

Appearance: Clear, colorless liquid

Physical State: Liquid

Molecular Weight: Not applicable

Odor: None pH: 14

Vupor Pressure: Not determined

Vapor Density (air = 1): Not determined

Boiling Point: ~ 100°C (212°F)

Melting Point: Not determined

Steel: 0.00 in/yr (0.00 mm/yr)

Aluminum: > 20 in/yr (> 508 mm/yr)

### 10. STABILITY / REACTIVITY

Chemical Stability: Stable when stored under proper conditions.

Conditions to Avoid: Evaporation Extreme temperatures

Reactivity / Incompatibility: Incompatible with: acids halogenated organic compounds nitro compounds

inctals

Hazardous Decomposition: None reported Hazardous Polymerization: Will not occur.

### 11. TOXICOLOGICAL INFORMATION

Product Toxicological Data:

LD50: None reported

LC50: None reported

Dermal Toxicity Data: None reported

Skin and Eye Irritation Data: None reported

Mutation Data: None reported

Reproductive Effects Data: None reported

Ingredient Toxicological Data: Sodium Hydroxide: Oral rat LDLo = 500 mg/kg; skin and eye irritation test

data reported in RTECS.

### 12. ECOLOGICAL INFORMATION

Product Ecological Information: --

No ecological data available for this product.

Ingredient Ecological Information: -

No ecological data available for the ingredients of this product.

Page 5
Date Printed 2/9/99
MSDS No: M00646

### 13. DISPOSAL CONSIDERATIONS

EPA Waste ID Number: D002

Special Instructions (Disposal): Dilute to 3 to 5 times the volume with cold water. Adjust to a pH between 6 and 9 with an acid, such as sulfuric or citric. Open cold water tap completely, slowly pour the reacted material to the drain. Allow cold water to run for 5 minutes to completely flush the system.

Empty Containers: Rinse three times with an appropriate solvent. Dispose of empty container as normal trash. Rinsate from empty containers may contain sufficient product to require disposal as hazardous waste. NOTICE (Disposal): These disposal guidelines are based on federal regulations and may be superseded by more stringent state or local requirements. Please consult your local environmental regulators for more information.

INFORMATION FOR FIRST AID AND CASUALTY ON TREATMENT FOR ADHESION OF HUMAN SKIN TO ITSELF IF CAUSED BY CYANOACRYLATE ADHESIVES

Cyanoacrylate adhesive is a very fast setting and strong adhesive. It bonds human tissue including skin in seconds. Experience has shown that accidents due to cyanoacrylates are handled best by passive, nonsurgical first aid. Treatment of specific types of accidents are given below.

SKIN CONTACT

Remove excess adhesive. Soak in warm, soapy water. The adhesive will come loose from the skin in several hours. Cured adhesive does not present a health hazard even when bonded to the skin.

Avoid contact with clothes, fabrics, rags, or tissue. Contact with these materials may cause polymerization. The polymerization of large amounts of adhesive will generate heat causing smoke, skin burns, and strong, irritating vapors. Wear nitrile or polyethylene gloves and apron when handling large amounts of adhesive.

SKIN ADHESION
First immerse the bonded surfaces in warm, soapy water. Peel or roll
the surfaces apart with the aid of a blunt edge, e.g. a spatula or a
teaspoon handle; then remove adhesive from the skin with soap and
water. Do not try to pull surfaces apart with a direct opposing
action.

EYELID TO EYELID OR EYEBALL ADHESION In the event that eyelids are stuck together or bonded to the eyeball, wash thoroughly with warm water and apply a gauze patch. The eye will open without further action, typically in 1-4 days. There will be no residual damage. Do not try to open the eyes by manipulation.

ADHESIVE ON THE EYEBALL Cyanoacrylate introduced into the eyes will attach itself to the eye protein and will disassociate from it over intermittent periods, generally covering several hours. This will cause periods of weeping until clearance is achieved. During the period of contamination, double vision may be experienced together with a lachrymatory effect, and it is important to understand the cause and realize that disassociation will normally occur within a matter of hours, even with gross contamination.

MOUTH
If lips are accidentally stuck together, apply lots of warm water to the lips and encourage maximum wetting and pressure from saliva inside the mouth. Peel or roll lips apart. Do not try to pull the lips with direct opposing action.

It is almost impossible to swallow cyanoacrylate. The adhesive solidifies and adheres in the mouth. Saliva will lift the adhesive in one half to two days. In case a lump forms in the mouth, position the patient to prevent ingestion of the lump when it detaches.

BURNS
Cyanoacrylates give off heat on solidification. In rare cases a large drop will increase in temperature enough to cause a burn.
Burns should be treated normally after the lump of cyanoacrylate is released from the tissue as described above.

SURGERY
It should never be necessary to use such a drastic method to separate accidentally bonded skin

MATERIAL SAFETY DATA SHEET INFORMATION:

PLEASE FIND ENCLOSED MATERIAL SAFETY DATA SHEETS (MSDS) COVERING ITEMS PURCHASED FROM ELECTRICAL INSULATION SUPPLIERS (EIS). OSHA REGULATIONS REQUIRE MSDS INFORMATION BE MADE AVAILABLE TO ALL PERSONNEL WHO MAY BE EXPOSED TO HAZARDOUS MATERIALS IN THE WORK PLACE.

UNDER THE "EMERGENCY PLANNING COMMUNITY RIGHT-TO-KNOW ACT OF 1986" INVENTORY AND LOCATION INFORMATION, CONCERNING HAZARDOUS MATERIALS MFG JOB SITE, MAY NEED TO BE REPORTED TO THE LOCAL FIRE DEPARTMENT, THE LOCAL EMERGENCY PLANNING COMMITTEE AND THE STANDARD RESPONSE COMMISSION. YOU MAY WANT TO REFERENCE 40 CFR PART 372 FOR ADDITIONAL INFORMATION. MANUFACTURERS MUST REPORT ANNUAL RELEASES OF LISTED TOXIC CHEMICALS INTO THE ENVIRONMENT, ACCORDING TO SARA TITLE III.

ACCORDING TO 29 CFR PART 1910.1200 PARAGRAPH (g)(6) OF THE HAZARD COMMUNICATION STANDARD, A MSDS IS TO BE PROVIDED THE FIRST TIME THE CUSTOMER BUYS AN ITEM REQUIRING A MSDS. IF AT ANY TIME THE MSDS IS UPDATED OR CHANGED, THE UPDATED MSDS MUST BE SUPPLIED WITH THE FIRST SHIPMENT AFTER THE MSDS UPDATE HAS OCCURRED.

IF YOU NEED FURTHER INFORMATION CONCERNING YOUR SITUATION, YOU MAY CONTACT THE EPA IN WASHINGTON, D.C. THEIR TOLL FREE NO. IS (800)535-0202; THE RCRA/SUPERFUND HOT LINE IS (800)424-9346 OR (703)920-9810; THE TSCA HOT LINE IS (202)554-1404.

BY PROVIDING THIS DOCUMENTATION, EIS IS COMPLYING WITH FEDERAL LAWS GOVERNING MSDS INFORMATION, AS IS KNOWN TO US. THIS IS A SERVICE AIMED AT HELPING YOUR BUSINESS TO ALSO COMPLY WITH GOVERNMENT REGULATIONS.

SECTION III - PHYSICAL DATA

Boiling Point (Degree F): )200 Vapor Pressure (mm Hg @25 C): (4 Percent volatiles by weight: (20 Specific Gravity (water =1): ) 1.75 Solubility in Water : Insoluble

Vapor Density : Heavier than air

Appearance and Odor : Gray liquid; solvent odor

SECTION IV - FIRE AND EXPLOSION HAZARD DATA

Flash Point (Degree F): 40-50, based on toluene

Flammable limits:

Lel: 1.3% UEL: 7.1% for Toluene

Extinguishing Media:

Use carbon dioxide, dry chemical, foam.

Unusual Fire or Explosion Hazard:

Decomposition and combustion products may be toxic. Closed containers may violently rupture under fire conditions. Vapors may form flammable mixtures with air. Vapors from this product are heavier than air, and may travel a considerable distance to a source of ignition and flash back.

Special Firefighting Procedures:

Firefighters/rescue personnel should wear positive pressure self contained breathing apparatus and full protective equipment. Cool exposed containers with water to prevent pressure buildup. If large quantities of material are involved, evacuate area and fight fire from a safe distance.

SECTION V - REACTIVITY DATA

Product Stability:

Product is stable under normal handling and storage conditions. Hazardous polymerization will not occur; however, review reactivity data concerning conditions to avoid and incompatible substances.

Incompatibility:

Incompatible with strong oxidizers, acids, bases.

Hazardous Decompositions Products;

Carbon monoxide, carbon dioxide, aldehydes, acids and other organic substances may be formed during combustion. The chemical nature and quantity of decomposition by-products will vary widely depending on th conditions of combustion.

#### Conditions to avoid:

Avoid storage in open containers, exposure to open flame or uncontrolled exposure to heat, uncontrolled mixing with curing agents or exposure to incompatible substances.

#### SECTION VI - RELEASE RESPONSE DATA

Spill response operations must be conducted in accordance with the provisions of OSHA 29 CFR 1910.120. Review the entire MSOS before proceeding with spill response.

### Small Spills:

Activate all explosion-proof exhuast ventilation in the immediate spill area. Extinguish open flames and eliminate all other sources of ignition. Wipe up, or absorb with vermiculite or other similar material. Wash area with soapy water to remove residue. Collect absorbed material and water rinses in appropriate chemical waste containers. Dispose of as an ignitable waste in accordance with all current Federal, State, and local regulations.

#### Large Spills:

Evacuate all personnel not directly involved with control/cleanup operations from the immediate spill area. Extinguish open flames and all other sources of ignition. Activate explosion-proof exhaust ventilation in the immediate spill area. Shut off the source of the release if this can be done without risk of injury. Use only spill response equipment approved for use in potential flammable/explosive environments. Dike area to contain the spill and prevent releases to sewers or other waterways. Collect spilled material for salvage/disposal. Apply absorbent material to soak up residue. Wash area with soapy water. Prevent runoff from entering sewers or other waterways. Collect abosrbed material and water rinses in appropriate waste containers. Dispose of as an ignitable waste in accordance with Federal, State, and local regulations.

#### SECTION VII - HANDLING PRECAUTIONS

The recommendations described in this section are provided as general guidance for minimizing exposure when handling this product. Because usage conditions will vary depending on customer application, specific safe handling procedures should be developed by a person knowledgeable in the intended usage conditions and equipment. Employees must be properly trained in safe handling of this product prior to use.

### Personal Protection:

This product can cause severe eye irritation. Prevent eye contact through the use of splash-proof chemical goggles or face shield. This product can cause skin irritation. Components of this product may be absorbed through the skin. Wear appropriate protective gloves to minimize skin contact. If necessary a promper chemical-resistant apron and additional impervious clothing should be used to minimize skin contact and prevent contamination of clothing. Normal work clothing should be washed before re-use. Wash hands and face thoroughly after handling this product and before eating, drinking or smoking. Emergency eye wash facilities and safety shower must be available.

### Ventilation Recommendations and Respiratory Protection:

Provide effective explosion-proof mechanical exhaust ventilation to draw vapors, mists, or fumes generated during processing away from the worker and prevent routine inhalation. Ventilation must be sufficient to maintain airborne concentrations of Section 2 ingredients below their PEL/TLV values. The type of respiratory protection selected will depend upon the conditions of use. Observe OSHA regulations for respiratory protection (29 CFR 1910.134).

#### Storage:

Store in a cool, dry location with adequate ventilation. Keep container tightly sealed when not in use. Do not store near heat, sparks or open flame. To prevent fire or explosion risk from static electricity accumulation and discharge, effectively ground storage and transfer containers in accordance with NFPA standards. Empty containers may contain flammable liquid or vapor residue. Do not cut, weld, solder, drill, grind or expose container to heat, flame or other source of ignition. They may explode and

/CHOT1674

cause injury or death.

#### SECTION VIII - HEALTH DATA

Routes of Exposure:

Skin and eye contact, inhalation of vapors.

Medical Conditions Aggravated by Exposure:

Exposure may aggravate preexisting skin, eye and/or respriatory disorders.

#### Eve Contact:

Contains materials which cause moderate skin irritation. Prolonged or repeated exposure to the liquid may exert a defatting or drying action on the skin, possibly resulting in dermatitis. Toluene may be absorbed through the skin.

### Inhalation:

High vapor concentrations may cause respiratory irritation, headaches, nausea, dizziness; may cause anesthetic efforts or other temporary central nervous system effects. Severity of effects will be dependent upon vapor concentration and severity of exposure.

#### Indestion:

Har∎ful if swallowed.

#### Chronic Health Effects:

Overexposure to toluene has produced severe but reversible liver and kidney injury in humans. Repeated and prolonged overexposure has been associated with central nervous system injury and cardiac sensitization.

#### SECTION IX- FIRST AID PROCEDURES:

#### Eye Contact:

Immediately flush eyes thoroughly with water for at least 15 minutes while holding eyelids open. Get immediate medical attention.

#### Skin Contact:

Remove any contaminated clothing and flush the affected area of the skin thoroughly with plenty of water. Follow by washing with soap and water. Get medical attention if irritation persists. Do not reuse contaminated clothing until properly cleaned.

#### Inhalation:

Remove victim to fresh air. Provide oxygen if breathing is difficult. Give artificial respiration if not breathing. Get immediate medical attention.

### Ingestion:

Do NOT induce vomiting. If victim is conscious and alert, dilute by giving water to drink; never give anything by mouth to a drowsy, unconscious, or convulsing person. Get immediate medical attention.

#### SECTION X ADDITIONAL INFORMATION

#### TSCA STATUS:

All components of this product are listed in the EPA toxic Substance Control Act Inventory.

### SARA STATUS:

The components listed in Section 2 which are substances regulated by the SARA Section 313 amendments to RCRA are as follows: Toluene (108-88-3)

### Special Notes:

Date prepared: 5/12/93 Document number: 1674

#### Abbreviations:

NA= Not Applicable NE = Not Established ND= Not Determined ppm= Parts per Million mg/m3= Milligrams Per Cubic Meter C= Ceiling Concentration STEL= Short Term Exposure Limit

MATERIAL SAFETY DATA SHEET

### CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

Product Name:

Super Bonder(R) 496 Instant Adhesive 49650

Item No.:
Product Type:

Cyanoacrylate Ester

### COMPOSITION, INFORMATION ON INGREDIENTS

Ingredients

CAS No.

METHYL 2-CYANOACRYLATE Poly (methyl methacrylate) HYDROOUINONE

137-05-3 9011-14-7 123-31-9

90-95 5-10

Ingredients which have exposure limits

OSHA (PEL)

METHYL 2-CYANOACRYLATE

4 ppm 18 mg/M3

4 ppm 16 mg/M3

### HAZARDS IDENTIFICATION

Toxicity:

Skin contact may cause burns.
Bonds skin rapidly and strongly.
Skin and eye irritant.
Estimated oral LD50 more than 5000mg/kg.
Estimated dermal LD 50 more than 2000 mg/kg.

Primary Routes of Entry: Signs and symptoms

of Exposure:

None known

Vapor is irritating to eyes and mucous membranes above TLV. Prolonged and repeated overexposure to

vapors may produce symptoms of non-allergic asthma in sensitive individuals.

4 FIRST AID MEASURES

(continued)

8/06/97 10:17:02

Eye Contact:

Flush with water. See supplemental page for

emergency procedures.

FIRE FIGHTING MEASURES

Flash Point: Recommended

150-200 F

Method: Tag Closed Cup

ISSUED

Extinguishing Agents:

Carbon dioxide, foam, dry chemical

Special Firefighting Procedures:

Not available

Hazardous Products formed

by Fire or Thermal Decomp Irritating organic fragments.
Unusual Fire or
Explosion Hazards: None

Explosive Limits: (% by volume in air)Lower (% by volume in air)Upper Not available Not available

ACCIDENTAL RELEASE MEASURES

Steps to be taken in case of spill or leak:

Flood with water to polymerize. Soak up with an

inert absorbent.

7 HANDLING AND STORAGE

Safe Storage: (Contact Loctite Customer Handling:

Store at or below 75 deg. F Service 1-800-243-4874 for shelf Life information) Avoid contact with skin and eyes. Avoid breathing

vapors.

EXPOSURE CONTROLS, PERSONAL PROTECTION

Eyes: Skin:

pH:

Safety glasses or goggles. Nitrile or polyethylene gloves and aprons. Do not use cotton.

INFORMATION FOR FIRST AID AND CASUALTY ON TREATMENT FOR ADHESION OF HUMAN SKIN TO ITSELF IF CAUSED BY CYANOACRYLATE ADHESIVES

Cyanoacrylate adhesive is a very fast setting and strong adhesive. It bonds human tissue including skin in seconds. Experience has shown that accidents due to cyanoacrylates are handled best by passive, nonsurgical first aid. Treatment of specific types of accidents are given below.

SKIN CONTACT

Remove excess adhesive. Soak in warm, soapy water. The adhesive will come loose from the skin in several hours. Cured adhesive does not present a health hazard even when bonded to the skin.

Avoid contact with clothes, fabrics, rags, or tissue. Contact with these materials may cause polymerization. The polymerization of large amounts of adhesive will generate heat causing smoke, skin burns, and strong, irritating vapors. Wear nitrile or polyethylene gloves and apron when handling large amounts of adhesive.

SKIN ADHESION
First immerse the bonded surfaces in warm, soapy water. Peel or roll
the surfaces apart with the aid of a blunt edge, e.g. a spatula or a
teaspoon handle; then remove adhesive from the skin with soap and
water. Do not try to pull surfaces apart with a direct opposing
action.

EYELID TO EYELID OR EYEBALL ADHESION
In the event that eyelids are stuck together or bonded to the eyeball, wash thoroughly with warm water and apply a gauze patch. The eye will open without further action, typically in 1-4 days. There will be no residual damage. Do not try to open the eyes by manipulation.

ADHESIVE ON THE EYEBALL Cyanoacrylate introduced into the eyes will attach itself to the eye protein and will disassociate from it over intermittent periods, generally covering several hours. This will cause periods of weeping until clearance is achieved. During the period of contamination, double vision may be experienced together with a lachrymatory effect, and it is important to understand the cause and realize that disassociation will normally occur within a matter of hours, even with gross contamination.

MOUTH
If lips are accidentally stuck together, apply lots of warm water to the lips and encourage maximum wetting and pressure from saliva inside the mouth. Peel or roll lips apart. Do not try to pull the lips with direct opposing action.

It is almost impossible to swallow cyanoacrylate. The adhesive solidifies and adheres in the mouth. Saliva will lift the adhesive in one half to two days. In case a lump forms in the mouth, position the patient to prevent ingestion of the lump when it detaches.

BURNS
Cyanoacrylates give off heat on solidification. In rare cases a large drop will increase in temperature enough to cause a burn.
Burns should be treated normally after the lump of cyanoacrylate is released from the tissue as described above.

SURGERY
It should never be necessary to use such a drastic method to separate accidentally bonded skin

ETHYLENE GLYCOL MONOBUTYL ETHER;
CAS #: 111-76-2

\* SUBJECT TO REPORTING REQUIREMENT OF SECTION 313 OF TITLE III OF SARA (40 CFR PART 372).

Industry recommended exposure limit of 100 ppm.
 Supplier recommended exposure limit of 35 ppm.

This chemical is included on the list of Hazardous Air Pollutants (HAPs) from Title III of the Clean Air Act Amendments of 1990 (Glycol Ethers Category).

See Section 8 Exposure Controls, Personal Protection - Exposure Guidelines for more information on exposure limits.

0-4

4) Supplier recommended exposure limit of 10 mg/m3.

5) This chemical is included on the list of Hazardous Air Pollutants (HAPs) from Title III of the Clean Air Act Amendments of 1990 (Glycol Ethers Category).

The recommended permissible exposure limits (PEL) indicated above reflect the levels adopted by OSHA in 1989. Although, some of the 1989 levels have since been vacated, the Nazdar Company recommends that the lower exposure levels be observed as reasonable worker protection.

SECTION 3 -- HAZARDS IDENTIFICATION

#### GENERAL HEALTH EFFECTS

\* 2-BUTOXYETHANOL;

THE FOLLOWING INFORMATION HAS BEEN DEVELOPED BASED UPON USING THE PRODUCT AS INTENDED BY THE MANUFACTURER. The potential health effects of this product are based on the hazards of its components. The use of this product in combination with other products may produce synergistic (additive) health effects. Cautionary labeling and material safety data sheets of all materials used with this product should be reviewed before use.

#### **EYES**

Eye contact with liquid, vapors or mists may cause irritation, including burning, tearing, redness or swelling.

### SKIN

Repeated or prolonged overexposure may cause skin irritation or dermatitis. Symptoms may include dryness, chapping and redness. Skin absorption is possible but harmful effects are not expected from this route of exposure under normal conditions of handling and use.

#### INHALATION

Repeated and prolonged overexposure by inhalation may cause respiratory tract irritation. Symptoms may include central nervous system disorders such as headaches, dizziness, weakness and fatigue.

#### INGESTION

Ingestion may cause gastrointestinal tract irritation. Symptoms may include nervous system depression including drowsiness or unconsciousness. Ingestion may cause vomiting. Aspiration of material into lungs may cause chemical pneumonitis which can be fatal.

### CHRONIC EFFECTS/TARGET ORGANS

Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal.

### ANIMAL STUDIES

Diethylene glycol butyl ether caused liver and blood abnormalities and kidney damage in lab animals after overexposure. Aliphatic dibasic acid esters (or its components) have been suggested as a cause of the following effects in lab animals, after overexposure, and may aggravate pre-existing disorders of these organs in humans; mild, reversible liver effects, nasal damage. 2-Butoxyethanol has caused reproductive and blood disorders resulting in kidney, liver and lung damage in lab animals. For animal studies, reference TSCA Section 4 Test Rule Results or contact the manufacturer for further details.

### MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE

Pregnant women and persons with pre-existing health disorders should consult their physician before using this product. Repeated and prolonged overexposure and/or individual sensitivity may increase the potential for and degree of adverse health effects. See Section 3 "Hazards Identification" for effects of certain hazardous ingredients.

### ROUTES OF EXPOSURE

Primary exposure routes: Inhalation-Dermal (Contact/Absorption)-Ingestion

SECTION 4 -- FIRST AID HEASURES

#### **EYES**

After initial flushing, remove any contact lenses and continue flushing for at least 15 minutes. If irritation persists have eyes examined and tested by medical personnel.

SKIN

In case of contact, immediately wash skin with a mild soap and plenty of water for at least 15 minutes, while removing contaminated clothing and shoes. Cool water is initially suggested to prevent the pores of the skin from opening. This will minimize both the area and time of skin contact. Lukewarm water may then be used to ensure all contaminants are removed. Skin should be monitored for reddening or chemical burns. Mild soap is suggested to help prevent abrading the skin or rubbing the chemicals into pores during cleansing. Get medical attention if irritation persists or significant contact has occurred. Thoroughly wash (or discard) clothing and shoes before reuse.

TNHALATION

Remove to fresh air. If not breathing, give artificial respiration or give oxygen by trained personnel. Seek immediate medical attention if breathing difficulty is experienced.

INGESTION

If swallowed, do NOT induce vomiting. Call a physician or poison control center immediately. Never give anything by mouth to an unconscious person.

OTHER COMMENTS

No Data Available

SECTION 5 -- FIRE FIGHTING MEASURES

FLASH POINT

145 Degrees - 150 Degrees Fahrenheit (TCC)

OSHA FLAMMABILITY CLASSIFICATION (NFPA)
Class IIIA Combustible Liquid

FLAMMABLE LIMITS (LEL-LOWER EXPLOSIVE LIMIT)
0.5% volume in air

EXTINGUISHING MEDIA

Foam-CO2-Dry Chemical-Water Spray

FIRE AND EXPLOSION HAZARDS

Isolate from heat, electrical equipment, sparks, and open flame. Keep containers tightly closed. Vapors may be heavier than air and can travel to a source of ignition then flash back. Closed containers may explode when exposed to extreme heat.

FIRE FIGHTING EQUIPMENT

Full protective equipment including self-contained breathing apparatus (SCBA) is recommended to protect firefighters.

SPECIAL FIRE FIGHTING PROCEDURES

Water may be ineffective but may be used to cool containers. Fumes released on burning may be toxic and dangerous.

SECTION 6 -- ACCIDENTAL RELEASE MEASURES

RELEASE HANAGEMENT MEASURES

Remove all sources of ignition (flames, hot surfaces and electrical, static or frictional sparks). Avoid contact or breathing vapors. Ventilate area. Contain release and remove with inert absorbent. Use non-sparking tools to place material in appropriate container for disposal. The National Response Center (800-424-8802) and local authorities should be contacted for any reportable spill/release.

SECTION 7 -- HANDLING AND STORAGE

HANDLING AND STORAGE METHODS

Use in a well ventilated area. Follow all MSDS/label precautions even after container is emptied; container may retain product residues. Store in closed containers in cool, dry, well ventilated area away from sources of ignition. Keep containers closed when not in use. Smoke in designated areas only. Avoid prolonged or repeated overexposure to this product. Keep out of reach of children. Follow label directions carefully. Do not take internally. Harmful or fatal if swallowed.

SECTION 8 -- EXPOSURE CONTROLS, PERSONAL PROTECTION

RESPIRATORY PROTECTION

If concentrations of hazardous ingredients exceed exposure limits listed in Section 2 an appropriate NIOSH (National Institute for Occupational Safety and Health) approved respirator with an organic vapor cartridge should be used. If material is handled under mist, spray or dust forming conditions, a PlOO (99.97% efficiency) filter should be used in addition to the organic vapor cartridge. If no exposure limits are listed in Section 2, follow general safety guidelines in 29 CFR 1910.134 Respiratory Protection or other applicable respiratory standard.

SKIN PROTECTION

Use neoprene, nitrile or other gloves resistant to chemicals listed in Section 2. Contact a reputable safety supply company

for appropriate gloves. Solvent resistant aprons are recommended. Prevent prolonged skin contact with contaminated clothing.

#### EYE PROTECTION

Use ANSI (American National Standards Institute) approved safety glasses, faceshield or splash proof goggles to prevent eye contact. Contact a reputable safety supply company for appropriate eye protection. The availability of an eye wash is highly

#### EXPOSURE GUIDELINES

See Section 2 "Composition, Information on Ingredients" for occupational exposure limits. Excessive concentrations of nuisance dusts or particulates not otherwise classified (PNOC) or regulated (PNOR) may reduce visibility and cause unpleasant deposits in the eyes, ears, and masal passages. The TLV and PEL has been established for all non-toxic "nuisance dusts" that are not otherwise classified and refers to both organic and inorganic dusts. Exposure or generation of these dusts is not anticipated during normal printing operations. The use of dry pigments and powders, grinding or sanding of printed products may generate quantities of these particulates. Refer to Section 2 Composition, Information on Ingredients for exposure limits.

### HYGIENIC PRACTICES

Wash with soap and water before eating, smoking or using toilet facilities. Separately wash or discard clothing and footwear before reuse. NEVER try to remove ink from the skin by using solvent or thinner. Such action is likely to increase the possibility of undesirable effects. Remove contaminated clothing to prevent prolonged skin contact.

Use applicable engineering controls, work practices and personal protective equipment to ensure all concentrations are kept below the exposure limits listed in Section 2. Adequate controls should be implemented to ensure employee safety from fine mists which may be produced under some printing conditions.

SECTION 16 -- OTHER INFORMATION

#### DISCLOSURE

The information and recommendations contained herein are based upon data believed to be correct. However, no guarantee or warranty of any kind express or implied is made with respect to the information contained herein. The data in this MSDS relates only to the specific material designated herein and does not apply to use in combination with any other material or process.

#### **DEFINITIONS**

ACGIH: American Conference of Governmental Industrial Hygienists

AIHA: American Industrial Hygiene Association

CEILING: (TLV-Ceiling and PEL Ceiling Limit) The ceiling exposure limit or concentration not to be exceeded for even brief times.

DOT: Department of Transportation

HMIS: The Hazardous Materials Identification System (HMIS) developed by the National Paint and Coatings Association (NPCA) to provide information on the acute health hazards, reactivity and flammability of products encountered in the workplace at room temperatures.

HMIS codes assigned for this product are only suggested ratings based on anticipated normal screen printing applications. The employer has the ultimate responsibility for assigning these ratings and should fully evaluate the MSDS, work practices and environmental conditions prior to assigning the appropriate ratings.

HMIS rating involves data interpretations that may vary from company to company.

HMIS Personal Protection Index of "X-Ask your supervisor" is given on this MSDS due to varying work conditions which may dictate different levels of protection. Please review this MSDS before determining appropriate protective equipment and beginning work.

IARC: International Agency for Research on Cancer

NFPA: National Fire Protection Association

NTP: National Toxicology Program

STEL: Short-Term Exposure Limit: ACGIH terminology for the short-term exposure limit or maximum concentration for a continuous exposure period of 15 minutes.

TLV: Threshold Limit Value. A term ACGIH uses to express the airborne concentration of a material to which most workers can be exposed during a normal daily and weekly work schedule without adverse effects.

TWA: Time-Weighted Average

VOC: Volatile Organic Compound

### 3. HAZARDS IDENTIFICATION

Toxicity:

Skin contact may cause burns. Bonds skin rapidly and strongly.

Primary Routes of Entry:

Signs and symptoms of Exposure:

Skin and eye irritant. None known

Vapor is irritating to eyes and mucous membranes above TLV. Prolonged and repeated overexposure to vapors may produce symptoms of non-allergic asthma in sensitive individuals.

Existing Conditions
Aggravated by Exposure:

None known

### 4. FIRST AID MEASURES

Ingestion:

Ingestion is not likely. See supplemental page for

Inhalation:

emergency procedures. Remove to fresh air. If symptoms persist,

obtain medical attention. Skin Contact:

Soak in warm water. See supplemental page for emergency procedures. Flush with water. See supplemental page for

emergency procedures.

### FIRE FIGHTING MEASURES

Flash Point: Recommended

Eye Contact:

150 - 200 · F

Method: Tag Closed Cup

Carbon dioxide, foam, dry chemical

Extinguishing Agents: Special Firefighting Procedures:

Not available

Hazardous Products formed
by Fire or Therma! Decomp Irritating organic vapors
Unusual Fire or

Hazards: Explosion

None

Explosive Limits: (% by volume in air)Lower (% by volume in air)Upper 1.7% Phthalic anhydride 10.5% Phthalic anhydride

### ACCIDENTAL RELEASE MEASURES

Steps to be taken in case

of spill or leak:

Flood with water to polymerize. Soak up with an inert absorbent.

### HANDLING AND STORAGE

Safe Storage:

(Contact Loctite Customer

Handling:

Store at or below 75 F Service 1-800-243-4874 for shelf Life information) Avoid contact with skin and eyes. Avoid breathing vapor.

### 8. EXPOSURE CONTROLS, PERSONAL PROTECTION

Eyes: Skin:

Safety glasses or goggles

Nitrile or polyethylene gloves and aprons. Do not use cotton.

Ventilation:

See supplemental page for additional information. Positive down-draft exhaust ventilation should be provided to maintain vapor concentration below TLV

Respiratory

Not available See Section 2 for Exposure Limits.

## 9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance: Odor

**Boiling Point:** 

pH: Solubility in Water: Specific Gravity Volatile Organic Compound (EPA Method 24)

Vapor Pressure: Vapor Density: Evaporation Rate (Ether = 1)

Clear liquid Sharp, irritati More than 300°F irritating Does not apply Polymerized 1.05 at 75.F

85.6%; 899 grams per liter Less than 0.2 mm at 75°F Approximately

### 10. STABILITY AND REACTIVITY

Stability:

Stable Hazardous Polymerization:

Will not occur

Incompatibility: Polymerized by contact with water, alcohols,

amines, alkalies. Not available

Conditions to Avoid: Hazardous Decomposition

Products (non-thermal): None

### TOXICOLOGICAL INFORMATION

Estimated oral LD50 more than 5000 mg/kg. Estimated dermal LD50 more than 2000 mg/kg.

### 12. ECOLOGICAL INFORMATION

No data available

### 13. DISPOSAL CONSIDERATIONS

Recommended methods of

disposal:

Polymerize as above. Incinerate in accordance with EPA and local regulations.

EPA Hazardous Waste Number

NH - Not a RCRA Hazardous Waste Material

### 14. TRANSPORTATION INFORMATION

DOT (49 CFR 172) Domestic Ground Transport Proper Shipping Name:

Unrestricted (Not more than 450 liters); Combustible liquids, n.o.s. (Cyanoacrylate ester) (More than 450 liters)

Hazard Class or

Division:

Unrestricted (Not more than 450 liters) Combustible liquid (More than 450 liters) None (Not more than 450 liters); NA 1993 (More than 450 liters)

Identification Number:

None

2

Marine Pollutant:

Liass or Division:

UN or ID Number:

Proper Shipping Name:

INFORMATION FOR FIRST AID AND CASUALTY ON TREATMENT FOR ADHESION OF HUMAN SKIN TO ITSELF IF CAUSED BY CYANOACRYLATE ADHESIVES

Cyanoacrylate adhesive is a very fast setting and strong adhesive. It bonds human tissue including skin in seconds. Experience has shown that accidents due to cyanoacrylates are handled best by passive, nonsurgical first aid. Treatment of specific types of accidents are given below.

SKIN CONTACT Remove excess adhesive. Soak in warm, soapy water. The adhesive will come loose from the skin in several hours. Cured adhesive does not present a health hazard even when bonded to the skin.

Avoid contact with clothes, fabrics, rags, or tissue. Contact with these materials may cause polymerization. The polymerization of large amounts of adhesive will generate heat causing smoke, skin burns, and strong, irritating vapors. Wear nitrile or polyethylene gloves and apron when handling large amounts of adhesive.

First immerse the bonded surfaces in warm, soapy water. Peel or roll the surfaces apart with the aid of a blunt edge, e.g. a spatula or a teaspoon handle; then remove adhesive from the skin with soap and water. Do not try to pull surfaces apart with a direct opposing action.

EYELID TO EYELID OR EYEBALL ADHESION In the event that eyelids are stuck together or bonded to the eyeball, wash thoroughly with warm water and apply a gauze patch. The eye will open without further action, typically in 1-4 days. There will be no residual damage. Do not try to open the eyes by manipulation.

ADHESIVE ON THE EYEBALL Cyanoacrylate introduced into the eyes will attach itself to the eye protein and will disassociate from it over intermittent periods, generally covering several hours. This will cause periods of weeping until clearance is achieved. During the period of contamination, double vision may be experienced together with a lachrymatory effect, and it is important to understand the cause and realize that disassociation will normally occur within a matter of hours, even with gross contamination. gross contamination.

If lips are accidentally stuck together, apply lots of warm water to the lips and encourage maximum wetting and pressure from saliva inside the mouth. Peel or roll lips apart. Do not try to pull the lips with direct opposing action.

It is almost impossible to swallow cyanoacrylate. The adhesive solidifies and adheres in the mouth. Saliva will lift the adhesive in one half to two days. In case a lump forms in the mouth, position the patient to prevent ingestion of the lump when it detaches.

Cyanoacrylates give off heat on solidification. In rare cases a large drop will increase in temperature enough to cause a burn. Burns should be treated normally after the lump of cyanoacrylate is released from the tissue as described above.

SURGERY It should never be necessary to use such a drastic method to separate accidentally bonded skin.

MATERIAL SAFETY DATA SHEET INFORMATION:

PLEASE FIND ENCLOSED MATERIAL SAFETY DATA SHEETS (MSDS) COVERING ITEMS PURCHASED FROM ELECTRICAL INSULATION SUPPLIERS (EIS). OSHA REGULATIONS REQUIRE MSDS INFORMATION BE MADE AVAILABLE TO ALL PERSONNEL WHO MAY BE EXPOSED TO HAZARDOUS MATERIALS IN THE WORK PLACE.

UNDER THE "EMERGENCY PLANNING COMMUNITY RIGHT-TO-KNOW ACT OF 1986" INVENTORY AND LOCATION INFORMATION, CONCERNING HAZARDOUS MATERIALS MFG JOB SITE, MAY NEED TO BE REPORTED TO THE LOCAL FIRE DEPARTMENT, THE LOCAL EMERGENCY PLANNING COMMITTEE AND THE STANDARD RESPONSE COMMISSION. YOU MAY WANT TO REFERENCE 40 CFR PART 372 FOR ADDITIONAL INFORMATION. MANUFACTURERS MUST REPORT ANNUAL RELEASES OF LISTED TOXIC CHEMICALS INTO THE ENVIRONMENT, ACCORDING TO SARA TITLE III.

ACCORDING TO 29 CFR PART 1910.1200 PARAGRAPH (g)(6) OF THE HAZARD COMMUNICATION STANDARD, A MSDS IS TO BE PROVIDED THE FIRST TIME THE CUSTOMER BUYS AN ITEM REQUIRING A MSDS. IF AT ANY TIME THE MSDS IS UPDATED OR CHANGED, THE UPDATED MSDS MUST BE SUPPLIED WITH THE FIRST SHIPMENT AFTER THE MSDS UPDATE HAS OCCURRED.

IF YOU NEED FURTHER INFORMATION CONCERNING YOUR SITUATION, YOU MAY CONTACT THE EPA IN WASHINGTON, D.C. THEIR TOLL FREE NO. IS (800)535-0202; THE RCRA/SUPERFUND HOT LINE IS (800)424-9346 OR (703)920-9810; THE TSCA HOT LINE IS (202)554-1404.

BY PROVIDING THIS DOCUMENTATION, EIS IS COMPLYING WITH FEDERAL LAWS GOVERNING MSDS INFORMATION, AS IS KNOWN TO US. THIS IS A SERVICE AIMED AT HELPING YOUR BUSINESS TO ALSO COMPLY WITH GOVERNMENT REGULATIONS.

### 3. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW:

This section not in use

POTENTIAL HEALTH EFFECTS:

INGESTION:

MAY BE harmful if swallowed.

SKIN CONTACT:

UNCURED PRODUCT WILL IRRITATE LIPS, GUMS AND TONGUE.

UNCURED PRODUCT CONTACT MAY IRRITATE THE SKIN.

INHALATION:

CAUSES MILD RESPIRATORY IRRITATION.

APPLIES ONLY IN UNCURED STATE.

EYE CONTACT:

UNCURED PRODUCT CONTACT IRRITATES EYES.

MEDICAL CONDITIONS AGGRAVATED:

NONE KNOWN.

SUBCHRONIC (TARGET ORGAN) EFFECTS:

NONE KNOWN.

CHRONIC EFFECTS/CARCINOGENICITY:

This product or one of its ingredients present 0.1% or more is NOT listed as a carcinogen or suspected carcinogen by

NTP, IARC, or OSHA. PRODUCTS/INGREDIENTS

This space reserved for special use.

PRINCIPLE ROUTES OF EXPOSURE:

Eyes.

DERMAL SKIN

OTHER:

METHANOL RELEASED DURING CURING. THIS PRODUCT CONTAINS METHYL-POLYSILOXANES WHICH CAN GENERATE FORMALDEHYDE AT APPROXIMATELY 300 DEGREES FARENHEIT (150°C) AND ABOVE, IN ATMOSPHERES WHICH CONTAIN OXYGEN. FORMALDEHYDE IS A SKIN AND RESPIRATORY SENSITIZER, EYE AND THROAT IRRITANT, ACUTE TOXICANT, AND POTENTIAL CANCER HAZARD. AN MSDS FOR FORMALDEHYDE IS AVAILABLE FROM GE SILICONES.

#### 4. FIRST AID MEASURES

#### INGESTION:

RINSE MOUTH WITH WATER SEVERAL TIMES.

SKIN

TO CLEAN FROM SKIN, REMOVE COMPLETELY WITH A DRY CLOTH OR PAPER TOWEL, BEFORE WASHING WITH DETERGENT AND WATER. GET MEDICAL ATTN. IF IRRITATION PERSISTS.

INHALATION:

MOVE PERSON TO FRESH AIR.

EYES

In case of contact, immediately flush eyes with plenty of water for at least 15 minutes and get medical attention IF IRRITATION PERSISTS.

NOTE TO PHYSICIAN:

None Known.

#### 5. FIRE FIGHTING MEASURES

| NONE KNOWN.       |                           |           |     |    |     |

### 6. ACCIDENTAL RELEASE MEASURES

ACTION TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED: Wipe, scrape or soak up in an inert material and put in a

wipe, scrape or soak up in an inert material and put in a container for disposal.

WASH WALKING SURFACES WITH DETERGENT AND WATER TO REDUCE SLIPPING HAZARD. WEAR PROPER PROTECTIVE EQUIPMENT AS SPECIFIED IN THE PROTECTIVE EQUIPMENT SECTION.

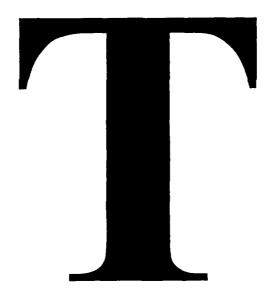

#### 7. HANDLING AND STORAGE

## PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE:

AVOID CONTACT WITH SKIN AND EYES. CAUTION! COMBUSTIBLE. REMOVE CONTACT LENSES BEFORE USING SEALANT. DO NOT HANDLE LENSES UNTIL ALL SEALANT HAS BEEN CLEANED FROM THE FINGERTIPS, NAILS AND CUTICLES. RESIDUAL SEALANT MAY REMAIN ON FINGERS FOR SEVERAL DAYS AND TRANSFER TO LENSES AND CAUSE SEVERE EYE IRRITATION. PRODUCT RELEASES METHANOL DURING APPLICATION AND CURING. (METHANOL TLV=200 PPM). UNCURED PRODUCT CONTACT IRRITATES EYES. UNCURED PRODUCT CONTACT MAY IRRITATE SKIN.

RIBOL 930 HIGH TEMPERATURE CHAIN OIL

C. Hazards Identification

Appearance:

lear yellowish liquid. Faint characteristic odor.

Health 1

Flammability 1

Reactivity 0

Special

otential Health Effects

Eye: May cause eye irritation.

Skin Contact: May cause skin irritation. Skin Absorption: No acute effects expected.

Ingestion: LD 50 not established. Do not ingest. Ingestion may irritate the

gastrointestinal tract and may cause nausea and vomiting.

Inhalation: Vapors may irritate the mucosal membranes of mouth, nose, and throat. Intense and/or prolonged exposure to vapor concentrations exceeding the TLV/PEL may cause headache, nausea, and vomiting. Oil vapors may accumulate in the lungs, and may cause chemical

pneumonitis.

Chronic Effects: A review of the literature does not show obvious long term

hazard.

Carcinogenicity: No component known to be present in this product at >0.1% is

presently listed as a carcinogen by IARC, NTP or OSHA, unless otherwise noted in Section P - Other Information.

outes of Exposure: Skin contact. Rye contact. Inhalation.

### D. First Aid Measures

Rye: Immediately flush eyes with plenty of water for at least 15 minutes. Get

medical attention immediately.

Skin: Wipe off, then wash thoroughly with soap and water. Get medical

attention if irritation occurs.

Ingestion: If the individual is conscious, give 1-2 glasses of milk or water to dilute stomach content. Do not physically induce vomiting.

Never give anything by mouth to an unconscious person. Get prompt

medical attention.

Inhalation: Immediately remove the individual to fresh air. If breathing is difficult, administer oxygen. If breathing stops, administer

artificial respiration. Get prompt medical attention.

### R. Fire Fighting Measures

lammable Properties

Flash Point (degrees F/C): 545°F / 285°C Method:

Upper Flammable Limit: Not available Lower Flammable Limit: Not available

Autoignition Temperature: Not determined

Hazardous Products of Combustion: Potential combustion products are oxides

### R. Fire Fighting Measures (Cont.)

of carbon and nitrogen.

Properties That Could Increase Fire or Explosion Hazard: None known. xtinguishing Media: Dry chemical, water-fog, chemical foam, or CO2. Direct water-stream may cause frothing.

ire Fighting Instructions: Wear self contained breathing apparatus when fire fighting in a confined space. Cool fire exposed containers with waterspray to prevent rupture.

### F. Accidental Release Measures

ear adequate protection and eliminate all sources of ignition. Stop the leak, f it can be safely done. Ventilate the area and dike the spill to prevent ntry into sewer or watercourses. Absorb with an oil-absorbent. Advise uthorities if product has entered or may enter sewers, watercourses or xtensive land areas.

### G. Handling and Storage

eep containers closed when not in use. Do not store near heat, sparks, flame r strong oxidants. Store in a clean, dry area below 49C/12OF, away from all gnition sources and incompatible materials. Avoid contact with skin and eyes. void breathing mists.

### H. Exposure Controls/Personal Protection

'ersonal Protective Equipment (PPE)

Eye/Face Protection: Wear chemical safety goggles plus full face shield to protect against splashing.

Skin Protection: Oil-impervious and solvent-resistant (e.g. neoprene) type.

Respiratory Protection: Good industrial hygiene practices recommend that engineering controls be used to reduce environmental concentrations to the threshold limit value (TLV) or permissible exposure limit (PEL). If any associated TLV or PEL is exceeded, provide NIOSH approved respiratory protection. This product does not constitute a health or physical hazard during normal industrial use. As in all industrial applications, adequate ventilation and good hygienic practices are

Other: Eyewash facility. Oil-impervious (e.g. neoprene) clothing to avoid skin contact.

Exposure Guidelines: See information provided in Section B, Ingredients.

advisable.

RIBOL 930 HIGH TEMPERATURE CHAIN OIL

### L. Ecological Information

Ecotoxicological Information: No specific ecological data available for this product.

### M. Disposal Considerations

US EPA Hazardous Waste Numbers:

This product as purchased does not fall under current U.S. EPA RCRA definitions of hazardous waste. Under RCRA it is the generator's responsibility to determine the status of the waste at the time of its disposal.

General Disposal Considerations:

Dispose of in accordance with local, state and federal regulations. Disposal of this material to the land may be banned by federal law (40 CFR 268).

CRRCLA Reportable Quantity: This product does not contain any CERCLA egulated materials.

### N. Transport Information

Hazardous Materials Description/Proper Shipping Name:

Not Regulated.

Hazard Class: Same As Above

Identification Number (UN or NA Number): Same As Above

Packing Group: Same As Above

Freight Class:

NMFC 155250. PETROLEUM OILS, GREASES & RELATED PRODUCTS, NOI CLASS 65.

Telephone Number for Transport Instructions: 1-800-621-2661, SHEA Department

### O. Regulatory Information

I.S. Federal Regulations:

Hazardous per OSHA 29 CFR 1910.1200: Yes

CERCLA/EPCRA:

Section 302 Extremely Hazardous Substances (EHS): No listed ingredients are present on the 302 list.

Section 311/312 Hazard Class(es): Immediate: YES Delayed: NO Fire: NO Reactivity: NO Sudden Release of Pressure: NO

Section 313 Toxic Chemicals: f none listed here or in Section B, there are no 313 chemicals present above hreshold value.

APPEARANCE AND ODOR: CLEAR, HOBILE LIQUID WITH ALCOHOLIC ODOR.

SOLUBILITY IN WATER: SOLUBLE

#### SECTION III FIX NO EPILISION HAVAND MATAN

PLASH POINT (HETHOD USED): 55 F (ACC) FLAMMABLE LIMITS: UL 3 UL: 24 ETIDENISHDE HENA: CARBON DIOXIDB, ALCOHOL RESISTANT FOAM, DRY CHEMICAL

SPEIN FIRE FIRMING PROCEDURES: EVACUATE HAZARD AREA OF UNPROTECTED PERSONNEL. WEAR PROTECTIVE CLOTHING, INCLUDING NIOSH APPROVED SELF-CONTAINED BREATHING APPARATUS.

UNITIAL FIRE AND EXPLOSION HAVARDS: NONE KNOWN

#### SECTION IV GEACILYIN MIN

STABLE? NO STABLE? YES

COOITIOS TO MOTO: AVOID HEAT, SPARKS, OPEN PLANES.

DEOPATIBILITY GATERIALS TO ANDIO): STRONG OXIDIZERS

ALAROGA DECOPOSITION OF MISCOURTS: CARBON MONOXIDE, CARBON DIOXIDE

WINDLE PLYERILATION: MAY OCCUR? NO WILL NOT OCCUR? YES

DOITION TO MOID: NONE KNOWN

1/A - NOT APPLICABLE

#### PAGE 2 OF 2

#### SECTION V DEATH HAZARD MITAD

RBV. 2 No. 1133

<u>rcute(s) of entry:</u> inhalation? YES skin? NO ingestion? YES other: None

#### HEALTH HAZAROS (ACUTE AND CHRONIC)

NOTE: LIQUID OR VAPOR CONTACT HAY CAUSE IRRITATION OF THE EYES, SKIN, HOSE, THROAT, AND RESPIRATORY SYSTEM AND HAY RESULT IN CENTRAL NERVOUS SYSTEM (ONS) DEPRESSION. THIS MATERIAL IS TOXIC AND MAY BE HARDFUL IF SWALLOWED. OFDIG PROLONGED CONTACT WITH THE SKIN MAY CAUSE REDNESS, DRYING AND CHACKING TO THE SKIN. PROLONGED OVEREXPOSURE TO SOLVENTS MAY CAUSE PERHANENT BRAIN AND NERVOUS DAMPAGE.

CARCINOSENICITY: NTP? NO IARC NONOGRAPHS? NO., OSHA REGULATED? NO OTHER: NONE NO INGREDIENTS LISTED AS CARCINOGENS.

#### SING AND SYMPTONS OF EXPOSURE:

IRRITATION, HEADACHE, DIZZINESS, NAUSEA, INCOORDINATION, DROWSINESS AND LOSS OF CONSCIOUSNESS.

#### NEDICAL CONDITIONS REDIEVALLY AGGRAPATED BY EXPOSURE:

NONE PRESENTLY KNOWN.

#### EVERGENCY AND FLOST ATO PROCEDURES:

EYES: FLUSH WITH COPIOUS QUANTITIES OF WATER. GET HEDICAL ATTENTION. SKIN: WASH WITH SOAP AND WATER. INHALATION: REMOVE FROM EXPOSURE. GET MEDICAL ATTENTION IF EXPERIENCING EFFECT OF OVEREXPOSURE. MESSION: GET INNEDIATE MEDICAL ATTENTION. INDUCE VONITING BY TOUCHING PINGER TO BACK. OF THROAT. KEEP VICTIH'S HEAD BELOW HIPS WHILE VOMITING.

#### SECTION VI OPRECAUTIONS FOR SAFE HANDLING AND USED

#### STEPS TO BE TAKEN IN CASE NATERIAL IS RELEASED OR SPILLED.

ELIMINATE ALL IGNITION SOURCES. HANDLING EQUIPMENT MUST BE GROUNDED TO PREVENT SPARKING. EVACUATE THE HAZARD AREA OF UNPROTECTED PERSONNEL. ABSORB SPILLED MATERIAL WITH ABSORBENT MATERIAL AND PLACE IN NON-LEAKING CONTAINER.

#### WASTE DISPOSAL METHOD:

DISPOSE OF IN ACCORDANCE WITH LOCAL, STATE, PEDERAL REGULATIONS. RECOMMENDED HETHOD IS INCINERATION.

#### PRECAUTIONS TO BE TAKEN IN MANOLING AND STURING:

KEEP AWAY FROM HEAT, SPARKS, AND OPEN FLAMES. KEEP CONTAINERS TIGHTLY CLOSED. GROUND ALL HANDLING EQUIPMENT. STORE IN A COOL, DRY PLACE.

OTHER PRECAUTIONS: HINIMIZE SKIN CONTACT.

#### SECTION VII (CONTRACTORS)

#### RESPIRATORY PROTECTION (SPECIFY TYPE):

IP EXPOSURE EXCEEDS LIMITS, USE A NIOSH-APPROVED RESIDENTOR.

MOR 001349

VENTILATION: LOCAL EXHAUST: PREFERABLE

SPECIAL:

NONE NEEDED

MECHANICAL (GENERAL): ADEQUATE

OTHER:

NONE NEEDED

PROTECTIVE GLOWES: NEOPREME, VITON, BUTYL, NITRILE DE PROTECTION: CHEMICAL GOOGLES

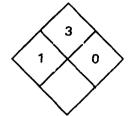

#### OTHER PROTECTIVE CLOTHING OR EQUIPMENT:

WEAR PROTECTIVE CLOTHING TO PREVENT SKIN CONTACT. SAFETY SHOWER AND EYE WASH STATION.

|                         |             | 1)                               |       |
| SOLUBILITY IN WATER     | Complete    | ρН                               | NA    |
| APPEARANCE AND ODOR     | Clear, colo | rless liquid, non-residual odor. |       |

#### SECTION IV - FIRE AND EXPLOSION HAZARD DATA

ESTIMATED FLAMMABLE LIMITS (% By Volume in Air) LEL:2.0 UEL:12.0 FLASH POINT Deg. F. T.C.C. 54

EXTINGUISHING MEDIA Carbon dioxide or dry chemical.

SPECIAL FIRE FIGHTING Use NIOSH approved self-contained breathing apparatus PROCEDURES in enclosed area.

UNUSUAL FIRE AND Vapors are heavier than air and may travel along EXPLOSION HAZARD ground. Never use welding torch on or near metal

containers (even empty).

### SECTION V(a) - HEALTH HAZARD DATA

(Symptoms/Effects of Overexposure)

Can cause nasal irritation, dizziness, nausea, headache. INHALATION:

Can cause gastrointestinal irritation, nausea, vomiting and

diarrhea.

SKIN: Prolonged or repeated contact can cause defatting and

dermatitis.

EYES: Can cause severe irritation, tearing, blurred vision.

Will injure eye tissue if not removed promptly.

LISTED

INGESTION:

CARCINOGENS: None.

### SECTION V(b) - HEALTH HAZARD DATA

(Emergency & First Aid Procedures)

INHALATION If affected, remove individual to fresh air. If breathing is

difficult, administer oxygen. Get medical attention.

INGESTION Call physician or Poison Control Center immediately. DO NOT

induce vomiting. Never give anything by mouth to an unconscious

SKIN CONTACT Wash exposed area with soap and water. Remove contaminated

clothina.

EYE CONTACT Flush eyes with large amount of water lifting upper and lower

lids occasionally. Get prompt medical attention.

#### SECTION VI - REACTIVITY DATA

STABILITY

CONDITIONS

Heat, sparks and open flames.

STABLE: X UNSTABLE:

TO AVOID

*INCOMPATIBILITY* 

Strong oxidizing agents.

(Materials to Avoid)

**HAZARDOUS** 

Carbon dioxide and carbon monoxide.

**DECOMPOSITION** 

**PRODUCTS** 

HAZARDOUS POLYMERIZATION

CONDITIONS TO NA

WILL OCCUR: WILL NOT OCCUR:X

**AVOID** 

### SECTION VII - SPILL or LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED

SMALL SPILL: Absorb liquid on paper, vermiculite, floor absorbent, or other absorbent material and transfer to hood. Ventilate area.

LARGE SPILL: See section X.

WASTE DISPOSAL Destroy by approved incineration or deposit in approved landfill.

Must be in accordance with Federal, State, and Local Laws and Regulation

#### SECTION VIII - SPECIAL PROTECTION

RESPIRATORY If threshold limit value is exceeded, use NIOSH approved

respirator for organic vapors.

EYEWEAR Chemical splash goggles in compliance with OSHA regulations are

advised. Provide eye bath near work site. Always protect eyes.

CLOTHING/GLOVES Wear resistant gloves such as rubber, neoprene or plastic.

VENTILATION Provide sufficient mechanical (general and/or local exhaust)

ventilation to maintain exposure below TLVs.

#### SECTION IX - SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING

Observe precautions for a flammable liquid. Keep container closed when not in use. Store away from ignition sources in cool dry area. Use adequate ventilation. Read all container labeling. Use eye protection.

#### OTHER PRECAUTIONS:

CONTAINERS: Since empty containers may retain product residues (vapor, liquid, or solid) all labeled hazard precautions must be observed. FOR INDUSTRIAL USE ONLY. KEEP OUT OF REACH OF CHILDREN. DO NOT TAKE INTERNALLY.

#### SECTION X - ADDITIONAL INFORMATION

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: (continued)

LARGE SPILL:

Ventilate area. Eliminate all ignition sources (flares, flames including pilot lights, electrical sparks). Persons not wearing protective equipment should be excluded from area of spill. Dike area of spill to prevent spreading. Pump liquid to salvage tank. Remaining liquid may be taken up clay or other absorbent material and shoveled into containers.

Toxic Substance Control Act (TSCA) Status:
All ingredients of this product are listed on the TSCA inventory.

SARA TITLE III (Section 313):
Components present in this product at a level which could require reporting under the statute are:

None

CALIFORNIA SCAQMD RULE 443.1 VOCS: Contains 782 grams/liter of Isopropyl Alcohol.

#### CERCLA:

If this product is accidentally spilled, it is not subject to any special reporting under the requirements of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). We recommend you contact local authorities to determine if there may be other local reporting requirements.

SARA TITLE III (Sections 311/312):
This product is classified into the following hazard categories;
Immediate health. Delayed health. Fire.

# EMERGENCY TELEPHONE NUMBER CHEMTREC 1-800-424-9300 DAY or NIGHT

The information contained herein is based on data considered accurate and is offered at no charge. No warranty is expressed or implied regarding the accuracy of this data. Liability is expressly disclaimed for loss or injury arising out of use of this information of the use of any materials designated.

ingredient subject to the reporting requirements of the Superfund Amendments and Reauthorization Act (SARA) Section 313, 40 CFR 372.65 C

II-10

#### Section III - PHYSICAL DATA

PRODUCT WEIGHT - See TABLE SPECIFIC GRAVITY - 0.77-1.0 BOILING RANGE - 132-395 °F VOLATILE VOLUME - 48-100 %

EVAPORATION RATE - Slower than Ether VAPOR DENSITY - Meavier than Air MELTING POINT - N.A.

SOLUBILITY IN WATER - N.A.

#### Section IV - FIRE AND EXPLOSION HAZARD DATA See TABLE

FLANGUABILITY CLASSIFICATION FLASH POINT RED LABEL - Flammable, Flash below 100 °F LRC. 0.7 UEL 36.5

EXTINGUISHING MEDIA

Carbon Dioxide, Dry Chemical, Foam UNUSUAL FIRE AND EXPLOSION HAZARDS

Keep containers tightly closed. Isolate from heat, electrical equipment, sparks, and open flame. Closed containers may explode when exposed to extreme heat. Application to hot surfaces requires special precautions. During emergency Conditions overexposure to decomposition products may cause a health hazard. Symptoms may not be immediately apparent. Obtain medical attention.

SPECIAL FIRE FIGHTING PROCEDURES

Full protective equipment including self-contained breathing apparatus should be used. Water spray may be ineffective. If water is used, for nottles are preferable. Water may be used to cool closed containers to prevent pressure build-up and possible autoignition or explosion when exposed to extreme heat.

#### Section V — HEALTH HAZARD DATA

#### ROUTES OF EXPOSURE

Exposure may be by INHALATION and/or SKIN or EYE contact, depending on conditions of use. To minimize exposure, follow recommendations for proper use, ventilation, and personal protective equipment.

#### **ACUTE Health Hazards**

EFFECTS OF OVEREXPOSURE

Irritation of eyes, skin and respiratory system. May Cause nervous system depression. Extreme overexposure may result in unconsciousness and possibly death. SIGNS AND SYMPTOMS OF OVEREXPOSURE

Headache, dizziness, nausea, and loss of coordination are indications of excessive exposure to vapors or spray mists.

Redness and itching or burning sensation may indicate eye or excessive skin exposure. MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE

Enamel Hardeners may cause allergic respiratory and/or skin reaction in susceptible persons or sensitization. This effect may be delayed several hours after exposure. EMERGENCY AND FIRST AID PROCEDURES

If INNALED: If any breathing problems occur during use, LEAVE THE AREA and get fresh air. If problems remain or occur later, IMMEDIATELY get medical attention.

Wash affected area thoroughly with soap and water.

Remove contaminated clothing and launder before re-use. Flush eyes with large amounts of water for 15 minutes. Get medical attention. If in EYES: If SWALLOWED: Get medical attention.

**CHRONIC Health Hazards** 

No ingredient in these products is an IARC, NTP, or OSHA listed carcinogen.

Prolonged overexposure to solvent ingredients in Section II may cause adverse effects to the liver, urinary, blood forming, cardio-vascular, and reproductive systems,

Persons sensitive to isocyanates will experience increased allergic reaction on repeated exposure to isocvanates in Enamel Hardeners.

Methyl Ethyl Ketone may increase the nervous system effects of other solvents. Reports have associated repeated and prolonged overexposure to solvents with permanent brain and nervous system damage.

#### Section VI -- REACTIVITY DATA

STABILITY - Stable CONDITIONS TO AVOID

None known. INCOMPATIBILITY

Contamination of Hardeners with Water, Alcohols, Amines, and other compounds which react with isocyanates, may result in dangerous pressure in, and possible bursting of, closed containers. HAZARDOUS DECOMPOSITION PRODUCTS

By fire: Carbon Dioxide, Carbon Honoxide

HAZARDOUS POLYMERIZATION - Will Not Occur

#### Section VII - SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED

Remove all sources of ignition. Ventilate and remove with inert absorbent.

If Enamel Hardeners are spilled, all personnel in the area should be protected as in Section VIII. Cover spill with absorbent material. Deactivate spilled material with a 10% ammonium hydroxide solution (household ammonia). After 10 minutes, collect in open containers and add more ammoni. Cover loosely. Wash spill area with soap and water.

WASTE DISPOSAL METHOD

Waste from these products may be hazardous as defined under the Resource Conservation and Recovery Act (RCRA) 40 CFR 261. Waste must be tested for ignitability to determine the applicable RPA hazardous waste numbers. Waste from products containing Hethyl Ethyl Ketone may also require extractability testing.

Incinerate in approved facility. Do not incinerate closed container. Dispose of in accordance with Federal, State, and Local regulations regarding pollution.

#### Section VIII - PROTECTION INFORMATION

PRECAUTIONS TO BE TAKEN IN USE

NO PERSON SHOULD USE THE ENAMEL HARDENERS, OR BE IN THE AREA WHERE THE HARDENERS ARE BEING USED. IF THEY HAVE CHRONIC (LONG-TERM) LUNG OR BREATHING PROBLEMS OR IF THEY EVER HAD A REACTION TO ISOCYANATES.

Use all products only with adequate ventilation. Avoid breathing vapor and spray mist. Avoid contact with skin and eyes. Wash hands after using.

These coatings may contain materials classified as nuisance particulates (listed "as Dust" in Section II) which may be present at hazardous levels only during sanding or abrading of the dried film. If no specific dusts are listed in Section II, the applicable limits for nuisance dusts are ACGIN TLV 10 mg./m3 (total dust), OSHA PEL 15 mg./m3 (total dust), 5 mg./m3 (respirable fraction). VENTILATION

Local exhaust preferable. General exhaust acceptable if the exposure to materials in Section II is maintained below applicable exposure limits. Refer to OSHA Standards 1910.94, 1910.107, 1910.108.

RESPIRATORY PROTECTION

ENAMEL MARDEMERS -- Where overspray is present, a positive pressure air supplied respirator (TIC19C NIOSH/MSNA approved) should be worn. If unavailable, a properly fillted organic vapor/ particulate respirator approved by NIOSH/MSHA for protection against materials in Section II may be effective. Follow respirator manufacturer's directions for use. Wear the respirator for the whole time of spraying and until all vapors and mists are gone. NO PERSONS SHOULD BE ALLOWED IN THE AREA WHERE THIS PRODUCT IS BEING USED UNLESS EQUIPPED WITH THE SAME RESPIRATOR PROTECTION RECOMMENDED FOR THE PAINTERS.

ALL OTHER PRODUCTS -- If personal exposure cannot be controlled below applicable limits by ventilation wear a properly fitted organic vapor/particulate respirator approved by NIOSH/MSHA for protection against materials in Section II.

When sanding or abrading the dried film, wear a particulate respirator approved by NIOSH/HSHA for protection against non-volatile materials in Section II. PROTECTIVE GLOVES

Wear gloves which are recommended by glove supplier for protection against materials in Section II

EYE PROTECTION

Wear safety spectacles with unperforated sideshields.

OTHER PROTECTIVE EQUIPMENT

Use barrier cream on exposed skin when using ENAMEL HARDENERS.

#### Section IX — PRECAUTIONS

DOL STORAGE CATEGORY - See TABLE

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING

Contents are FLAMMABLE. Keep away from heat, sparks, and open flame. Vapors may accumulate readily and may ignite spontaneously. During use and until all vapors are gone: Keep area ventilated - Do not smoke - Extinguish all flames, pilot lights, and heaters - Turn off stoves, electric tools and appliances, and any other sources of ignition.

Consult NPPA Code. Use approved Bonding and Grounding procedures.

Keep container closed when not in use. Transfer only to approved containers with complete and appropriate labeling. Do not take internally. Keep out of the reach of children. OTHER PRECAUTIONS

These products may be mixed with other components before use. Before opening the packages, READ AND FOLLOW WARNING LABELS ON ALL COMPONENTS.

Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal.

#### Section X — OTHER REGULATORY INFORMATION

CALIFORNIA PROPOSITION 65

WARNING: These products contain chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.

#### MOR 001358

The above information pertains to these products as currently formulated, and is based on the information available at this time. Addition of reducers or other additives to these products may substantially alter the composition and hazards of the products. Since conditions of use are outside our control, we make no warranties, express or implied, and assume no liability in connection with any use of this information.

| SECTION 4 - | FIRE AND | EXPLOSION | HAZARD DATA |
|-------------|----------|-----------|-------------|

FLAMMABILITY:

This product is not classified as fiammable or combustible; however, it will burn if its temperature reaches or exceeds its

fash point.

EXTINGUISHING MEDIA:

Dry Chemical, water-log, chemical foam, or CO<sub>2</sub>. Direct

water-streem may cause frothing.

SPECIAL FIREFIGHTING PROCEDURE:

Use water to cool fire-exposed containers. Wear full emergency equipment with supplied-air respirator (8A), or

self-contained breathing apparatus (SCBA).

UNUSUAL FIRE & EXPLOSION HAZARDS:

None known.

FLASH POINT ("C/F) AND METHOD:

285/545, ASTM D 92 (C.O.C.)

FIRE POINT ("C"/F) AND METHOD:

Not determined.

FLAMMABLE LIMITS (% by volume):

Upper: Not determined. Lower: Not determined.

AUTOIGNITION TEMPERATURE ("C/"F):

Not determined.

**HAZARDOUS COMBUSTION PRODUCTS:** 

Smoke and toxic gases including exides of carbon and

ntrocen.

#### SECTION 6 - TOXICOLOGICAL PROPERTIES & HEALTH HAZARD DATA X Skin Contact Skin Absorption X Eye Contact X Inhalation ROUTES OF ENTRY: X Ingestion **SYMPTOMS AND EFFECTS OF ACUTE EXPOSURE:** Skin: May cause skin imitation. Eyes: Product, vapors, and mist may cause sys irritation and burning. Vapors may irritate the mucossi membranes of mouth, nose, and throat. inhelation: Intense and/or prolonged exposure to vapor concentrations exceeding the TLV/PEL may cause headache, nauses, and vomiting. Oil vapors may accumulate in the lungs, and may cause chemical pneumonitis. ingestion via minor contamination of fingers or food is not likely to cause ingestion: significant discomfort or adverse effect. However, aspiration (with vomitual) into the lungs may cause mild to severe pulmonary injury, and may be tatal. SYMPTOMS AND EFFECTS OF CHRONIC EXPOSURE: Prolonged or repeated contact tends to remove natural skin oil, and may Skin: cause irritation, rash, and possibly demartitis. Product, vapors, and mist may cause eye irritation and burning. Eyes: Chronic inhalation may produce the same symptoms and effects discussed Inhalation: under Inhalstion - ACUTE EXPOSURE, above. ingestion: in the normal course of industrial use, ingestion of large quantities of this product is unlikely. Nevertheless, ingestion may intrate the gastrointestinal tract and may cause nouses and vomiting. Aspiration (with vomitus) into the jungs may cause pulmonary injury and may be fatal. MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: Edeting chronic dermal, respiratory, and possibly gastrointestinal diseases. Not determined for this product. See Section 2 - HAZARDOUS EXPOSURE LIM!TS: INGREDIENTS, in this MSDS, for ingredient(s) limits. Possible intency of sidn, eyes, mucosal membranes, and respiratory tract. IRRITANCY: SENSITIZATION: None known. CARCINOGENICITY: NTP Listed: IARC Listed:

TERATOGENICITY AND EMBRYOTOXICITY: This product is not known to contain, at 0.1% or higher, any ingredients known to cause teratogenic or embryonic toxicity.

MSOS 930 January 14, 1991

Page 5 of 10

MOR 001364

)ate: 02-09-99 09:46:57 AM

REPRODUCTIVE TOXICITY:

This product is not known to contain, at 0.1% or higher, any ingradients

known to cause reproductive toxicity.

MUTAGENICITY:

This product is not known to contain, at 0.1% or higher, any ingredients

known to cause mutation in the living cell.

SYNERGISTIC PRODUCTS:

None known.

#### SECTION 7 - PREVENTIVE MEASURES AND PERSONAL PROTECTION

It is unlikely that serious overexposure to this product will occur during normal industrial use. Nevertheless, the user must exercise adequate precautions to protect against accidental spills, and to avoid undue exposure to sprays, mists, or vapors that may be inactivated type anerated, sepecially at elevated temperatures. The following protective measures are recommended whenever undue exposure is unavoidable.

**GLOVES:** 

Oli-impervious and solvent-resistant (e.g. neoprene) type.

RESPIRATOR:

OSHA/NIOSH-approved supplied-air respirator (SA), or self-contained

breathing apparatus (8CBA).

**EYE PROTECTION:** 

Chemical googles or, preferably, full face-shield. Do not wear contact lenses

in the work area.

FOOTWEAR:

Oli-Impervious (e.g. neoprene) cover and anti-stip sole construction.

CLOTHING:

Oil-impervious (e.g., neoprane) apron or, preferably, coveralis.

OTHER PROTECTION:

As deemed necessary.

PERSONAL HYRIENE: Wash hands before esting or smoking. Do not smoke in the work area. Promptly remove contaminated crothing. Immediately clean up any spills, to prevent accidental slipping.

ENGINEERING CONTROLS: General ventilation, normally adequate, should be augmented with local exhaust whenever the TLV/PEL is exceeded, or worker discomfort is reported or observed.

LEAK AND SPILL PROCEDURE: Wear adequate protection and eliminate all sources of ignition. Stop the leak, if it can be safely done. Ventilate the area and dike the spill to prevent antry into sewer or watercourses. Suction or scoop the spill into appropriate disposal or recycling vessels, then cover the spill srua with oil-absorbent. Label all waste containers appropriately, including all applicable hazard symbols. If spill enters U.S. nevigable waters, the contiguous zone, or adjoining shorelines, nizity the Coast Guard National Response Center (Tel. No. 800-424-4802).

WASTE DISPOSAL: Dispose of waste in accordance with applicable Federal, State (or Province), and local laws and regulations. (The services of floensed hazardous waste-disposal facilities may be utilized.) It is the user's responsibility to comply with the U.S. Clean Air Act, Clean Water Act, and Resource Conservation and Recovery Act. Refer to Section 10 - REGULATORY INFORMATION, in this M803.

HANDLING PROCEDURES & EQUIPMENT: Exercise prudent precautions to evoid accidental spillage, food contamination, yepor or mist inhalisticn, eye or skin contact, and ignition of this product.

STORAGE REQUIREMENTS: Store in a clean, dry area below 49°C/120°F, away from all lightion sources and incompatible materials listed in SECTION 5 - REACTIVITY DATA, in this MSDS.

SPECIAL SHIPPING INFORMATION: See Sections 9 & 10, in this MSDS.

#### SECTION 8 - FIRST AID AND EMERGENCY MEASURES

SKIN: Wipe off, then wash thoroughly with soap and water.

EYES: Flush immediately with water for at least 15 minutes, occasionally lifting the eyelid. Get prompt medical attention.

RHALATION: Immediately remove the individual to fresh air. If breathing is difficult, administer oxygen, if breathing stops, administer artificial respiration. Keep the individual warm and quiet, and get prompt medical attention.

INGESTION: If the individual is conscious, give 1-2 glasses of milk or water to dikite stomach content. Do not physically induce vomiting. Never give anything by mouth to an unconscious person. As with all acoldental chemical ingestions, use all available precautions to prevent approximation of vomitus into the lungs, which may be fatal. Position the patient's head so as to facilities expulsion of vomitus. Get prompt medical attention.

NOTE TO PHYSICIAN: Injubate the stomach. Appirate the pharynx as regularly as possible to remove gagged or vomited stomach content.

# CHAIN OIL

### Product Data Sheet

Tribol 930 is a high temperature synthetic oven chain tubricant and is particularly suitable for use in tunnel ovens used in the lithograph and metal decorating industries. The engineered volatility of this blend of synthetic base fluids allows for extended application cycles and the control of product consumption and cleanliness. Tribol 930 has been approved by USDA as an H2 lubricant suitable for use in federally inspected meat and poultry packaging plants.

This highly stable synthetic blend is additionally compounded to protect against a corrosive atmosphere and resist oxidation at high temperatures. Its natural lubricating ability is fortified with antiwear agents for thin film protection during boundary lubrication.

#### DESCRIPTION

Tribol 930 is manufactured from a blend of complex ester fluids selected for their favorable volatility characteristics, as well as their physical and chemical stability at high temperatures.

The viscosity of Tribol 930 can support fluid film lubrication on chain pins even with temperatures in excess of 350°F/177°C. Tribol 930 contains antiwear additives for additional protection in boundary lubrication from surging toads and very high temperatures.

Tribol 930 contains inhibitors against corrosion and oxidation, further extending the life of the chain and the lubricant in service.

#### **APPLICATIONS**

Tribol 930 is recommended for use at temperatures above 350°F/177°C.

Tribol 930 is designed for the lubrication of roller chains, slides, cams, and general lubrication where a high temperature synthetic lubricant is needed and the viscosity of Tribol 930 meets the operating viscosity-temperature requirements.

Tribol 930 especially meets the needs of litho/ coater oven chains in the metal decorating and coating industry, and various other oven conveyors used in baking, drying, and curing. Application may be achieved by drip, spray, splash, pump, or automatic dispensing equipment that can handle an oil of SAE 40 viscosity classification.

#### ADVANTAGES

Application amount and frequency can be minimized due to the lubricant's volatility characteristics.

Soilage due to drip or "blow-off" is minimized by reduced application.

Chain wear is controlled by excellent fluid film and antiwear properties.

Built-in cleansing action virtually eliminates shuldowns for periodic cleaning of equipment and tends to dissolve and facilitate removal of gums, varnish, and carbonaceous residues from previous lubricants.

Fire and explosion possibilities are greatly reduced as Tribol 930 has extremely low carbon forming tendency, and an autoignition temperature far exceeding petroleum products.

Seal leakage is minimized when Tribol 930 is used in conjunction with Buna A. Viton, silicone rubber, and EPOM elastomer sealing materials.

Please see Reverse Side for Notes and Typical Properties.

#### AUTANIAGES (CONTINUES)

Cost reduction is accomplished by extended lubrication cycles, reduced soilage, decreased downtime for repairs and maintenance, and longer parts life.

#### NOTES

Tribol 930 High Temp Chain Oil is compatible with petroleum base lubricants. However, lubricating devices should be cleaned before beginning ser-

vice with Tribol 930 so as not to introduce impurities from the former lubricant.

Tribol 930 should not be used around parts containing polycarbonates as it can have a softening effect. Under no circumstances should it be used where neoprene seals are present.

For specific terms, conditions, warranty, and availability, refer to Tribol Price List in effect at time of purchase.

Safety data sheet according to directive 91/155 EEC

Released: 02/1995 Last update: 06/25/99 Name: Turmofluid 40 B

Page 1of 1 Printed: 12.03.01 11:18

1. Commercial product name and company identification:

Trade name:

Turmofluid 40 B

Company:

LUBRICANT CONSULT GMBH

Gutenbergstrasse 13

D-63477 Maintal 2 (Germany)

Additional information:

Europe

Phone (+49) 06109 76 500

Fax (+49) 06109 76 50 51

North America

Phone 616-247-0129

Fax 616-247-0801

2. Composition / Information on ingredients:

Combination of synthetic hydrocarbons, synthetic esters and additives.

CAS Numbers: 9003-27-4, 90218-76-1

3 Hazards identification:

When properly handle this product is not dangerous to human health. Harmful effects are expected only in case of misuse, especially in case of thermal decomposition.

4. First aid measures:

Skin contact: Wash with water and soap. Remove contaminated clothing.

Eye contact: Flush with plenty of water for at least 15 minutes. See a physician\* if the

eye imitation remains.

See a physician\* if necessary. Do not induce vomiting. Ingestion:

Inhalation: After inhaling of decomposition vapours: Remove the patient to fresh air.

\*Show the physician this safety data sheet.

5. Fire fighting measures:

Suitable extinguishing media: dry chemicals, powder, foams, carbon dioxide. In the case of fire, try to take the containers out of the danger zone. Otherwise keep them cool by spraying with water. Use a respirator to protect from vapours.

6. Accidental release measures:

Absorb small amounts with inert material. Collect the released product and the used absorbent materials in suitable containers for disposal (s. sect. 13). Hold back large amounts of the liquid by embankment (mound of soil, sand or other inert material). Use pumps or call the fire department, if necessary. Avoid uncontrolled discharge in sewage systems, surface and underground water. Do not smoke when handling released product. Avoid the contact with fire and sparks. Take measures against electrical charge.

7. Handling and store measures:

Store in cool and dry areas. Ventilation in the store and in working areas is commendable. Do not eat, drink and smoke in working areas.

8. Exposure control / Personal protection:

Hand protection:

Not necessary in normal use. When often handling the product

wear rubber gloves.

Respiratory protection:

Not necessary in normal use. Avoid breathing the aerosol or

other vacours.

Eye protection:

Not necessary in normal use. Wear safety classes, if

necessary.

9. Physical and chemical properties:

Physical state:

Souid

Rec 3/23/01

Colour: yellow - brownish Odour:

Pour point: Boiling point:

Density:

Viscosity:

typical

> +200°C (+392°F)

0.915 g/cm<sup>3</sup> 270 mm<sup>2</sup>/s

@ +20°C (+68°F)

**DIN 51757** @ +40°C (+104°F) DIN 51562

Solubility in water: insoluble

pH-value:

Flash point: Ignition temperature: > +260°C (+500°F) +290°C (+554°F)

Explosion limits:

not determined

10. Stability and reactivity:

Thermal decomposition: > +250°C (+482°F)

Hazardous decomposition products: No decomposition under normal storage and handling conditions. In the case of misuse at temperatures above the decomposition temperature harmful vapours may arise from the product. Materials to avoid contact: strong oxidising agents (compressed or liquid oxygen), strong acids and alkalis.

11. Toxicological Information:

Experimental toxicological data: oral: LD<sub>50</sub> > 2000 mg/kg (rat)

epidermal: weak eye irritation

Turmofluid 40 B when properly handled is not dangerous for human health and has no known effects of chronic or carcinogenesis (based on data of components).

12. Ecotoxicological information:

Use the product according to the good working practices avoiding polluting the environment. Avoid the contamination of soil and water. WGK 1 (self classification)

13. Disposal considerations:

Destroy the waste product by incineration according to local laws and regulations. Turmofluid 40 B contains no halogens and no toxic metals.

Waste code number for filled containers: 598 01

14. Transport information:

The product is not dangerous for transportation

Road transportation: Rail transportation: Sea transportation: Air transportation:

(RID) IMDG/IMO ICAO / IATA

(ADR)

not classified not classified not classified not classified

U.N.-number: Packaging group:

not assigned not assigned

15. Regulatory information:

No regulation and classification according to EEC directives necessary, no labelling with hazard symbols required. Aquatic toxicity: 1 (= German water hazard classification)

16. Further Information:

The information given in this safety data sheet is for safety purpose only. It is given in good faith and based on the best knowledge and experience of the company at the date of issuing. The company is not responsible for damages caused by the use of the product in applications for which it was not intended or for conditions of use outside its control. Previous versions of this material safety data sheet are no longer valid.

#### 3/12/01

### **TURMOFLUID 40 B**

### High Temperature Chain Oil

TURMOFLUID 40 B is a highly stable and extremely adherent chain oil for high as well low temperatures. Due to its low surface tension TURMOFLUID 40 B penetrates all parts of the chain providing optimum wear protection and reducing chain stretching. It forms an extremely adherent, transparent and odorless lubricating film even at high speeds and with all types of chains. TURMOFLUID 40 B is especially designed for the chains of the wood processing industry. TURMOFLUID 40 B may be applied manually and by drip-feed lubricators as well as by central lubrication systems.

\* SUBJECT TO REPORTING REQUIREMENT OF SECTION 313 OF TITLE III OF SARA (40 CFR PART 372).

1) This chemical is included on the list of Hazardous Air Pollutants (HAPs) from Title III of the Clean Air Act Amendments of 1990 (Glycol Ethers Category).

The recommended permissible exposure limits (PEL) indicated above reflect the levels adopted by OSHA in 1989. Although, some of the 1989 levels have since been vacated, the Nazdar Company recommends that the lower exposure levels be observed as reasonable worker protection.

SECTION 3 -- HAZARDS IDENTIFICATION

#### GENERAL HEALTH EFFECTS

THE FOLLOWING INFORMATION HAS BEEN DEVELOPED BASED UPON USING THE PRODUCT AS INTENDED BY THE MANUFACTURER. The potential health effects of this product are based on the hazards of its components. The use of this product in combination with other products may produce synergistic (additive) health effects. Cautionary labeling and material safety data sheets of all materials used with this product should be reviewed before use.

#### **EYES**

Eye contact with liquid, vapors or mists may cause moderate to severe irritation, including burning, tearing, redness or swelling.

Skin contact may cause irritation. Symptoms may include dryness, chapping and redness. Penetrates the skin readily. Toxic and may be harmful if absorbed through the skin.

Repeated and prolonged overexposure by inhalation may cause respiratory tract irritation. Symptoms may include central nervous system disorders such as headaches, dizziness, weakness and fatigue.

Ingestion may cause gastrointestinal tract irritation. Symptoms may include headaches, nausea and vomiting. Contains material that may be moderately toxic if ingested.

#### CHRONIC EFFECTS/TARGET ORGANS

Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal.

#### ANIMAL STUDIES

2-Butoxyethanol has caused reproductive and blood disorders resulting in kidney, liver and lung damage in lab animals. For animal studies, reference TSCA Section 4 Test Rule Results or contact the manufacturer for further details.

#### MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE

Pregnant women and persons with pre-existing health disorders should consult their physician before using this product. Repeated and prolonged overexposure and/or individual sensitivity may increase the potential for and degree of adverse health

Full protective equipment including self-contained breathing apparatus (SCBA) is recommended to protect firefighters.

SPECIAL FIRE FIGHTING PROCEDURES

Water may be ineffective but may be used to cool containers. Fumes released on burning may be toxic and dangerous.

SECTION 6 -- ACCIDENTAL RELEASE MEASURES

RELEASE MANAGEMENT MEASURES

Remove all sources of ignition (flames, hot surfaces and electrical, static or frictional sparks). Avoid contact or breathing vapors. Ventilate area. Contain release and remove with inert absorbent. Use non-sparking tools to place material in appropriate container for disposal. The National Response Center (800-424-8802) and local authorities should be contacted for any reportable spill/release.

SECTION 7 -- HANDLING AND STORAGE

HANDLING AND STORAGE METHODS

Use in a well ventilated area. Follow all MSDS/label precautions even after container is emptied; container may retain product residues. Store in closed containers in cool, dry, well ventilated area away from sources of ignition. Keep containers closed when not in use. Smoke in designated areas only. Avoid prolonged or repeated overexposure to this product. Keep out of reach of children. Follow label directions carefully. Do not take internally. Harmful or fatal if swallowed.

PAGE: 3 OF 5

#### RESPIRATORY PROTECTION

If concentrations of hazardous ingredients exceed exposure limits listed in Section 2 an appropriate NIOSH (National Institute for Occupational Safety and Health) approved respirator with an organic vapor cartridge should be used. If material is handled under mist, spray or dust forming conditions, a P100 (99.97% efficiency) filter should be used in addition to the organic vapor cartridge. If no exposure limits are listed in Section 2, follow general safety guidelines in 29 CFR 1910.134 Respiratory Protection or other applicable respiratory standard.

#### SKIN PROTECTION

Use neoprene, nitrile or other gloves resistant to chemicals listed in Section 2. Contact a reputable safety supply company for appropriate gloves. Solvent resistant aprons are recommended. Prevent prolonged skin contact with contaminated clothing.

#### EYE PROTECTION

Use ANSI (American National Standards Institute) approved safety glasses, faceshield or splash proof goggles to prevent eye contact. Contact a reputable safety supply company for appropriate eye protection. The availability of an eye wash is highly recommended.

#### EXPOSURE GUIDELINES

See Section 2 "Composition, Information on Ingredients" for occupational exposure limits.

#### HYGIENIC PRACTICES

Wash with soap and water before eating, smoking or using toilet facilities. Separately wash or discard clothing and footwear before reuse. NEVER try to remove ink from the skin by using solvent or thinner. Such action is likely to increase the possibility of undesirable effects. Remove contaminated clothing to prevent prolonged skin contact.

#### ENGINEERING CONTROLS

Use applicable engineering controls, work practices and personal protective equipment to ensure all concentrations are kept below the exposure limits listed in Section 2. Adequate controls should be implemented to ensure employee safety from fine mists which may be produced under some printing conditions.

#### TOXIC SUBSTANCES CONTROL ACT STATUS

All ingredients in Section 2 are listed on the U.S. Environmental Protection Agency's Toxic Substances Control Act (TSCA) Inventory and the Canadian Domestic Substance List.

٠.

OTHER REGULATORY INFORMATION

OCCUPATIONAL SAFETY and HEALTH ADMINISTRATION (OSHA) - MSDS is compliant with Occupational Safety and Health Administration Hazard Communication Standard - 29 CFR 1910.1200. AMERICAN NATIONAL STANDARDS INSTITUTE - This MSDS follows the ANSI Z400.1-1993 format. WORKPLACE HAZARDOUS MATERIAL INFORMATION SYSTEM (WHMIS) - This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations (CPR) and the MSDS contains all the information required by the CPR.

### WHMIS CLASSIFICATION (CANADA):

No Data Available

SECTION 16 -- OTHER INFORMATION

#### DISCLOSURE

The information and recommendations contained herein are based upon data believed to be correct. However, no guarantee or warranty of any kind express or implied is made with respect to the information contained herein. The data in this MSDS relates only to the specific material designated herein and does not apply to use in combination with any other material or process.

#### **DEFINITIONS**

ACGIH: American Conference of Governmental Industrial Hygienists

AIHA: American Industrial Hygiene Association

CEILING: (TLV-Ceiling and PEL Ceiling Limit) The ceiling exposure limit or concentration not to be exceeded for even brief times.

DOT: Department of Transportation

HMIS: The Hazardous Materials Identification System (HMIS) developed by the National Paint and Coatings Association (NPCA) to provide information on the acute health hazards, reactivity and flammability of products encountered in the workplace at room temperatures.

HMIS codes assigned for this product are only suggested ratings based on anticipated normal screen printing applications. The employer has the ultimate responsibility for assigning these ratings and should fully evaluate the MSDS, work practices and environmental conditions prior to assigning the appropriate ratings.

HMIS Personal Protection Index of "X-Ask your supervisor" is given on this MSDS due to varying work conditions which may dictate different levels of protection. Please review this MSDS before determining appropriate protective equipment and beginning work.

IARC: International Agency for Research on Cancer

NFPA: National Fire Protection Association

NTP: National Toxicology Program

STEL: Short-Term Exposure Limit: ACGIH terminology for the short-term exposure limit or maximum concentration for a continuous exposure period of 15 minutes.

TLV: Threshold Limit Value. A term ACGIH uses to express the airborne concentration of a material to which most workers can be exposed during a normal daily and weekly work schedule without adverse effects.

TWA: Time-Weighted Average

VOC: Volatile Organic Compound

#### I. PRODUCT IDENTIFICATION

PRODUCT NAME: Sodium Hydroxide 8.88 ± 8.84N

CAS NO.: NA CHEMICAL NAME: Not applicable FORMULA: Not applicable CHEMICAL FAMILY: Not applicable

MSDS NUMBER: M00646

#### II. INGREDIENTS

Sodium Hydroxide

HAZARD: Corrosive, very toxic

Demineralized Water

PCT: to 188 CAS NO.: 7732-18-5 SARA: NOT LISTED
TLV: Not applicable PEL: Not applicable
HAZARD: None

#### III. PHYSICAL DATA

STATE: liquid APPEARANCE: Clear, colorless ODOR: None
SOLUBILITY IN: MATER: Miscible ACID: Miscible OTHER: Not determined
BOILING POINT: Tigg"C MELTING PT.: NA SPEC GRAVITY: 1.28 pH: 14.8
VAPOR PRESSURE: ND VAPOR DENSITY (bir\*1): ND EVAPORATION RATE: U.17
METAL CORROSIVITY — ALUMINUM: >20 In/yr STEEL: 0.00 in/yr
STABILITY: See Conditions to Avoid
STORAGE PRECAUTIONS: Store tightly closed in a cool, dry place.

#### IV. FIRE, EXPLOSION HAZARD AND REACTIVITY DATA

FLASH PT.: Not applicable METHOD: NA
FLAMMABILITY LIMITS - LOWER: NA UPPER: NA
SUSCEPTIBILITY TO SPONTANEOUS HEATING: None
SHOCK SENSITIVITY: None AUTOIGNITION PT.: NA
EXTINGUISHING MEDIA: Not applicable
FIRE/EXPLOSION HAZARDS: Contact with metals gives off hydrogen gas which is
flammable
HAZARDOUS DECOMP. PRODUCTS: None reported
OXIDIZER: No NFPA Codes: Health: 3 Flammablity: 0 Reactivity: 1
CONDITIONS TO AVOID: Extreme temperatures, evaporation; Contact with acids,
halogenated organic compounds, metals, nitro compounds

#### V. HEALTH HAZARD DATA

THIS PRODUCT MAY BE: corrosive to eyes, skin and respiratory tract.
ACUTE TOXICITY: Not determined
ROUTES OF EXPOSURE: Ingestien
TARGET ORGANS: Not determined
CHRONIC TOXICITY: Not determined
ROUTES OF EXPOSURE: Not determined
TARGET ORGANS: Not determined
CANCER INFORMATION: Not epplicable
ROUTES OF EXPOSURE: Not applicable
TARGET ORGANS: Not applicable
OVEREXPOSURE: Causes burns to all body tissues contacted.
MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: Pre-existing eye, skin, er

#### VI. PRECAUTIONARY MEASURES

Avaid contact with eyes, skin and clothing
Do not breathe mist or vapor.
Wash thoroughly after handling.
PROTECTIVE EQUIPMENT: adequate ventilation, lab grade goggles, disposable
latex gloves, lab coat

#### VII. FIRST AID

Call physician.

EYE AND SKIN CONTACT: Immediately flush eyes and skin with water for 15 minutes. Remove contaminated clathing. Call physician.
INGESTION: Do NOT induce vemiting. Give 1 - 2 glasses of water. Call a physician immediately. Never give snything by mouth to an unconscious

physician immediately. Hever give snything by mouth to an unconscious person.

INPLAIATION: Remove to fresh mir. Give artificial respiration if necessary.

#### VIII. SPILL AND DISPOSAL PROCEDURES

IN CASE OF SPILL OR RELEASE: Cover spill with citric acid or another solid acidic material. Scoop slurry to beaker. Add water and neutralize liquid to a pH between 6 and 9. Flush neutralized waste to the drain with excess water.

DISPOSE OF IN ACCORDANCE WITH ALL FEDERAL, STATE, AND LOCAL REGULATIONS.

#### IX. TRANSPORTATION DATA

D.O.T. PROPER SHIPPING NAME: Sodium Hydroxide Solution
HAZARD CLASS: 8 1D: UN1824 GROUP: I1

#### IV. FIRE, EXPLOSION HAZARD AND REACTIVITY DATA

FLASH PT.: 99C; 210F METHOD: closed cup
FLANHABILITY LIMITS - LOWER: ND UPPER: ND
SUSCEPTIBILITY TO SPONTAMEOUS HEATING: None
SHOCK SENSITIVITY: None AUTOIGNITION PT.: Not available
EXTINGUISHING MEDIA: dry chemical, sicohol foam or carbon dioxide
FIRE/EXPLOSION HAZARDS: May emit toxic fumes in fire
HAZARDOUS DECOMP. PRODUCTS: May emit toxic fumes of carbon monoxide and
carbon dioxide in fire
OXIDIZER: No MFPA Codes: Health: | Flammability: | Reactivity: 0
COMDITIONS TO AVOID: Heat, flames, contact with oxidizers

#### V. HEALTH HAZARD DATA

THIS PRODUCT MAY BE: irritating to eyes, skin and respiratory tract.

ACUTE TOXICITY: Slightly toxic

ROUTES OF EXPOSURE: ingestion, skin absorption

TARGET ORGANS: central nervous system

CHRONIC TOXICITY: Not determined

ROUTES OF EXPOSURE: Not determined

TARGET ORGANS: Not determined

CANCER INFORMATION: Not applicable

ROUTES OF EXPOSURE: Not applicable

TARGET ORGANS: Not spplicable

OVEREXPOSURE: Causas moderate eye irritation, nauses, vomiting, headache, central narvous system depression

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: None reported

#### VI. PRECAUTIONARY MEASURES

Avoid contact with eyes and skin.

Do not breathe mist or vapor.

Wash thoroughly after hendling.

PROTECTIVE EQUIPMENT: lab grade goggles, lab coat, rubber gloves, fume hood

#### VII. FIRST AID

EYE AND SKIN CONTACT: Immediately flush eyes with water for 15 minutes. C. physician. Wash skin with soap and plenty of water.
INGESTION: Give large auantities of water. Call physician immediately.
INFALATION: Remove to fresh air.

#### VIII. SPILL AND DISPOSAL PROCEDURES

IN CASE OF SPILL OR RELEASE: Remove all sources of ignition. Absorb spill with non-reactive absorbent. Do not breathe fumes. Incinerate materia; in an EPA-approved facility.

DISPOSE OF IN ACCORDANCE MITH ALL FEDERAL, STATE, AND LOCAL REGULATIONS.

Xylenes 1330-20-7 100 PPM 150 PPM 100 PPM 150 PPM 7 MM Hg @ 20°C Ethyl Benzene 100-41-4 100 PPM 125 PPM 100 PPM 125 PPM 10 MM Hg @ 68°F

SECTION 3 - EMERGENCY AND FIRST AID PROCEDURES

Eye Contact: Move victim away from exposure and into fresh air. Flush eyes with plenty of water for at least 15 minutes while

holding eyelids open. Get medical attention.

Skin Contact: Remove contaminated clothing/shoes. Flush skin with water. Follow by washing with soap and water. If irritation

occurs, get medical attention. Do not reuse clothing until cleaned.

Inhalation: If respiratory symptoms or other symptoms of exposure develop, move victim away from source of exposure and into

fresh air. If symptoms persist, seek immediate medical attention. If victim is not breathing, immediately begin artificial respiration. If breathing difficulties develop, oxygen should be administered by qualified personnel. Seek immediate

medical attention.

Ingestion: Do not induce vomiting. If vomiting occurs spontaneously, keep head below hips to prevent aspiration of liquid into

the lungs. Get immediate medical attention.

Note to Physicians: Exposure to high concentrations of this material (for example, use in enclosed spaces or in cases of deliberate abuse)

may be associated with cardiac arrhythmias. Epinephrine and other sympathomimetic drugs may initiate cardiac arrhythmias in persons exposed to this material. Other drugs with less arrhythmogenic potential should be considered.

If sympathomimetic drugs are administered, observe for the development of cardiac arrhythmias.

SECTION 4 -- PHYSICAL DATA

The following data represent approximate or typical values. They do not constitute product specifications.

Boiling Range: Evaporation Rate: 276-289° (F) Slower than ether

Vapor Density: % Volume:

Heavier than air

Weight Per Gallon:

7.25 Lbs.

n: 7.2

Solubility in Water:

Negligible; less than 0.08%

TRADE NAME: 822 - Xviene (Xviol)

### SECTION 5 -- FIRE AND EXPLOSION DATA

Flammability Classification:

Flash Point:

Autoignition Temperature: Lower Explosive Limit:

Flammable Liquid - Class IB 79° (F) (Tag. Closed Cup). 930°F (Approximate) 1.0% @ 68°F

Extinguishing Media:

Carbon Dioxide, foam, dry chemical, water spray. Do not use direct water stream; it will spread

Unusual Fire and Explosion Hazards:

Flammable. Vapors may cause a flash fire or ignite explosively. Vapors may travel considerable distance to a source of ignition and flash back. Prevent buildup of vapors or gases to explosive

concentrations.

Special Fire Fighting Procedures:

Use air-supplied rescue equipment for enclosed areas. Cool exposed containers with water.

### SECTION 6 - HEALTH HAZARD DATA

THRESHOLD LIMIT VALUE: EFFECTS OF OVEREXPOSURE 100 PPM (ACGIH - Time weighted average)

Liquid is minimally irritating to the eyes. High vapor concentrations may also be irritating.

Eye Contact: Skin Contact:

Liquid is mildly irritating to the skin. Prolonged or repeated liquid contact can result in defatting and drying

of the skin which may result in skin irritation and dermatitis.

Inhalation:

Vapors are irritating to the nose, throat and respiratory tract. High vapor concentrations may cause central

nervous system depression.

Ingestion:

Liquid is moderately toxic and may be harmful if swallowed; may produce central nervous system depression. Ingestion of product may result in vomiting; aspiration (breathing) of vomitus into the lungs must be avoided

as even small quantities may result in aspiration pneumonitis.

Carcinogenicity:

Xylene is not known to be mutagenic, carcinogenic or a skin sensitizer. However, the available experimental data are limited and insufficient to assess carcinogenic potential. Xylene is not listed as a carcinogen by NTP,

IARC or OSHA.

Target Organs:

A six week inhalation study with Xylene produced hearing loss in rats. Laboratory animals exposed by various routes to high doses of Xylene have exhibited effects in liver, kidneys, lungs, spleen, heart, blood and

adrenals.

Developmental:

Xylene produced limited evidence of developmental toxicity in laboratory animals. Inhalation and oral administration of Xylene resulted in decreased fetal weight, increased incidences of delayed ossification,

skeletal variations and resorptions.

Medical Conditions Aggravated by Exposure: Pre-existing eye, skin and respiratory disorders may be aggravated by exposure to this product. Exposure to high concentrations of this material may cause irregular heartbeats (arrhythmias). Persons with

pre-existing heart disorders may be more susceptible to this effect.

Chronic Effects:

This product contains Ethyl Benzene. A draft report on a study conducted by the National Toxicology program states that lifetime inhalation exposure of rats and mice to concentrations of Ethyl Benzene (750 ppm) resulted in increases in certain types of cancer, including kidney tumors in rats and lung and liver tumors in mice. These effects were not observed in animals exposed to lower concentration of Ethyl Benzene (75 ppm or 250 ppm). The draft report does not address the relevance of these results to humans.

### SECTION 7 - REACTIVITY DATA

Stability:

Stable

Conditions to Avoid:

Heat, sparks and flame.

Incompatibility (Materials to Avoid):

Strong oxidizing agents like liquid chlorine or concentrated oxygen, concentrated nitric and sulfuric

acids, halogen and molten sulphur.

Hazardous Decomposition Products:

Thermal decomposition may yield carbon dioxide and carbon monoxide.

Hazardous Polymerization:

Will not occur.

EFFECTS (SEE NOTICE) % IN PKOD. SECTION II - HAZARDOUS INGREDIENTS DESIGNATIONS (PPM) OSHA'S HAZARD COMMUNICATION STANDARD (29 CFR 1910 1200) DOES NOT REQUIRE THE LISTING OF ANY INGREDIENTS FOR THIS PRODUCT. SECTION III - HEALTH HAZARD DATA
SPECIAL NOTE: MSDS data pertains to the product as dispensed from the container. Adverse health effects would not be expected under recommended conditions of use (diluted) so long as prescribed safety precautions. are practiced. ACUTE EFFECTS OF OVEREXPOSURE: Product is considered non-toxic orally according to 16 CFR 1500.3 (Code of Federal Regulations 16, Federal Hazardous Substances Act Regulations, Part 1500.3). However, no product should be intentionally ingested. Ingestion of an excessive amount of the product may cause complications. There are no known effects from acute overexposure to this product. However, in light of good industrial hygiene, exposure to any chemical should be CHRONIC EFFECTS OF OVEREXPOSURE:
There are no known effects from chronic exposure to this product.
None of the ingredients are listed as carcinogens by IARC, NTP, or OSHA
EST D PEL/TLV: Not established PRIMARY ROUTES OF ENTRY: N/A HMIS CODES: HEALTH 0; FLAM, 0; REACT, 0; PERS, PROTECT, A., CHRONIC HAZ, NO FIRST AID PROCEDURES:
SKIN: Flush contaminated skin with plenty of water. Consult a physician if irritation develops.
EYES. Flush eyes thoroughly with plenty of water. If irritation persists, consult a physician
INHALE: Move exposed person to Iresh air. If irritation persists, get medical attention promptly,
INGEST. If this product is swallowed, do not induce vomiting. If victim is conscious give plenty of water to drink. Get medical attention at once. PROTECTIVE CLOTHING: Wearing neoprene or nitrile gloves is recommended when prolonged excessive contact occurs (eg immersing hands) EYE PROTECTION: Use of light-fitting safety glasses or goggles is strongly recommended, especially when wearing contact lenses. VENTILATION: No special measures are required. VENTILATION: No special measures are required. SECTION V - PHYSICAL DATA BOILING POINT (F):

INCOMPATIBLILITY(AVOID): Strong oxidizing agents.
POLYMERIZATION: Will not occur.
HAZARDOUS DECOMPOSITION: Carbon dioxide, carbon monoxide, and other unidentified organic compounds. STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILL AND DISPOSAL PROCEDURES

Observe safety procedures in section 4 & 9 during clean-up. Absorb spill on inert absorbent material (eg Zep-O-Zorb). Pick up and place residue in a suitable waste container or, if permitted, flush to sewer. Thoroughly rinse spill area with water.

WASTE DISPOSAL METHOD:
Liquid wastes are not contained. Liquid wastes are not permitted in landfills. This product is not considered a hazardous waste under RCRA. Unusable liquid may be absorbed on an unert absorbent material (eg. Zep-O-Zorb), drummed, and taken to a chemical or industrial landfill. In some areas disposal by flushing into a sanitary sewer with plenty of water may be permissible. Consult local, state, and federal agencies for proper disposal method in your area. RCRA HAZ. WASTE NOS:: N/A SECTION IX - SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN WHEN HANDLING AND STORING:
Store tightly closed container in a dry area at temps, between 40-120 degrees F.
Keep product out of eyes.
Avoid prolonged contact with skin
Clothing or shoes which become contaminated with substance should be removed promptly and not reworn until thoroughly cleaned.
Keep out of the reach of children. MOR 001387

#### NOTICE

Thank you for your interest in, and use of. Zep products. Zep Manufacturing Co. is pleased to be of service to you by supplying this Material Safety Data Sheet for your files. Zep Manufacturing is concerned for your health and safety. Zep products can be used safety with proper protective equipment and proper handling practices consistent with label instructions and the MSDS. Before using any Zep product, be sure to read the complete label and the Material Safety Data Sheet.

As a further word of caution. Zep wishes to advise that senious accidents have resulted from the misuse of "emptied" containers. "Empty" containers retain residue (liquid and/or vapor) and can be dangerous. Do NOT pressurate, cut weld braze, solder, drill, grind or expose such containers to heat, titume, or other sources of ignition; they may explode or develop harmful vapors and possibly cause injury or death. Cleen empty containers by triple rinsing with water or an appropriate solvent. Empty containers must be sent to a drum reconditioner before reuse.

### TERMS AND ABBREVIATIONS LISTED ALPHABETICALLY BY SECTION

tissue (e.g. burns). DESIGNATIONS: Chemical and common names of hazardous

ingredients. EIR: Eye Irritant Only - Causes reversible reddening and/or

EIN: Eye Intram Only - Causes reversible reddening and/or inflammation of eye issues. EXPOSURE LIMITS The time weighted average (TWA) airborne concentration at which most workers can be exposed without any expected adverse effects. Primary sources include ACGIH TLVs. and OSHA PELs (TWA, STEL and ceiling limits). ACGIH American Conference of Governmental Industrial Hydrogenic.

ACGIH American Conference of Governmental Industrial Hygienats. CEILING The concentration that should not be exceeded in the workplace during any part of the working exposure. OSHA: Occupational Safety and Health Administration PEL: Permasable Exposure Limit - A set of time weighted average exposure values, established by OSHA, for a normal 8-hour day and a 40-hour work week PPM: Parts per miltion - unit of measure for exposure limits. ISI SIKIN: Stin contract with substance can contribute to (S) SKIN: Sion contact with substance can contribute to overall exposure
STEL: Short Term Exposure Limit - Maximum concentration

for a continuous 15-minute exposure period.

TLV: Threshold Limit Value - A set of time weighted
acrage exposure limits, established by the ACGIH, for a
normal 8-hour day and a 40-hour work week

enough vapor to ignite if a source of ignition is present as tested with a closed cup tester HAZARDOUS INGREDIENTS. Chemical substances determined to be potential health or physical hazards based on the criteria established in the OSHA Hazard Communication Standard - 29 CFR 1910 1200

HTX. Highly toxic - the probable lethal dose for a 70kg (150 lb.) man and may be approximated as less than 6 teaspoons (2

IRR. Irritant - Causes reversible effects in living tesues (e.g. inflammation) - primarily skin and eyes. N/A: Not Applicable - Category is not appropriate for this

product. N.D: Not Determined - Insufficient information to make a N.D. Not betermined - mischall and the state of chemical Substances - an unreviewed listing of published toxicology data on chemical

SARA: Superfund Amendment and Reauthorization Act - Section 313 designates chemicals for possible reporting for the Toxics Release Inventory. SEN: Sensitizer - Causes allergic reaction after repeated

exposure.
TOX: Toxic - The probable lethal dose for a 70 kg (150 lb.) man is one ounce (2 tablespoons) or more.

SECTION III: HEALTH HAZARD DATA

SECTION III: HEALTH HAZARD DATA
ACUTE EFFECT. An adverse effect on the human body from a
single exposure or within a relatively short time.
CHRONIC EFFECT: Adverse effects that are most skely to occur
from repeated exposure over a long period of time
EST D PEL/TLV: The estimated, time-weighted sverage, exposure
limit, developed by using a formula provided by the ACGIH.
pertains to airborne concentrations from the product as a
whole. This value should serve as guide for provising safe
workplace conditions to nearly all workers.
HMIS CODES: Hazardous Material Identification System - a rating
system developed by the National Paint and Coating Association
for estimating the hazard potential of a chemical under normal
workplace conditions. These risk estimates are indicated by a
numerical rating given in each of three hazard areas
(Health/Flammability/Reactivity) ranging from a low of zero to a
high of 4. The presence of a chronic hazard is indicated with a yes.
Consult HMIS training guides for Personal Protection letter
codes which indicate necessary protective equipment.
PRIMARY ROUTE OF ENTRY: The way one or more hazardous
ingredients may enter the body and cause a generalized-systemic
or specific-organ toxic effect.
ING: Ingestion - A primary route of exposure through
swellowing of material

inG: Ingestion - A primary route of exposure through swallowing of material INH: Inhalation - A primary route of exposure through breathing of vacors

SKIN: A primary route of exposure through contact with

SECTION IV: SPECIAL PROTECTION INFORMATION Where respiratory protection is recommended, use only MSH NIOSH approved respirators and dust masks MSHA: Mine Safety and Health Administration NIOSH: National Institute for Occumational Safety and Health

SECTION V: PHYSICAL DATA
EVAPORATION RATE Refers to the rate of change from the
liquid state to the vapor state at ambient temperature and
pressure in comparison to a given substance (e.g. water)
pH; A value representing the acidity or alkalinity of an
aqueous solution (Acidic pH = 1; Neutral pH = 7; Alkaline pH = 14)
VOC CONTENT. The percentage or amount in pounds per
gallion of the product that is regulated as a Volatile Organic
Compound under the Clean Air Act of 1990 and various state jurnsdictions.
SOLUBILITY IN WATER: A description of the ability of the

product to dissolve in water

SECTION VII: REACTIVITY DATA

HAZARDOUS DECOMPOSITION. Breakdown products expected to be produced upon product decomposition by settreme heat or fire. INCOMPATIBILITY: Material contact by extreme heat and the conditions to avoid to prevent hazardous reactions. POLYMERIZATION: Indicates the tendency of the product's molecules to combine with themselves in a chemical reaction.

releasing excess pressure and heat STABILITY: indicates the susceptibility of the product to apontaneously and dangerously decompose.

SECTION VIII: SPILL AND DISPOSAL PROCEDURES RCRA WASTE NOS: RCRA (Resource Conservation and Reco waste codes (40 CFR 261) applicable to the disposal of spilled or unusable product from the original container.

SECTION X: TRANSPORTATION DATA
CWA: Clean Water Act-Federal Law which regulates chemical releases to bodies of water
RC: Reportable Quantity - The amount of the specific ingredient that, when spilled to the ground and can enter a storm sewer or natural watershed, must be reported to the National Response Center, and other regulatory agencies.
TSCA: Toxic Substances Control Act - a federal faw requiring all commercial chemical substances to appear on an inventory maintained by the EPA.

DISCLAIMER

All statements, technical information and recommendations contained herein are based on available scientific tests or data which we believe to be reliable. The accuracy and completeness of such data are not warranted or guaranteed. We cannot anticipate all conditions under which this information and our products, or the products of other manufacturers in combination with out products may be used. Zep assumes no liability or responsibility for loss or damage resulting from the improper use or handling of our products. Tom incompatible product combinations, or from the fasher to follow instructions, warrangs, and advisones in the products label. instructions, warrangs, and advisores in the products label and Material Safety Data Sheet.

SECTION III - HEALTH HAZARD DATA Special Note: MSDS data pertains to the product as dispensed from the container. Adverse health effects would not be expected under recommended conditions of use (diluted) so long as prescribed safety precautions are practiced.

**Acute Effects of Overexposure:** 

This product can be an eye irritant. Inflammation of eye tissue is characterized by redness, watering, and/or itching. One of the ingredients in this product has caused sensitization reactions in a small percentage of the general population.

Chronic Effects of Overexposure:

Contact, especially if prolonged of repeated, may cause redness, itching, or blistering of the skin. None of the hazardous ingredients are listed as carcinogens by IARC, NTP. & OSHA

:t'd PEL/TLV: Not established

Primary Routes of Entry: N/A

11S Codes: HEALTH 1;FLAM. 2;REACT. 0;PERS. PROTECT. B ;CHRONIC HAZ. NO

Škin: Wash contaminated skin thoroughly with soap or a mild detergent. Apply a skin cream with lanolin. Get medical attention if irritation persists. Eyes: Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting upper and lower lids. Get medical attention at once

Inhale: Move exposed person to fresh air. If irritation persists, get medical attention promptly.

Ingest: If this product is swallowed, do not induce vomiting. If victim is conscious give plenty of water to drink. Get medical attention at once.

SECTION IV - SPECIAL PROTECTION INFORMATION

Protective Clothing: Eye Protection:

Wear nitrile gloves or use gloves with demonstrated resistance to the ingredients in this product.

Wear tight-fitting splash-proof safety glasses especially if contact lenses are worn. No special measures are required.

Respiratory Protection: Ventilation:

No special measures are required

Boiling Point (°F): 338-Percent Volatile by Volume (%): 93.8 338-375

Fire exposed drums should be cooled with stream of water.

None

### ZEP MANUFACTURING COMPANY MATERIAL SAFETY DATA SHEET

SECTION VII - REACTIVITY DATA

Stability:

Incompatibility (avoid):

Strong oxidizing agents.

Polymerization:

Will not occur

Hazardous Decomposition:

Carbon dioxide, carbon monoxide, and other unidentified organic compounds.

#### SECTION VIII - SPILL AND DISPOSAL PROCEDURES

Steps to be Taken in Case Material is Released or Spilled:

iserve safety procedures in section 4 & 9 during clean-up. Absorb spill on inert absorbent material (eg Zep-O-Zorb). Pick up and place residue in a suitable waste intainer or, if permitted, flush to sewer. Thoroughly rinse spill area with water.

Waste Disposal Method:

Liquid wastes are not permitted in landfills. This product is not considered a hazardous waste under RCRA. Unusable liquid may be absorbed on an inert absorbent material (eg. Zep-O-Zorb), drummed, and taken to a chemical or industrial landfill. In some areas disposal by flushing into a sanitary sewer with plenty of water may be permissible. Consult local, state, and federal agencies for proper disposal method in your area.

RCRA Hazardous Waste Numbers: N/A

### SECTION IX - SPECIAL PRECAUTIONS

Precautions to be Taken When Handling and Storing:

Store tightly closed container in a dry area at temps, between 40-120 degrees F. Keep product out of eyes. Avoid prolonged contact with skin. Clothing or shoes which become contaminated with substance should be removed promptly and not reworn until thoroughly cleaned. Keep out of the reach of children.

### SECTION X - TRANSPORTATION DATA

**DOT Label/Placard: NONE** 

DOT PROPER SHIPPING NAME Small sizes one gallon or less may be shipped as ORM-D: NONE

Thank you for your interest in, and use of, Zep products. Zep Manufacturing Co. is pleased to be of service to you by supplying this Material Safety Data Sheet for your files. Zep Manufacturing is concerned for your health and safety. Zep products can be used safely with proper protective equip-ment and proper handling practices consistent with label instructions and the MSDS. Before using any Zep product, sure to read the complete label and the Material Salety Data Sheet.

As a further word of caution, Zep wishes to advise that serious accidents have resulted from the misuse "emptied" containers. "Empty" containers retain resi (liquid and/or vapor) and can be dangerous. DO NOT pres-Surize, cut, weld, braze, solder, drill, grind or expose such containers to heat, flame, or other sources of ignition; they may explode or develop harmful vapors and possibly cause injury or death. Clean empty containers by triple risality with water or an appropriate solvent. Empty containers must be sent to a drum reconditioner before reuse.

#### TERMS AND ABBREVIATIONS USED IN THE MSDS: BY SECTION ALPHABETICALLY:

TION II: HAZARDOUS INGREDIENTS

ogy Program (NTP), the International Agency for Research on Cancer (IARC) or OSHA as a definite or possible human cancer causing agent.
CAS #; Chemical Abstract Services Registry Number - A

universally accepted numbering system for chemical sub-

CBL: Combustible - At temperatures between 100°F and 200° Communities off enough vapor to ignite if a source of ignition is present as tested with a closed cup tester. CNS: Central Nervous System depressant reduces the activities. ity of the brain and spinal cord.

COR: Corrosive - Causes Irreversible alterations in living

tissue (e.g. burns).
DESIGNATIONS: Chemical and common names of hazardous inaredients.

EIR: Eye Irritant Only - Causes reversible reddening and/or

inflammation of eye tissues.

EXPOSURE UMITS; The time weighted average (TWA) airborne concentration at which most workers can be exposed without any expected adverse effects. Primary sources include ACGIH TLV's, and OSHA PEL's (TWA, STEL and ceiling limits).

ACGIH; American Conference of Governmental Industrial Hygienists.

CEILING: The concentration that should not be exceeded in the workplace during any part of the working exposure.

OSHA: Occupational Safety and Health Administration

PEL: Permissible Exposure Limit- A set of time weighted

average exposure values, established by OSHA, for a normal 8-hour day and a 40-hour work week.

FPM: Parts per million - unit of measure for exposure

(S) SKIN; Skin contact with substance can contribute to overall exposure.

STEL: Short Term Exposure Limit- Maximum concentration

for a continuous 15-minute exposure period. TLV; Threshold Limit Value - A set of time weighted average exposure limits, established by the ACGIH, for a normal 8-hour day and a 40-hour work week

FBL: Flammable - At temperatures under 100°F, chemical

gives off enough vapor to Ignite if a source of ignition is present as tested with a closed cup tester.

HAZARDOUS INGREDIENTS; Chemical substances determined to be potential health or physical hazards by the criteria established in the OSHA Hazard Communication Standard - 29 CFR 1910.1200

HTX; Highly toxic - the probable lethal dose for 70 kg (150 lb.) man and may be approximated as less than 6 teaspoons (2 tablespoons).

IRR: Irritant - Causes reversible effects in living tissues (e.g.

inflammation) - primarily skin and eyes.

N/A; Not Applicable - Category is not appropriate for this product.

N/D; Not Determined - Insufficient information for a deter-

mination for this item

RTECS#; Registry of Toxic Effects of Chemical Substances an unreviewed listing of published toxicology data on chemical substances.

SARA: Superfund Amendments and Reauthorization Act -

Section 313 designates chemicals for possible reporting for the Toxics Release Inventory. SEN; Sensitizer - Causes allergic reaction after repeated

TOX; Toxic - The probable lethal dose for a 70 kg (150 lb.) man is one ounce (2 tablespoons) or more.

SECTION III: HEALTH HAZARD DATA

ACUTE EFFECT; An adverse effect on the human body from a single exposure with symptoms developing almost immediately after exposure or within a relatively short time. CHRONIC EFFECT; Adverse effects that are most likely to

CHRONIC EFFECT; Adverse effects that are most likely to occur from repeated exposure over a long period of time. EST'D PEUTLV; This estimated, time-weighted average, exposure limit, developed by using a formula provided by the ACGIH, pertains to airborne concentrations from the product as a whole. This value should serve as guide for provid-ing safe workplace conditions to nearly all workers.

HMIS CODES; Hazardous Material Identification System - a rating system developed by the National Paint and Coating Association for estimating the hazard potential of a chemical under normal workplace conditions. These risk estimates are indicated by a numerical rating given in each of three hazard areas (Health/Flammability/Reactivity) ranging from a low of zero to a high of 4. A chronic hazard is indicated with a yes. Consult HMIS training guides for Personal Protection letter codes which indicate necessary protective

PRIMARY ROUTE OF ENTRY: The way one or more hazardous ingredients may enter the body and cause a general-

articles ingredients may enter the body and cause a general-ized-systemic or specific-organ toxic effect. I/NG: Ingestion - A primary route of exposure through swallowing of material. I/NI: Inhalation - A primary route of exposure through breatting of vecors.

breathing of vapors.

SKIN; A primary route of exposure through contact with

the skin.

#### SECTION IV: SPECIAL PROTECTION INFORMATION

Where respiratory protection is recommended, use only MSHA and NIOSH approved respirators and dust masks. MSHA; Mine Safety and Health Administration NIOSH; National Institute for Occupational Safety and

SECTION V: PHYSICAL DATA

EVAPORATION RATE; it refers to the rate of change from the liquid state to the vapor state at ambient temperature and pressure in comparison to a given substance (e.g. water). pH; A value representing the acidity or alkalinity of an aqueous solution (Acidic pH = 1; Neutral pH = 7; Alkaline

PERCENT VOLATILE: The percentage of the product (liquid or solid) that will evaporate at 212°F and ambient pressure. SOLUBILITY IN WATER: A description of the ability of the product to dissolve in water.

SECTION VIL REACTIVITY DATA

HAZARDOUS DECOMPOSITION; Breakdown products expeced to be produced upon product decomposition or fire. INCOMPATIBILITY; Material contact and conditions to avo. to prevent hazardous reactions.

POLYMERIZATION; Indicates the tendency of the product's molecules to combine in a chemical reaction releasing exess pressure and heat.

STABILITY; Indicates the susceptibility of the product to spontaneously and dangerously decompose

SECTION VIIE SPILL AND DISPOSAL PROCEDURES

RCRA WASTE MOS: RCRA (Resource Conservation and Recovery Act) waste codes (40 CFR 261) applicable to the disposal of spilled or unusable product from the original container.

SECTION X: TRANSPORTATION DATA

CWA: Clean Water Act

RQ; Reportable Quantity - The amount of the specific Ingradient that, when spilled to the ground and can enter a storm sewer or natural watershed, must be reported to the National Response Center, and other regulatory agencies. TSCA: Toxic Substances Control Act - a federal law requiring all commercial chemical substances to appear on ar Inventory maintained by the EPA.

### DISCLAIMER

All statements, technical information and recommendation contained herein are based on available scientific tests a data which we believe to be reliable. The accuracy and completeness of such data are not warranted or guaranteed. We cannot anticipate all conditions under which this information and our products, or the products of other manufacturers in combination with our products, may be used. Zep assumes no liability or responsibility for loss or damage resulting from the improper use or handling of our products, from incompatible product combinations, or from the failure to follow instructions, warnings, and advisories in the product's label and Material Safety Data Sheet.

Generator Approval Notification

Customer: ENVIRONMENTAL WASTE SRVCS.

Fax: (630) 365-3112

FRED PFEIFFER
THE MOREY GROUP
100 MOREY DR.
WOODRIDGE, IL 60517

This Generator Approval Notification acknowledges the acceptability of waste material(s) into the EQ environmental protection facility identified below and ensures that this facility has the appropriate permit(s) issued by federal and state regulatory agencies to properly transport, treat, and/or disposal of the waste material(s).

EQ FACILITY: EQ Resource Recovery, Inc. (MID060975844)

36345 Van Born Road, Romulus, Michigan 48174

Approval Number: J06300D

Generator EPA ID #: ILG000060910

Approved Container: DRUM Expires On: 10/9/2002

Waste Common Name: Waste Flux

Comments:

Primary Waste Code: D001

The Approval(s) listed above are based upon characterization information supplied to EQRR by the Customer and the generator (if other than the Customer). The Customer is ultimately responsible for the accuracy and completeness of all such information, whether provided by the Customer or the generator. The Customer must notify the EQRR Approvals Department immediately upon knowledge of any changes to this information. This Approval and all wastes which are transported, delivered, or tendered to EQ under this Approval shall be subject to the attached Standard Terms and Conditions.

The Approval(s) will expire on the date(s) noted. Any new Approvals obtained from EQRR on future business will be valid for a period of one (1) year from the date of issuance. Within 30 days of the Approval Expiration Date, you will be notified of the requirements for recertification.

## **Hazardous Chemical Labeling Procedure**

## Hazardous chemicals must be labeled with the following information.

- The place where the chemical is stored (i.e. Paint Room, Post Wave etc.).
- The name of the chemical (Flux, Alcohol, etc.)
- The hazard diamond must be filled in with the hazard ratings in each of the four categories.
  - 1. Flammability rating
  - 2. Health hazards
  - 3. Reactivity rating.
  - 4. Specific hazards

The information needed to fill in the Hazard diamond can be found on the MSDS reference guide, or on the label of the original container, the chemical came in.

Each category is rated on a scale from zero to four, with four being the most hazardous.

for instance:

Liquid Nitrogen has a flammability rating of 4

Isopropyl Alcohol has a flammability rating of 3

Crude oil has a flammability rating of 2 Wood has a flammability rating of 1 Water has a flammability rating of 0

### PROGRAM FOR REMOVAL OF HAZARDOUS WASTE

Six Chemicals May Be Disposed Of In The 55 Gallon Drum Marked "HAZARDOUS WASTE." The Drum Is Located In The Flame Room.

- 1 Waste Solder Flux
- 2 P.C. 101
- 3 P.C. 101 Thinner
- 4 Di-Basic Ester
- 5 Potting Compound
- 6 PAINT

\* NOTE: No other chemicals are to be disposed of in this 55 gallon drum Mixing unknown chemicals may cause a reaction resulting in explosion or fire. Any waste chemicals not on this list should be stored in their original containers and given to the Safety Director For Disposal.

Accumulating and Storing Wastes:

- Proper Transfer Container --- 5 gallon drums acceptable, but must be emptied into larger 55 gallon drums within 30 days of it's filling with used chemical.
- 2). Proper Labeling --- Each container must be labeled with the following:
  - A). Name (used flux, used P.C. 101)
  - B). Where it came from (wave solder)
  - C). Using the diamond shaped area on the Hazmat Label, fill in the 4 hazard categories.
    - 1). Health Hazard; rating 1
    - 2). Fire Hazard; rating 3
    - 3). Reactivity; rating 0
    - 4). Specific Hazard, rating 0
- All containers must be poured directly into the 55 gallon drum at the time they are moved to the Flame Room
- 4). Each full 55 gallon drum of used flux should be disposed of as soon as it becomes full.
- 5). All containers must have lids in place.

The company ENVIRONMENTAL WASTE SERVICES (630) 365-1100 is our source for disposing of waste flux.

Disposal cost: \$110.00 per 55 gallon drum New Drum Cost: \$35.00

## **Hazardous Waste Procedure**

The Morey Corporation has been identified as a potential hazardous waste generator and therefore subject to regulation of such waste under the Resource Conservation and Recovery Act (RCRA). Failure to follow RCRA may result in a civil penalty.

If waste exhibits the following characteristics it is considered to be hazardous:

- 1. Ignitability;
- 2. Corrosivity;
- 3. Reactivity;
- 4. Extraction Procedure Toxicity

Hazardous waste cannot be thrown out with the garbage. It must be disposed of in the following manner.

#### Supervisor's Responsibility:

- A. Hazardous material cannot be mixed exept for the 6 chemicals allowed to be mixed in the hazardous waste drum
- B. Containers for hazardous material must be identified with a label on the container.
- C. Satelite waste containers must be dumped into a 55 gal. drum as soon as they become full. This applies to all chemicals.
- D. All 55 gallon containers must be stored in the Fire Room until they are ready to be disposed of.
- E. Once the 55 gal. drum is filled the Safety Supervisor is to fill out a disposal form and give it to the purchasing department.

#### STOCK ROOM:

A. It is the Safety Manager's responsibility to provide empty 55 gal. drums as required.

#### PURCHASING:

- A. Upon receipt of the hazardous waste disposal form the purchasing department will Call Environmental Waste Services at (630) 365-1100
- B. Environmental Waste Services will fill out the hazardous waste labels (one per container), and provide all necessary paperwork for transportation including Uniform Manifest.
- C. The Safety Manager will receive 2 copies of the Uniform Manifest from the

Environmental Waste Services pick up person. One copy will be filed in the "Hazardous Waste Folder" in the safety file drawer located at the Safety manager's desk. The second copy must be mailed to the State of Michigan Department of Environmental Quality by the front office.

D. The Safety Manager will receive a copy of the Uniform Manifest from the State of Michigan. The copy must be filed in the "Hazardous Waste Folder" in the safety file drawer located at the Safety manager's desk.

, and continuing to and including \*\*
, the premises located in the City of Downers Grove

, County of Dupage

1. The Landlord leases to the Tenant for a term commencing on \*

, and State of Illinois

described as follows:

\*\* Ten (10) years after the first day of the first month following the month in which Tenant take possession.

See Exhibit 'E', which is attached hereto and made a part hereof.

including all improvements now or hereafter thereon and all appurtenances thereto. Said premises are commonly known as 2663 Wisconsin Avenue.

- 2. The Tenant shall pay rent to the Landlord at the annual rate of Twenty Five Thousand Seven Hundred and No/100

  Dollars (\$ 25,700.00 ) payable in equal monthly installments on or before the tenth (10th) day of each calendar month for the current calendar month. Rent for part of a month shall be prorated. Anything contained herein to the contrary notwithstanding, the Tenant's obligation to pay rent hercunder shall not commence until actual and exclusive possession of the leased premises has been delivered to the Tenant and all repairs, alterations and improvements necessary to fit the premises for occupancy at i use by the Tenant shall have been completed, all as contemplated by Paragraphs 19 & 20 hereinbelow.
  - 3. All payments to the Landlord may be made by checks or drafts payable to the order of

The Morey Corporation and mailed to such payee at 2659 Wisconsin Avenue Downers Grove, Illinois 60515

5. If the Tenant has exercised the foregoing option to extend the term, it may, by written notice mailed or telegraphed to the Landlord One Hundred Eighty (180) or more days before the end of the term as extended, further extend the term to and including for an additional Five years

upon the same terms and conditions as herein set forth, except that rent during the further extended term shall be adjusted upward extended term by the percentage change in the CPI since the commencement of the extended term, but in no event shall rent be increased by more than 75%.

graphed to the Landlord ( ) or more days before the effective date of the cancellation, may cancel this lease as of

All rent and other charges paid in advance for any period after the effective date of such cancellation

- 7. The Landlord will not interrupt or disturb any entrances, exits, or approaches, or deprive the premises of any light or air now enjoyed by the premises.
- 8. The Landlord covenants and agrees to maintain the Tenant's quiet possession and enjoyment of the entire leased premises during the term hereofanakanness movements agrees that the sense keeps and the provinces has remained to the term hereofanakanness movements and the provinces has remained to the provinces and the provinces has remained to the provinces and the provinces has a provinces and the provinces has a provinces and the provinces and the provinces has a provinces and the provinces and the provinces has a provinces and the provinces and the provinces and the provinces and the provinces and the provinces and the provinces and the provinces and the provinces and the provinces and the provinces and the provinces and the provinces are provinced by the provinces and the provinces are provinced by the provinces and the provinces and the provinces are provinced by the provinces and the provinces are provinced by the provinces and the provinces are provinced by the provinces and the provinces are provinced by the provinces and the provinces are provinced by the provinces and the provinces are provinced by the provinces and the provinces are provinced by the provinces and the provinces are provinced by the provinces are provinced by the provinces are provinced by the provinces are provinced by the provinces are provinced by the provinces are provinced by the provinces are provinced by the provinces are provinced by the provinces are provinced by the provinces are provinced by the provinces are provinced by the provinces are provinced by the provinces are provinced by the provinces are provinced by the provinces are provinced by the provinces are provinced by the provinces are provinced by the provinces are provinced by the provinces are provinced by the provinces are provinced by the provinces are provinced by the provinces are provinced by the provinces are provinced by the provinces are provinced by the provinces are provinced by the provinces are provinced by the provinces are provinced by the provinces ar
- 9. The Tenant, at its own expense, may from time to time install on the premises any equipment fixtures and improvements and remove them and may make any alterations or additions in a good and workmanlike manner in and to the premises and may erect or remove any signs on the premises which it may deem necessary or suitable for the conduct of its business. (except advertising signs)

- 12. The Tenant may sublet the premises or assign this lease; provided, however, that the Tenant shall not be relieved from its obligations under the lease by such subletting or assignment without the Landlord's consent.
- 13. The Tenant may holdover at the end of the term, without extending the term or renewing the lease, provided the Landlord, at least thirty (30) days prior to the expiration of the term, has not given written notice to the Tenant to vacate the premises at the expiration of the term. If the Tenant does so holdover, the tenancy thereafter shall continue upon the terms and conditions of this lease in effect during the last month of the term until terminated by either party by notice mailed to the other party at least thirty (30) days before the effective date of such termination.
- 14. The Tenant, on the last day of the term, or on the last day of any holdover, will surrender the premises in as good condition as when the Tenant takes possession, except for ordinary wear and tear, repairs and replacements required to be made by the Landlord, loss by fire or casualty, loss by any cause beyond the Tenant's control, and alterations, additions, and improvements herein permitted.

- 15. Tenant shall pay for all gas and electricity used by it on the demised premises.
- 16. (a) The Landlord shall pay when due all taxes and assessments of every kind and nature which have been or which shall during the term of this lease be levied, assessed or otherwise imposed upon the leased premises, including all improvements now or hereafter thereon, but nothing contained in this Section 16 shall be deemed to obligate the Landlord to pay any taxes levied or assessed against the personal property of the Tenant located in the leased premises or any taxes commonly known as "chain store taxes" imposed on the Tenant by reason of the fact that the Tenant operatesmore than one place of business in the jurisdiction imposing such tax, which personal property taxes and chain store shall be paid the Tenant.
- (b) The Tenant, upon receipt of satisfactory evidence of the amount of such excess, shall reimburse the Landlord the amount by which the general real estate taxes levied and assessed against the leased premises for each subsequent tax fiscal year during the term of this lease exceed the general real estate taxes levied and assessed against the leased premises for the third tax fiscal year following Tenant's occupancy; provided, however, that the Tenant shall be obligated to pay only its pro rata share of such excess taxes for the tax fiscal year during which its obligation to pay rent under this lease ceases, said pro rata share to be based upon the number of days of the then current tax fiscal year for which the Tenant has been obligated to pay tent under this lease.
- (c) Prior to the payment thereof, the Landlord shall submit to the Tenant copies of all general real estate tax bills, a portion of which the Tenant may be obligated to pay to the Landlord under this Section 18, together with a statement showing the computation of the amount owed by the Tenant to the Landlord hereunder, supported by such evidence as the Tenant may reasonably require, where-upon the Tenant (unless it shall contest such taxes as hereinafter provided) shall pay to the Landlord within thirty (30) days after receipt of such bills, statement and other evidence, that portion of such general real estate taxes required to be paid by the Tenant hereunder.
- (d) In the event the Tenant shall desire to contest the validity or amount of any tax, a portion of which it may be required to pay to the Landlord hereunder, the Tenant, within thirty (30) days after being notified of the amount thereof, shall notify the Landlord of its intention to do so, whereupon the Landlord shall defer payment of any such tax so long as the validity or amount thereof shall be contested by the Tenant in good faith and by proper proceedings, except that the Landlord may make such payments under protest or take such other steps with regard to said tax as will not prejudice the Tenant's opportunity to successfully contest the validity or amount thereof. The Landlord agrees to render to the Tenant all assistance reasonably possible, without expense to the Landlord, in contesting the validity or amount of any such tax, including joining in and signing any protest or pleading which the Tenant may deem it advisable to file. Should any rebate be made on account of any tax a portion of which has been paid by the Tenant to the Landlord hereunder shall belong to and be paid to the Tenant.
- 17. Tenant shall maintain the parking lot areas, fence, and paved areas in good condition and repair, and shall also, as necessary, maintain, repair, and replace the gas pump and lighting facilities on the demised premises.
- 18. Tenant shall carry General Liability insurance, or at its option be self-insured, with limits of not less than Two Hundred and Fifty Thousand Dollars (\$250,000.00).

- 19. Within Thirty (30) days after WHXEXEXECUTERXOCKERISK LARGE, Landlord shall commence, and thereafter diligently prosecute to completion, the following Landlord's work, as also more fully described an Exhibit "B", which is attached hereto and made a part hereof:
  - (a) Grade, compact, and gravel the parking areas so as to be suitable for Tenant's intended use.
  - (b) Install a six (6) foot chainlink fence (with barbed wire and sliding gate) around the perimeter of the demised area.
  - (c) Excavate for, position, and install a certain Eight Thousand (8000) gallon gasoline tank, and pump, located as shown on Exhibit "B", tank and pump to be supplied by Tenant promptly after last execution of this Lease.
  - (d) Provide electric service to the gas pump.
  - (e) Install and erect a lighting pylon, and attach lighting fixtures thereto, as shown on Exhibit "B".
  - (f) Lay concrete paving in and about the area of the gasoline pump as required.
  - (g) Pave a hard surface, all weather, access drive from the pump area to the adjoining parcel also leased by Tenant.

All work required to be performed by the Landlord hereunder shall be performed in a good and workmanlike manner. The Premises shall be left at the completion of such work in a safe, clean and tenantable condition and in good order and repair. Landlord shall perform all work provided for hereunder in conformity with all applicable construction and building codes and with every applicable requirement of law or duly constituted authority of law, or any Board of Underwriters, Rating Bureau or similar organization having jurisdiction, of carriers of insurance on the leased Premises. See paragraph 19, continued on Page 4a.

- 20. Tenant shall take possession of the Leased premises within a reasonable time, not to exceed Thirty (30) days, after Landlord notifies Tenant that all Landlord's work pursuant to Paragraph #19 has been completed and that Tenant may have exclusive possession of the Premises. In the event the Landlord has not completed all work on or before June 1, 1980 . Tenant may cancel this Lease by sending written notice to Landlord, whereupon this Lease shall be terminated and of no further force and event.

If the report on title, title binder, or leasehold title insurance policy, so required, discloses any defects in title (other than such usual objections contained in leasehold policies and matters to which this lease is subject) Landlord shall, upon tendering the same to Tenant within thirty (30) days from the date of last execution of this lease, have sixty (60) days, from the date which such title report, binder, or leasehold title insurance policy bears, to cure such defects and to furnish such title report, binder, or leasehold policy showing such defects cured or removed. If such defects in title are not so cured within sixty (60) days. Tenant may, at its option, terminate this lease. In the event this lease is so to

#### Paragraph 19 (continued)

Within Thirty (30) days after the last execution of this Lease, Landlord shall prepare appropriate plans, specifications and/or working drawingscovering the foregoing work, and submit same to Tenant for approval.

In the event Landlord does not complete the work diligently. Tenant may, at its option, cause the work to be completed and deduct the cost thereof from rent.

- 21.2 Tenant may, at its option, record this Lease and the cost of all documentary stamps, or conveyancing, transfer tax and recording fees shall be
- 21. Broker's Commissions If there are any Broker's fees or commissions payable in connection with the bringing about of the execution and delivery of this lease, the Landlord agrees that Landlord will pay same, that the Tenant shall not be liable for such fees and commissions and that the Landlord will indemnify and save the Tenant harmless from any and all claims for such fees and commissions.
- 22. Landlord and Tenant acknowledge that Tenant is negotiating a Lease of substiantially like terms and conditions for Premises adjoining the Landlord's Premises, and that Tenant's use of the demised premises is not feasible without the use of said adjoining Premises. Notwithstanding anything in this Lease to the contrary, Tenant's rental obligation hereunder shall not commence until Tenant has taken possession of the adjoining Premises. When the commencement date of both leases has become fixed, Landlord and Tenant agree to execute a Lease Supplement fixing the commencement date and the termination date of the Lease.

If, due to fire, the elements, or the exercise of the right of eminent domain or other authority of law, or any other cause, the premises shall become untenantable, dangerous or unfit for the Tenant's use, rent pavable under this lease shall abate during the continuance of that condition. If the conditions which give rise to an abatement of rent under this section continue for a period of ninety (90) days, then the Tenant may, at any time within sixty (60) days after such ninety (90) day period, cancel this lease and terminate its tenancy by giving the Landlord written notice of its intention to do so.

All notices, approvals, or requests in connection with this lease shall be sent by registered mail or telegram. Notices to the Landlord may be addressed to the Landlord at the address set forth in Section 3 above. Notices to the Tenant shall be addressed to Montgomery Ward & Co., Incorporated, at 140 South State Street, Chicago, Illinois, attention: Regional law Department.

Employees or agents of the Tenant have no authority to make or agree to make a lease. This instrument shall not be binding upon the Tenant until it has been executed on behalf of the Tenant by one of its corporate officers. No act or omission of any employee of the Tenant shall alter, change, or modify any of the provisions of this lease. Any alterations, changes, and modifications of this lease shall be effective only when made in writing and executed on behalf of the Tenant by one of its corporate officers.

All the grantors of the term shall be bound jointly and severally by this lease. This lease shall inure to the benefit of and be binding upon, the respective heirs, legal representatives, successors and assigns of the Landlord and the Tenant.

IN WITNESS WHEREOF, this lease has been duly executed under seal as of the first hereinabove written.

#### FIRST SUPPLEMENTAL AGREEMENT

THIS FIRST SUPPLEMENTAL AGREEMENT made this 29th day of December, 1989, by and between DOWNERS GROVE NATIONAL DANK RAW National Banking Association, as Trusted Under Trust No. 18-209, December called Landlord, and MONTGOMERY WARD & CO., INCORPORATED, an Illinois corporation, with corporate offices at One Montgomery Ward Plaza, Chicago, Illinois 60671, hereinafter called Tenant.

#### WITNESSETH:

WHEREAS, the parties hereto entered into a certain Lease Agreement dated February 5, 1980, hereafter called the Lease, covering certain premises located in the City of Downers Grove, County of DuPage, State of Illinois, commonly known as 2663 Wisconsin Avenue, now occupied by Tenant and more fully described in said Lease, and

WHEREAS, the parties are mutually desirous of supplementing said Lease;

NOW THEREFORE, for and in consideration of the mutual covenants contained herein, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties agree as follows:

- (1) The term of said Lease is hereby extended from and including the first (1st) day of October, 1990 to and including the thirtieth (30th) day of September, 1995.
- (2) Tenant shall continue to pay rent to Landlord for the leased premises during the extended term herein provided at the annual rate of TWENTY FIVE THOUSAND SEVEN HUNDRED AND NO/100 DOLLARS (\$25,700.00), payable in equal monthly installments on or before the tenth (10th) day of each calendar month for the current calendar month. Rent for part of a month shall be prosated.
- (3) Payments to the Landlord may be made by checks or drafts payable to the order of The Morey Corporation, and mailed to such payee at 2659 Wisconsin Avenue, Downers Grove, Illinois 60515.
- (4) Effective as of the complete execution and delivery of this First Supplemental Agreement, Section 4 of said Lease shall be and is hereby cancelled and deleted therefrom, it being understood and agreed, however, that the Tenant shall continue to have the option granted to it in Section 5 of said Lease to further extend the term for an additional period of five (5) years from the end of the extended term herein provided, in accordance with said Section 5.
- (5) In consideration of One Dollar (\$1.00) paid by the Tenant to the Landlord, the receipt and sufficiency of which is hereby acknowledged, Landlord hereby agrees that the Tenant shall have the option to execute this first Supplemental Agreement at any time within thirty (30) days after receipt of the same duly executed by Landlord.

02/07/96

EXCEPT as above supplemented, the Lease, together with any previous Supplemental Agreements and/or Lease Amendments, is hereby ratified and confirmed. All of the covenants of said Lease, as amended, shall be interdependent and binding upon and shall inure to the benefit of the parties hereto, their respective successors and assigns.

Mr. Chuck Jensen Regional Property Manager Montgomery Ward Corporate Real Estate 535 West Chicago Avenue Chicago, Illinois 60671

RE: Parking lot lease, Montgomery Ward Service Facility 2701, Behind Walnut Avenue, Downers Grove, Illinois.

Dear Mr. Jensen:

As you are aware, Montgomery Ward has chosen to exercise the final five year option on the parking lot described above.

The lease terms provide for a 75% increase in rent effective on the October 1, 1995 renewal date.

We therefore request that you update your records and payment system to reflect a monthly rent of \$3,747.91 as of October 1, 1995.

Please feel free to call the undersigned at (708) 964-2300 with any questions.

Very truly yours,

THE MOREY CORPORATION

RE: MONTGOMERY WARD - DOWNERS GROVE, IL PARKING LOT LEASE RENT INCREASE

Dear Mr. Cunningham:

Your letter of January 19, 1996 was referred to me for handling. According to the terms of our Lease dated February 5, 1980 and the First Supplemental Agreement dated December 29, 1989, our rent shall be increased per section 5 during the option period 10/1/95 thru 9/30/2000. Our fixed rent during this further extended term shall be adjusted upward at the commencement of the extended term by the percentage change in the CPI since the commencement of the extended term, but in no event shall rent be increased by more than 75%.

Below you will find our calculation for this increase using the following indexes:

CPI-U (82 Series)  $\frac{10/95}{10/90}$   $\frac{153.7}{133.5}$  - 15.13% Increase

Georgiansesso

Current monthly rent  $$2,141.67 \times 15.138 = $2,465.70 \text{ mo.}$ 

I have adjusted our rent retroactively to 10/1/95 to the new monthly amount of \$2,465.70. Our check in the amount of \$1,620.15 representing the rent adjustment for period 10/1/95 thru 2/29/96 shall be forthcoming in about ten days. Please note your records.

Should you have any questions, feel free to contact me at #312/467-7798.

Sincerely,

Barbara Gianfrancesco, Supr.

MOR 001546

# ASSIGNMENT OF LEASE

THIS ASSIGNMENT OF LEASE is executed this <u>18th</u>day of June, 1996, by THE MOREY CORPORATION (herein called the "Assignor") formerly the beneficiary of Downers Grove National Bank, as trustee under trust number 78-309 (herein called the "Trust"), and MOREY REALTY GROUP, INC., an Illinois corporation (herein called the "Assignee").

WHEREAS, pursuant to written lease (the "Lease") dated February 5, 1980, between Trust and Montgomery Ward & Co., Incorporated ("Tenant"), and amended by that First Supplemental Lease dated December 29, 1989, between Assignor (as successor to Trust) and Tenant, Tenant did lease the real property described therein; and

WHEREAS, in order to protect the real estate assets of Assignor from the possible liabilities attendant to the operation of Assignor's primary business, the Assignor did create a wholly owned subsidiary (Assignment) for purposes of owning and operating its real estate interests; and

WHEREAS, Assignor has transferred legal title to the Property which is the subject of the lease to Assignee;

NOW, THEREFORE, in consideration of the sum of Ten Dollars (\$10.00) in hand paid to Assignor, the mutual covenants contained herein and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledge, the parties hereby agree as follows:

- 1. Assignment of Lease. Assignor hereby transfers and assigns to Assignee any and all right, title and interest (specifically including, but not limited to, entitlement to receipt of rental income from the tenant thereunder from and after the date hereof) which Assignor may have, as landlord or otherwise, in the Lease.
- 2. Acceptance. By executing this Assignment, Assignee hereby accepts and agrees to perform all of the terms, covenants and conditions of the Lease on the part of the landlord therein required to be performed, from and after the date hereof.
- 3. Cross Indemnities. Assignee covenants and agrees to indemnify, save and hold harmless Assignor from and against any and all losses, liabilities, costs, expenses, damages, claims or causes of action existing in favor of, or asserted by, the tenant under the Lease which arise out of or relate to Assignee's failure to perform any of the obligations as landlord under the Lease arising after the date hereof. Assignor covenants and agrees to indemnify, save and hold harmless Assignee from and against any and all losses, liabilities, costs, expenses, damages, claims or causes of action existing in favor of, or asserted by, the tenant under the Lease which arise out of or relate to Assignor's failure to perform any of the obligations as landlord under the Lease arising prior to the date hereof.
- 4. Successors and Assigns. This Assignment of Lease shall inure to the benefit of, and be binding upon, the successors, executors, administrators, legal representatives and assigns of the parties hereto.

5. Governing Law. This Assignment of Lease shall be construed under and enforced in accordance with the laws of the State of Illinois.

IN WITNESS WHEREOF, the parties have executed this Assignment of Lease as of the date set forth above.

| ASSIGNOR:                                      | ASSIGNEE:                                         |
